California Department of Public Health - Viral and Rickettsial Disease Laboratory California Rabies Strain Typing / Species ID Project Submittal Form

This form is to be used only by Public Health Laboratories to submit **laboratory confirmed**, rabid animals for rabies virus strain typing or <u>all</u> bats for speciation. The purpose of this study is to gather molecular epidemiology on rabies strains occurring in California and is not to be considered a diagnostic test. Place submittal form outside of the styrofoam specimen container. NOTE: When requesting rabies strain typing, please send brain in a separate labeled cryovial if possible.
