Notes: For 1913-1957, data were reported for civilian cases only. From 1958 to the present, case counts include both civilian and military cases.

Congenital syphilis incidence rates are per 100,000 live births. The Modified Kaufman Criteria were used through 1989. The CDC Case Definition (MMWR 1989; 48: 828) was used effective January 1, 1990. From 1985 to the present year, congenital case counts include only infants under year of age.
