

Regional Chapters

California School Garden Network Regional Chapters are local networks of people and organizations supporting Garden-Based Learning.

The Regional Chapters may differ in the ways they meet and network, but they all provide:

- ☼ Regional Chapter meetings for various people and organizations to come together to help support their local school gardens,
- ☼ An email distribution list that keeps all members connected between meetings, and
- ☼ A place for those who support the mission of CSGN to get involved locally.
