## California In-Hospital Breastfeeding as Indicated on the Newborn Screening Test Form Statewide, County and Hospital of Occurrence: 2017

Data Source: California Department of Public Health, Center for Family Health, Genetic Disease Screening Program, Newborn Screening Data, 2017

Prepared by: California Department of Public Health, Center for Family Health, Maternal, Child and Adolescent Health Program

All nonmilitary hospitals providing maternity services are required to complete the Newborn Screening Test Form [Version NBS-I(D) (12/08)].

Note 1: Infant feeding data presented in this report include all feedings since birth to time of specimen collection, usually 24 to 48 hours since birth.

Upon completing the form, staff must select from the following three categories to describe 'all feeding since birth':

(1) Only Human Milk; (2) Only Formula; (3) Human Milk & Formula.

The numerator for "Exclusive Breastfeeding" includes records marked 'Only Human Milk'.

The numerator for "Any Breastfeeding" includes records marked 'Only Human Milk' or 'Human Milk & Formula'.

The denominator excludes cases with unknown method of feeding and those receiving TPN at time of specimen collection.

Statewide approximately 1.7% of cases have missing feeding information and/or on TPN at time of specimen collection.

Note 2: Excludes data for infants that were in an Neonatal Intensive Care Unit (NICU) nursery at the time of specimen collection.

Note 3: Excludes cases that were not collected by facilities listed as 'Kaiser' and/or 'Regular' maternity hospitals in the newborn screening database.

Note 4: Data for counties shown in this table include information for all births occurring in a 'Regular' or 'Kaiser' facility providing maternity services in that county.

Counties and facilities with fewer than 50 births with known type of feeding are not shown.

Note 5: 95% confidence intervals are shown in parentheses. Confidence intervals were computed using the Wilson Score formula.

Newcombe, R.G. (1998). Two-sided confidence intervals for the single proportion: comparison of seven methods. *Statistics in Medicine*, 17: 857-872.
