TECHNICAL NOTES FOR SELECTED CALIFORNIA REPORTABLE DISEASES PROVISIONAL MONTHLY SUMMARY REPORT:

In interpretation of the numbers in this report, please consider the following points:

- * Because of inherent delays in case reporting and depending on the length of follow-up clinical, laboratory and epidemiologic investigation, cases with estimated onset dates may be added or rescinded after the date of this report. Therefore, data in this report, particularly for the more recent months, are provisional and may differ from data published in future reports.
 - ** Estimated onset date is the date closest to the time when symptoms first appeared. Since date of onset may not be recorded, the estimated onset date can range from the date of first appearance of symptoms to the date the report was made to California Department of Public Health (CDPH).
 - *** Because some diseases may be counted in more than one category, and because subcategories may be totaled, the sum of each column may not equal the total found in the Total row.
-
- (1) Where applicable a case of Hemolytic Uremic Syndrome may also be reported as "E. COLI / STEC."
 - (2) Staphylococcus aureus infection (only a case resulting in death or admission to an intensive care unit of a person who has not been hospitalized or had surgery, dialysis, or residency in a long-term care facility in the past year, and did not have an indwelling catheter or percutaneous medical device at the time of culture).
