CDOC

CALIFORNIA DIALOGUE ON CANCER

Preventing Cancer & Saving Lives through Collaboration

Mission

To reduce suffering and mortality in California through risk reduction, early detection, better treatment, and enhanced survivorship.

Who We Are

CDOC is a dynamic coalition of individuals and organizations working together to reduce the burden of cancer in the state of California. It is administered by the Comprehensive Cancer Control Program (CCCP), a program of CDPH, and funded by CDC.

CDOC is comprised of representatives from a variety of organizations, constituencies, and interest areas in cancer prevention and control.

California's Comprehensive Cancer Control Plan

CDOC was created specifically to develop and implement California's Comprehensive Cancer Control Plan (the state cancer plan). The state cancer plan is a strategic plan to reduce the cancer burden in our state, and is designed to provide guidance to individuals and organizations spanning a wide range of health and social disciplines that can play a role in reducing the burden of cancer.

Priorities

Increase colorectal cancer screening

Reduce obesity prevalence

Accelerate the human papillomavirus (HPV) vaccine uptake

Address survivorship needs

Crosscutting Priority – Reducing Health Disparities
