### CRDP Phase II

The focus of Phase II will be on demonstrating the effectiveness of community-defined evidence in reducing mental health disparities. CRDP Phase II is a multi-component program, funding selected approaches across the five CRDP-targeted populations with strong evaluation, technical assistance, and infrastructure support components.

After successful completion of this multiyear investment in community-defined evidence, California will be in a position to better serve these communities and to provide the state, and the nation, a model to replicate the new strategies, approaches, and knowledge.
