Important Notice

License Processing Change for Clinical Cytogeneticist Scientist and Clinical Genetic Molecular Biologist Scientist

The California Code of Regulations, Title 17, sections 1031.2 and 1031.3 require applicants for Clinical Cytogeneticist Scientist and Clinical Genetic Molecular Biologist Scientist licensure to successfully pass an examination which is administered by the National Credentialing Agency for Laboratory Personnel (NCA). On October 23, 2009 NCA will be dissolved as a corporation and therefore will no longer be administering examinations.

Laboratory Field Services will not be able to process, until further notice, licensing applications for applicants who have not passed an examination administered by the NCA prior to October 23rd.

Applicants who have passed an NCA examination before October 23rd will continue to have their applications processed.

LFS is working diligently to resolve this situation as soon as possible. Please continue to check this website for current information.
