

# Substance Use

Nichole Quick, MD, MPH  
CCLHO Semi-Annual Meeting  
October 7, 2016

- <http://theunboundspirit.com/drugs-don't-cause-addiction-this-short-animated-video-will-change-your-view-on-drugs-forever/>

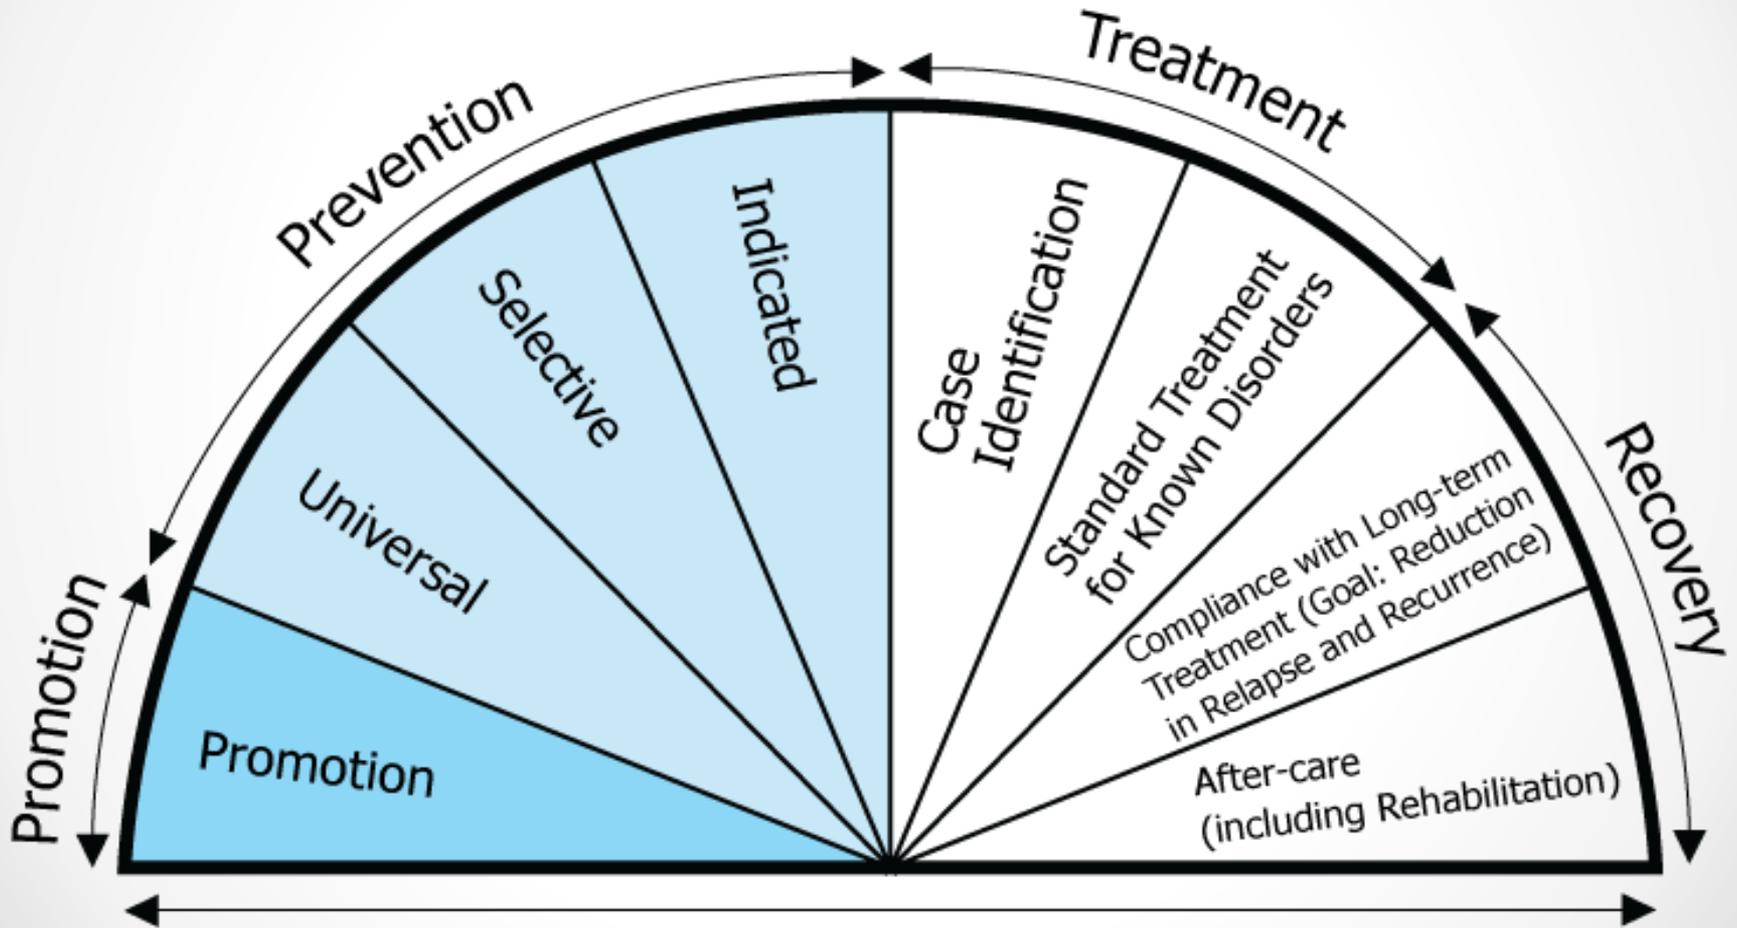

- By 2020, mental and substance use disorders will surpass all physical disease as a major cause of disability worldwide (SAMHSA)

Criminal  
Justice

Health Based  
Approach

# Continuum of Care

# Promotion

- Strategies to create environments and conditions to support behavioral health and the **ability of individuals to withstand challenges**

# Prevention

- Interventions delivered **prior to the onset of a disorder**
- Intended to **prevent or reduce the risk of developing** a behavioral health problem

# Treatment

- **Services provided to people diagnosed** with a substance use/other behavioral health disorder

# Recovery

- Service provided to individuals **to support ability to live a productive life**

# Factors

- Biological, psychological characteristics that make a person vulnerable or resilient
- Factors are present in relationships, communities, society
- Risk:
  - ACE
  - Lack of employment
  - Lack of economic opportunity
  - Role model use of drugs
  - Norms favorable to substance use
- Protective:
  - Resilience
  - Positive self-image
  - Social competence
- - Parental involvement

# Group Discussion

	What's working	Where do you need help
Community Violence		
Homelessness		
Substance use/behavioral health interventions		
Other community based interventions
