This table describes the volume, timeliness, and disposition of relicensure surveys of long-term care (LTC) facilities. California Health and Safety Code section 1279 specifies that LTC relicensure surveys should be conducted no less than once every two years and as often as necessary to ensure the quality of care being provided. The Intermediate Care Facility-DD-H/N/CN category above includes ICF-DD-Habilitative (H), ICF-DD-Nursing (N), ICF-DD-Continuous Nursing (CN). (ICF-Individuals with Intellectual Disabilities (ICF-IID) facility classification is a certification category only.)

**Table Notes:**

- Column A shows the annualized number of licensed LTC facilities that are due for a re-licensure survey during the SFY, by facility type. This includes distinct part facilities. As all LTC facilities should receive a relicensure survey no less than every two years, the "annualized" number represents half of the total number of licensed facilities. The total count may not match the sum by facility types due to rounding.
- Column B shows the cumulative number of facilities surveyed from the beginning of the reporting period (July 1) through the end of the SFY quarter being reported (data source: Automated Survey Processing Environment [ASPEN]).
- Column C shows the percentage of surveys due by close of the SFY that were completed through close of the reporting period.
- Column D shows the total number of deficiencies (violations of statutory or regulatory requirements) issued for surveys. Licensing and Certification Program's Field Operations may identify one or more deficiencies in the course of a survey. This is a preliminary count.
- Column E shows the average number of deficiencies issued per survey. Some facilities may be surveyed more than once per reporting period.
