

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Alameda County

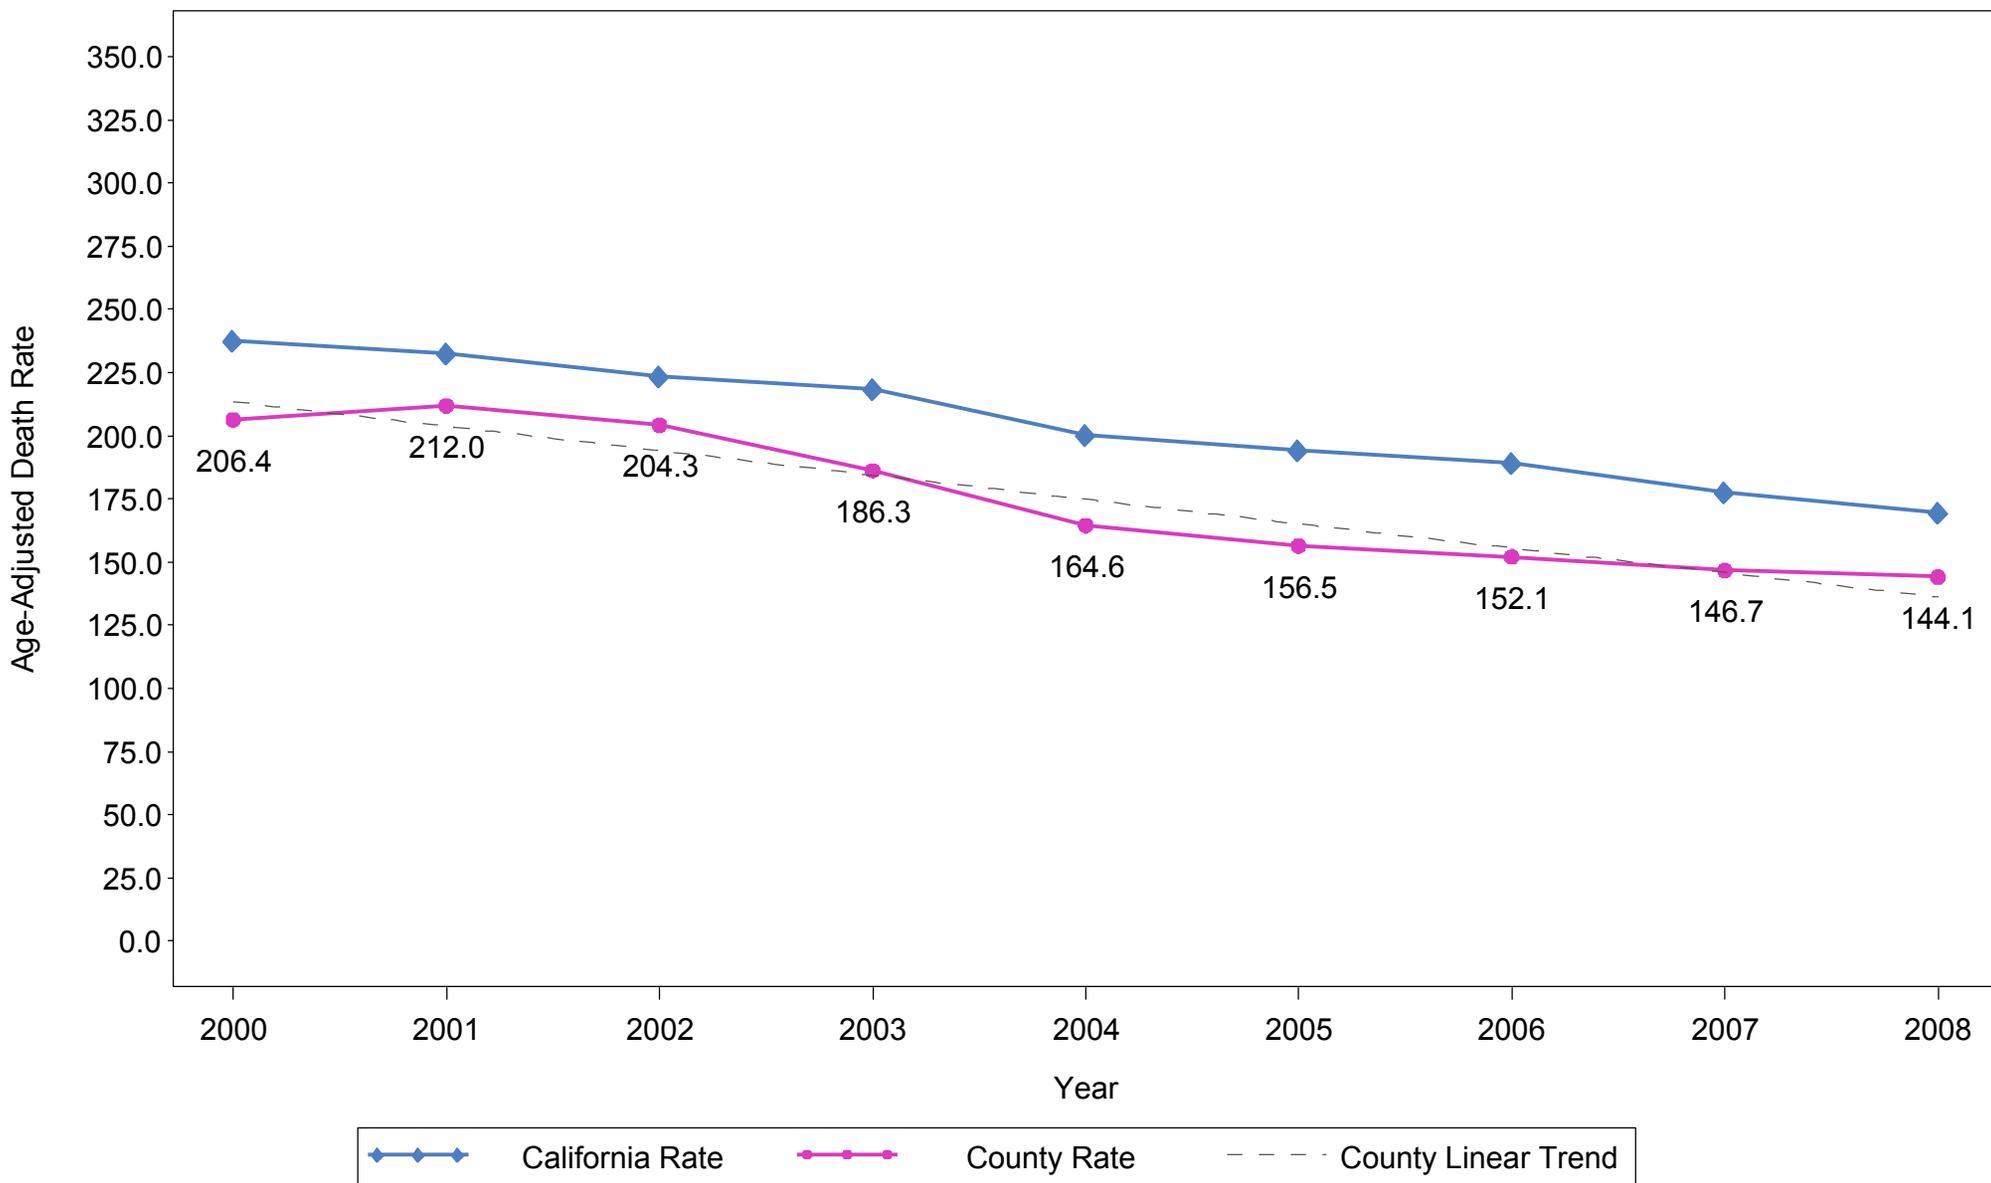

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Contra Costa County

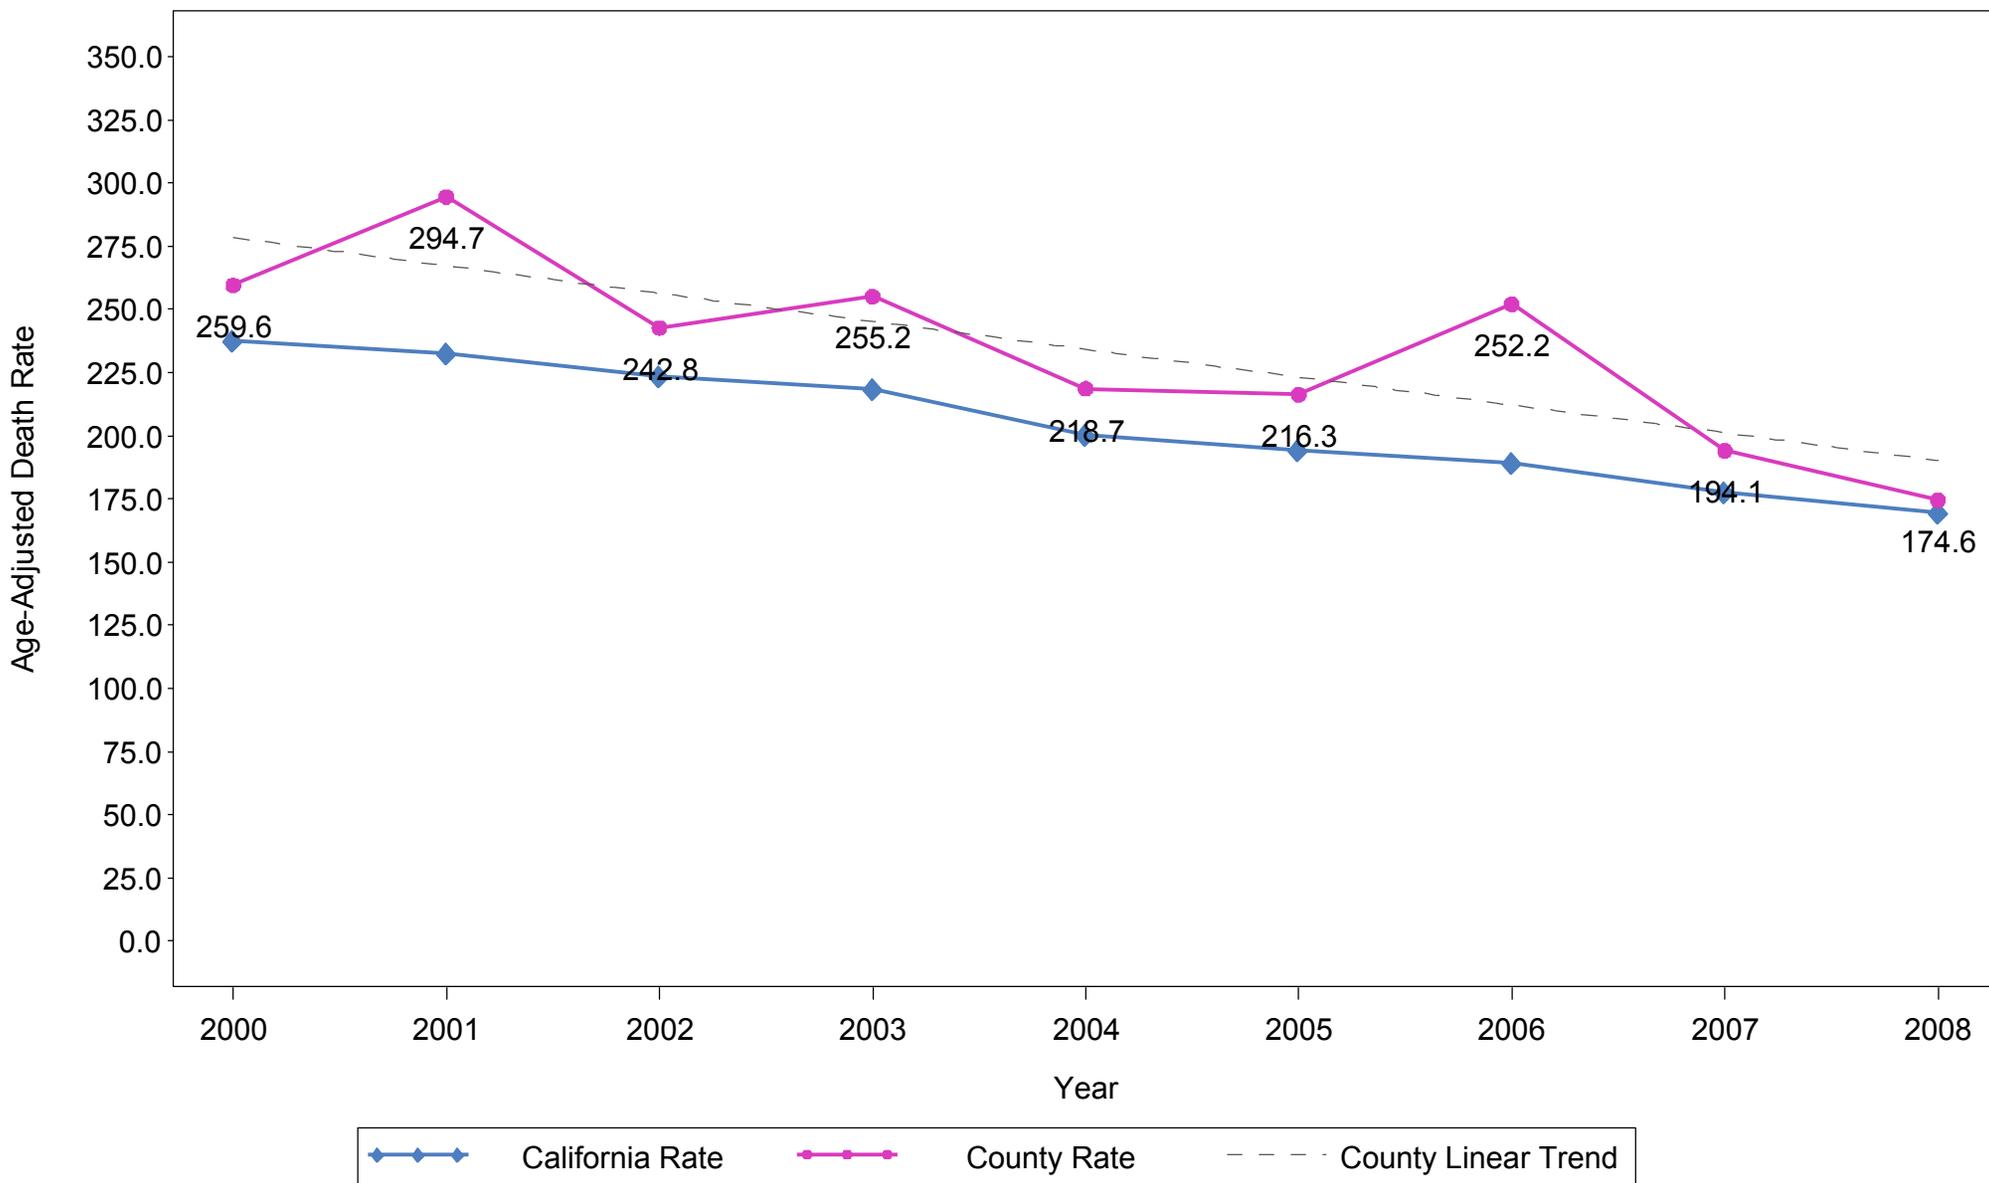

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Del Norte County

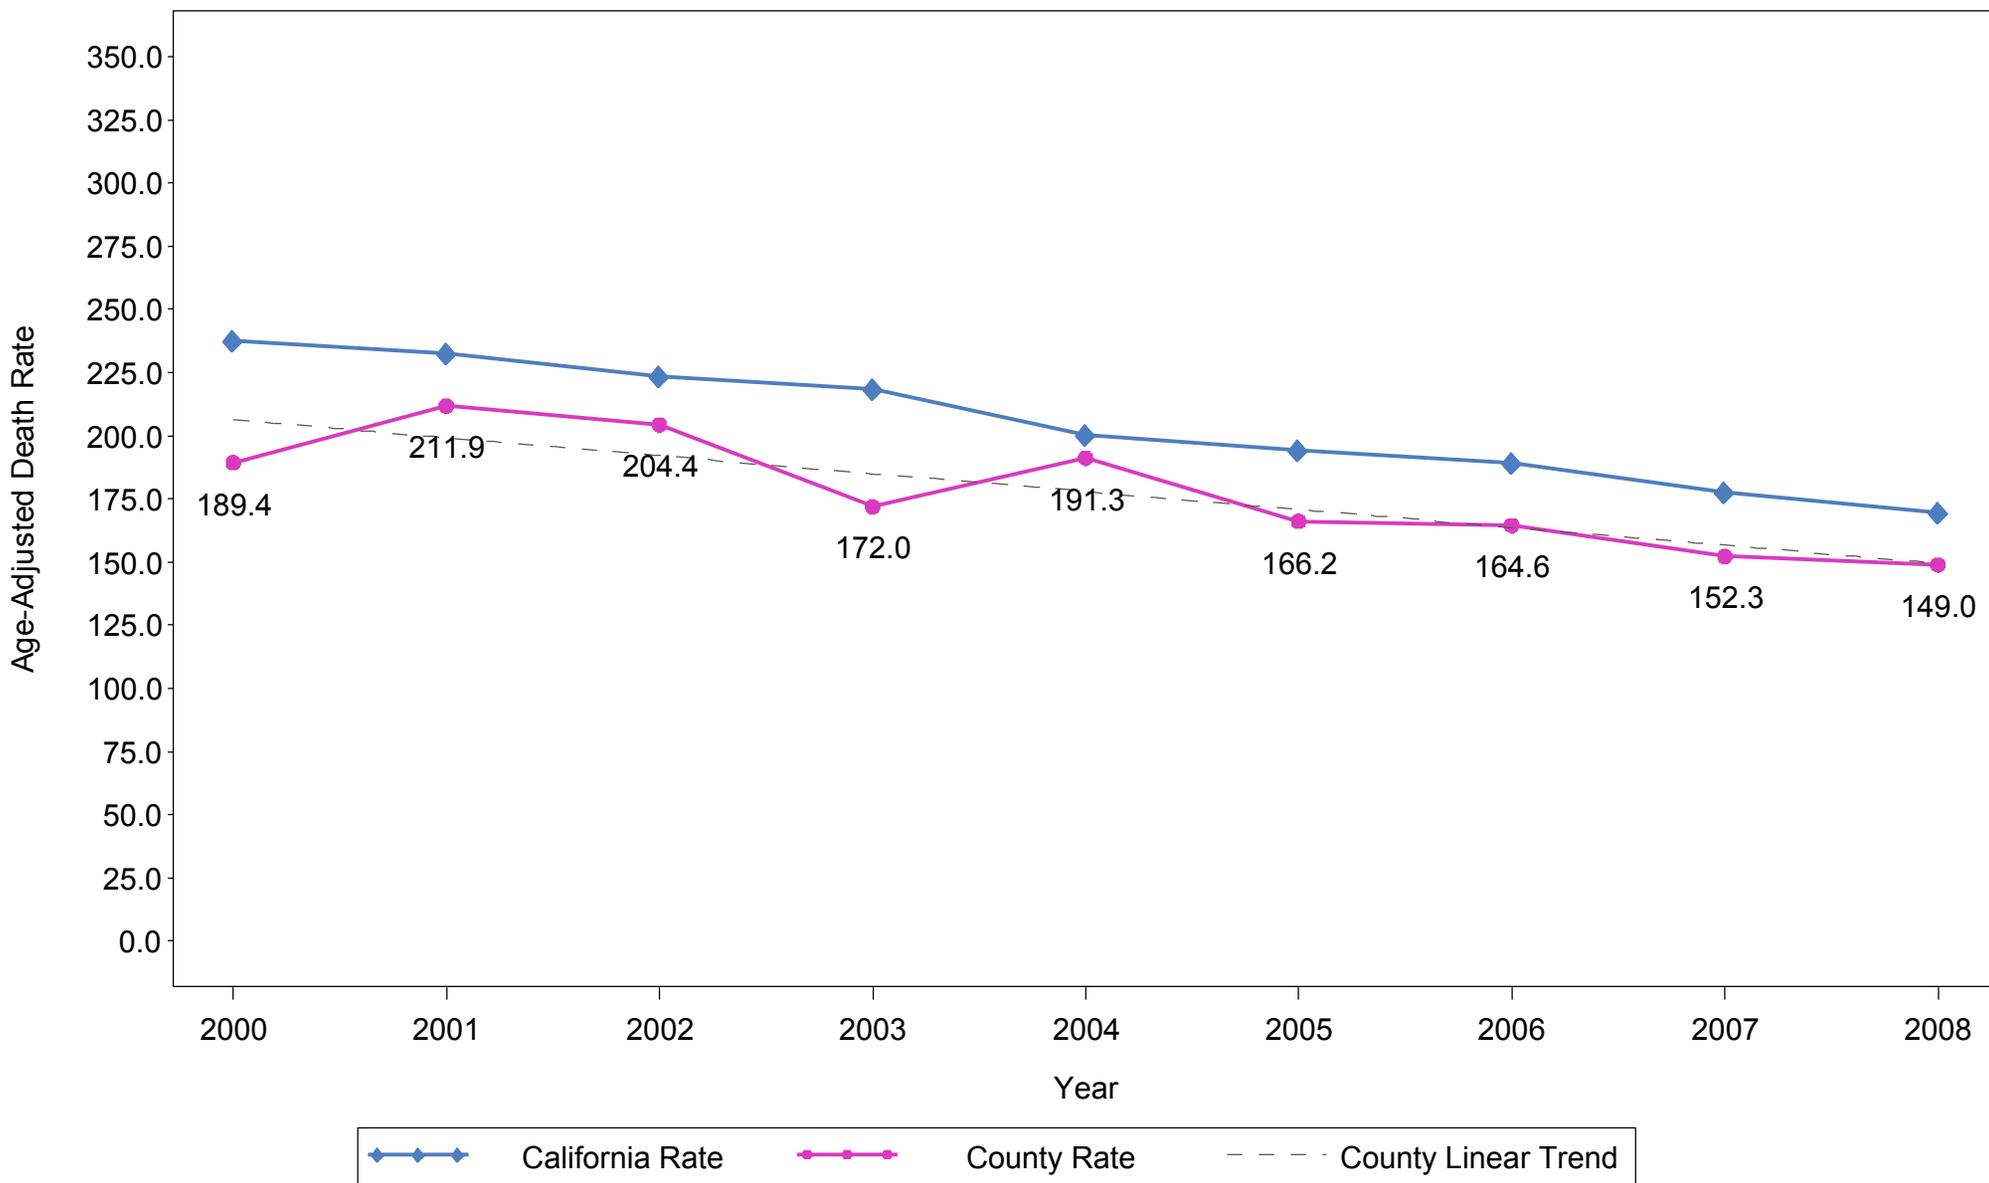

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
El Dorado County

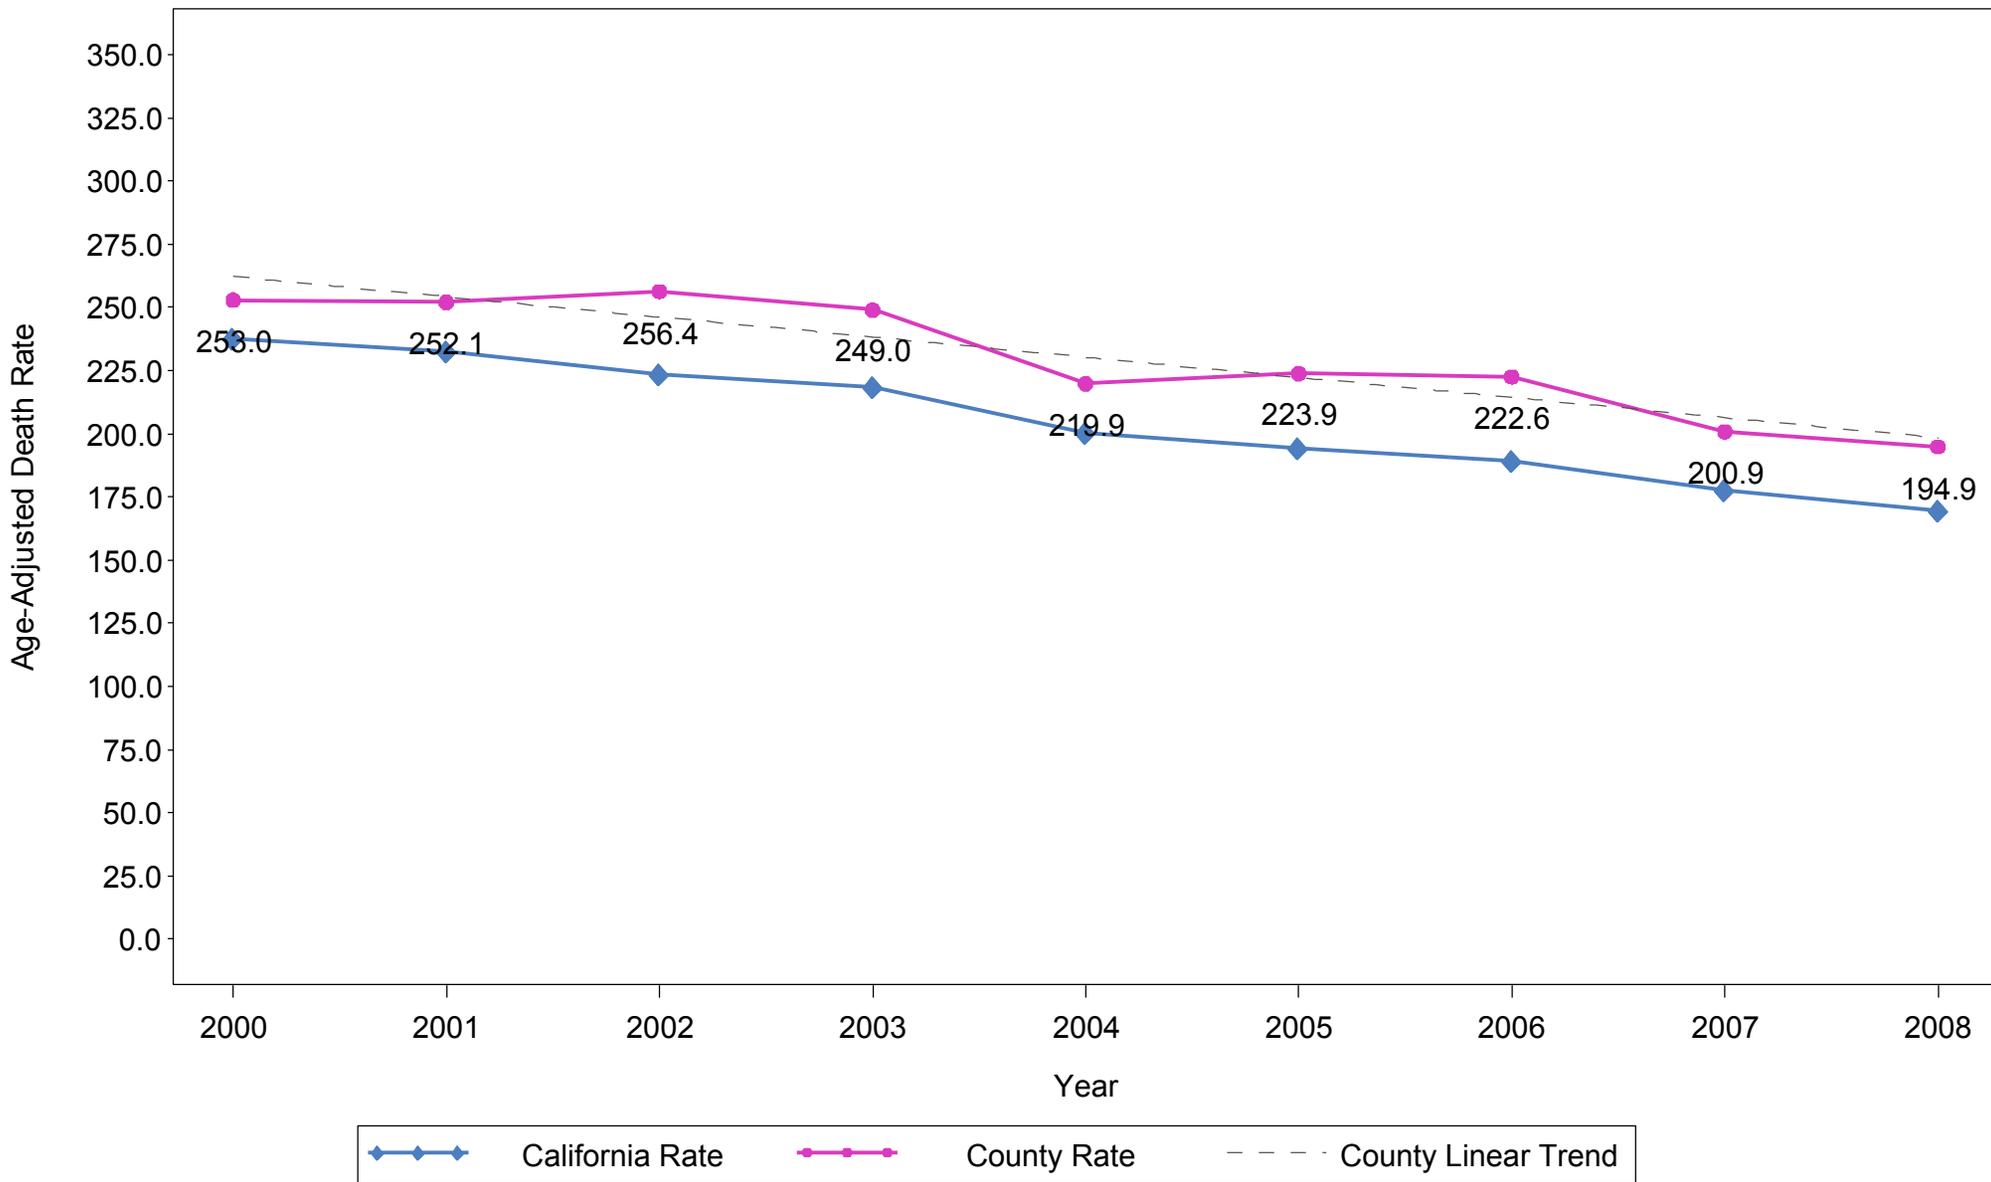

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Fresno County

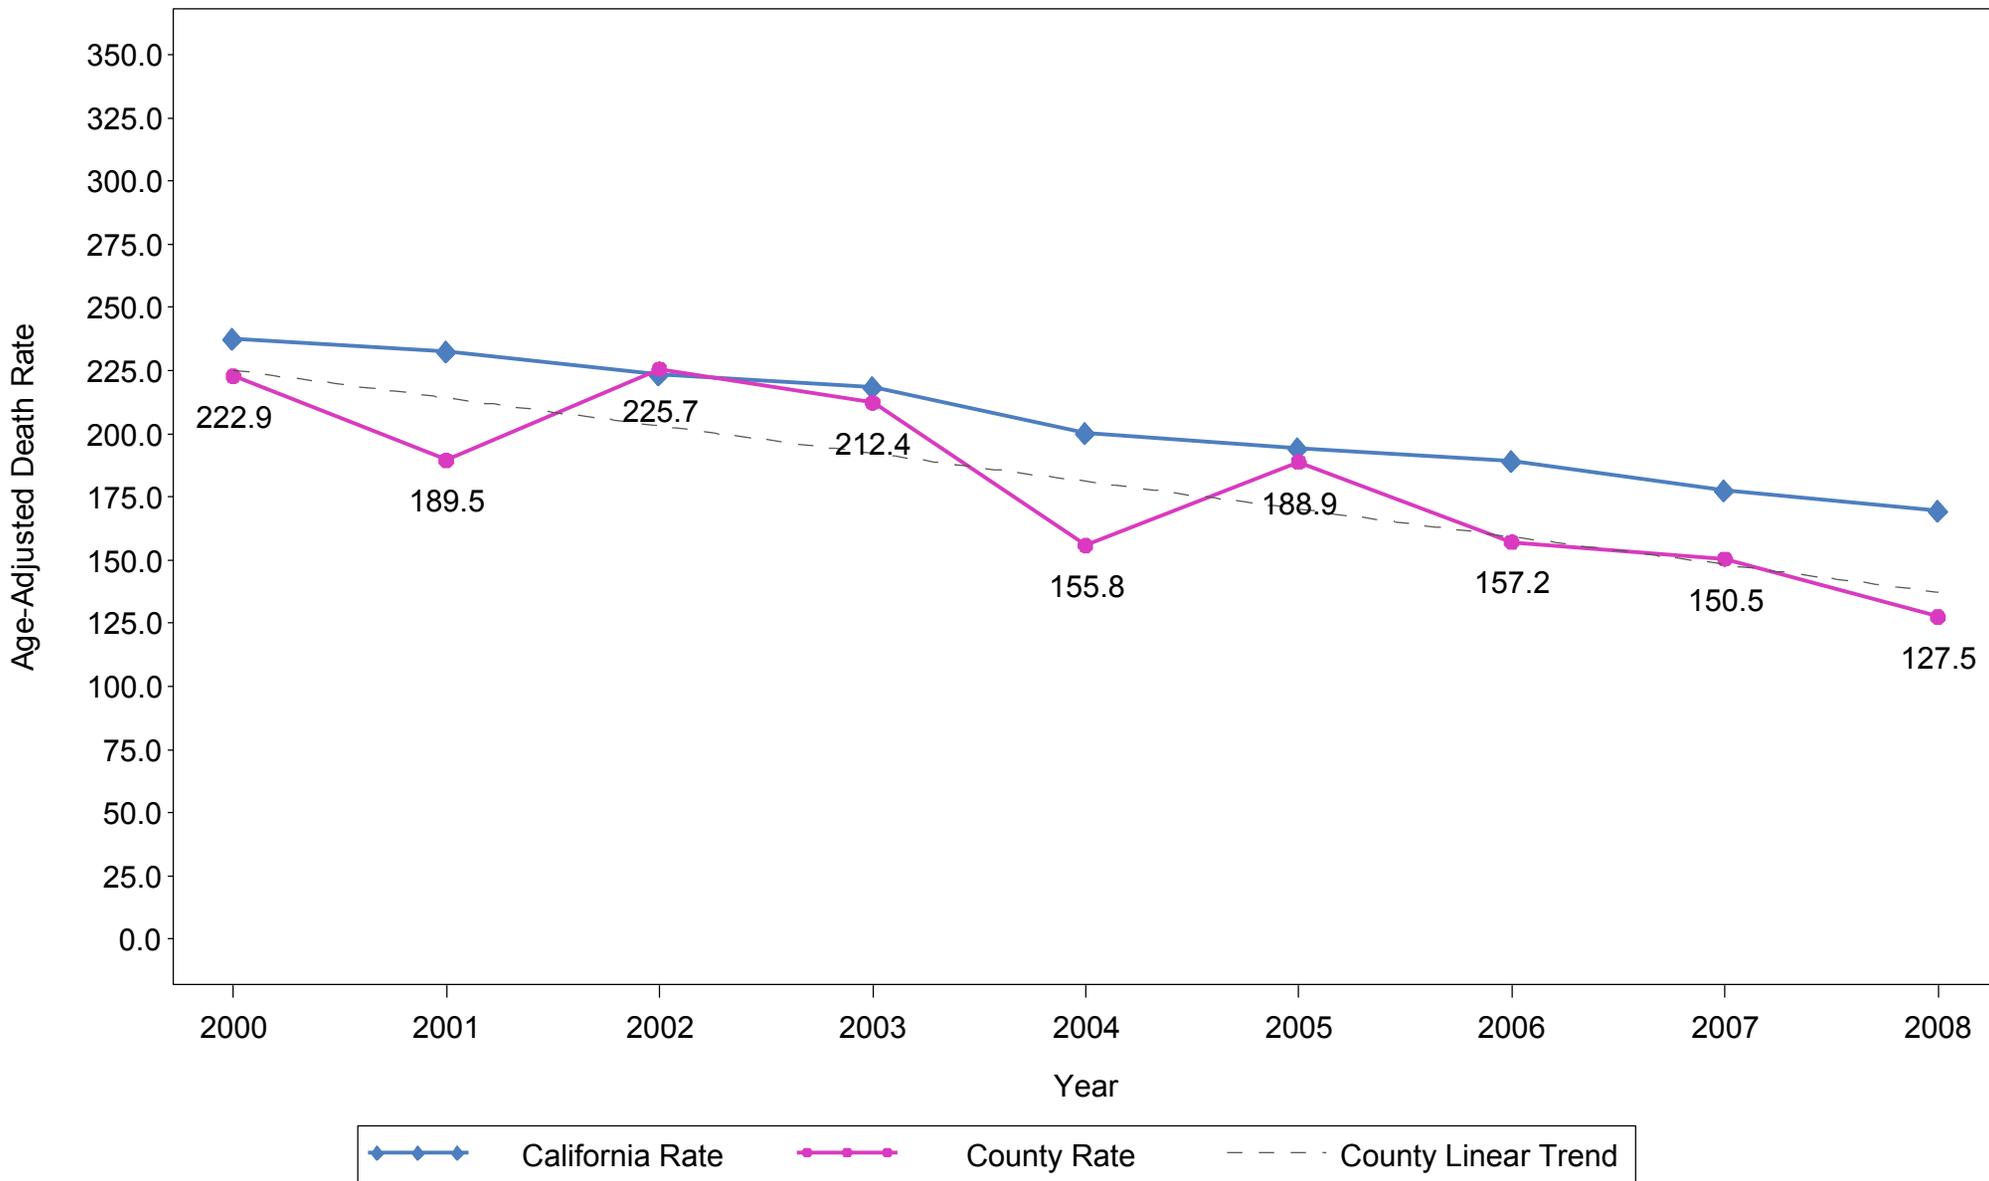

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Imperial County

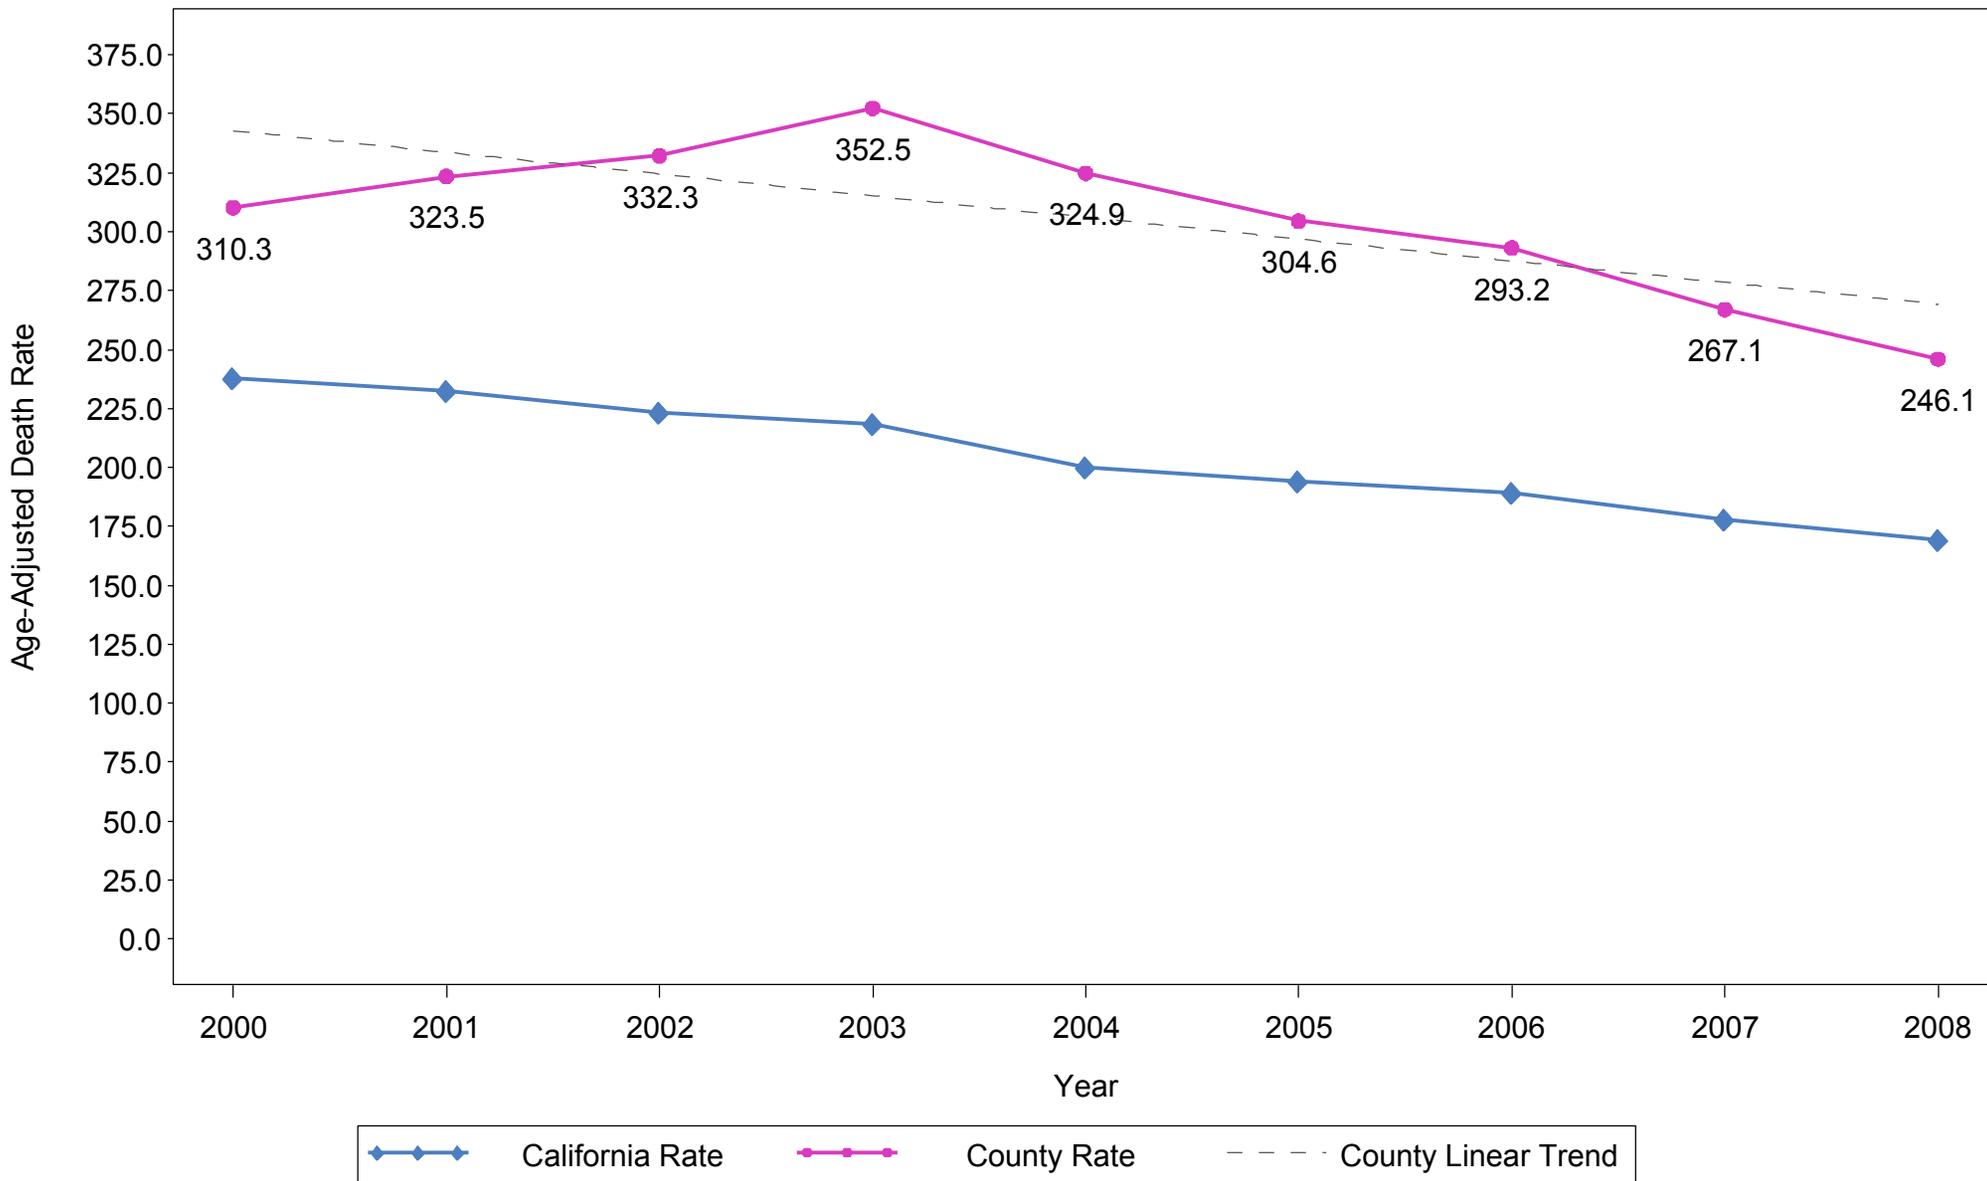

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Kern County

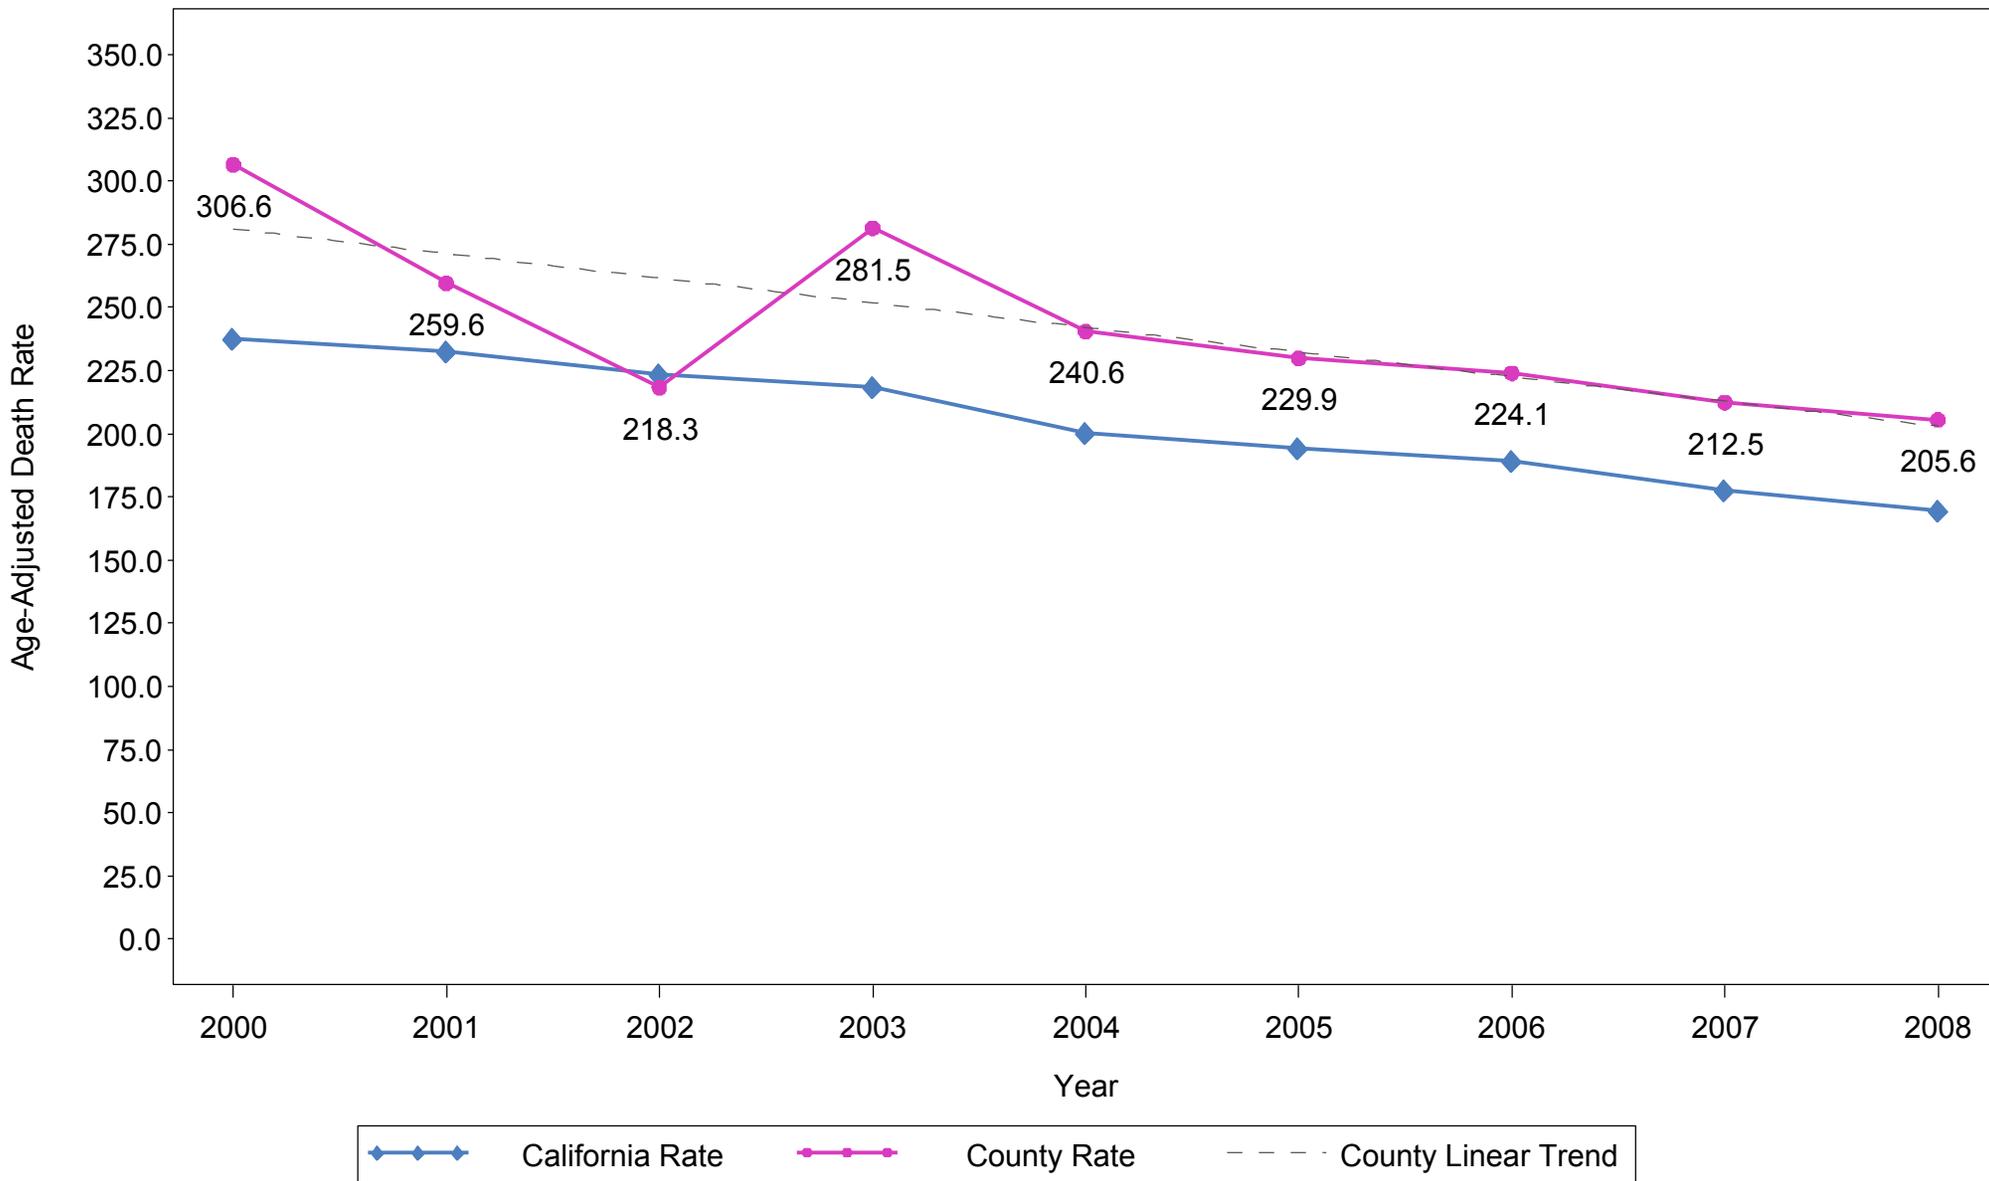

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Lake County

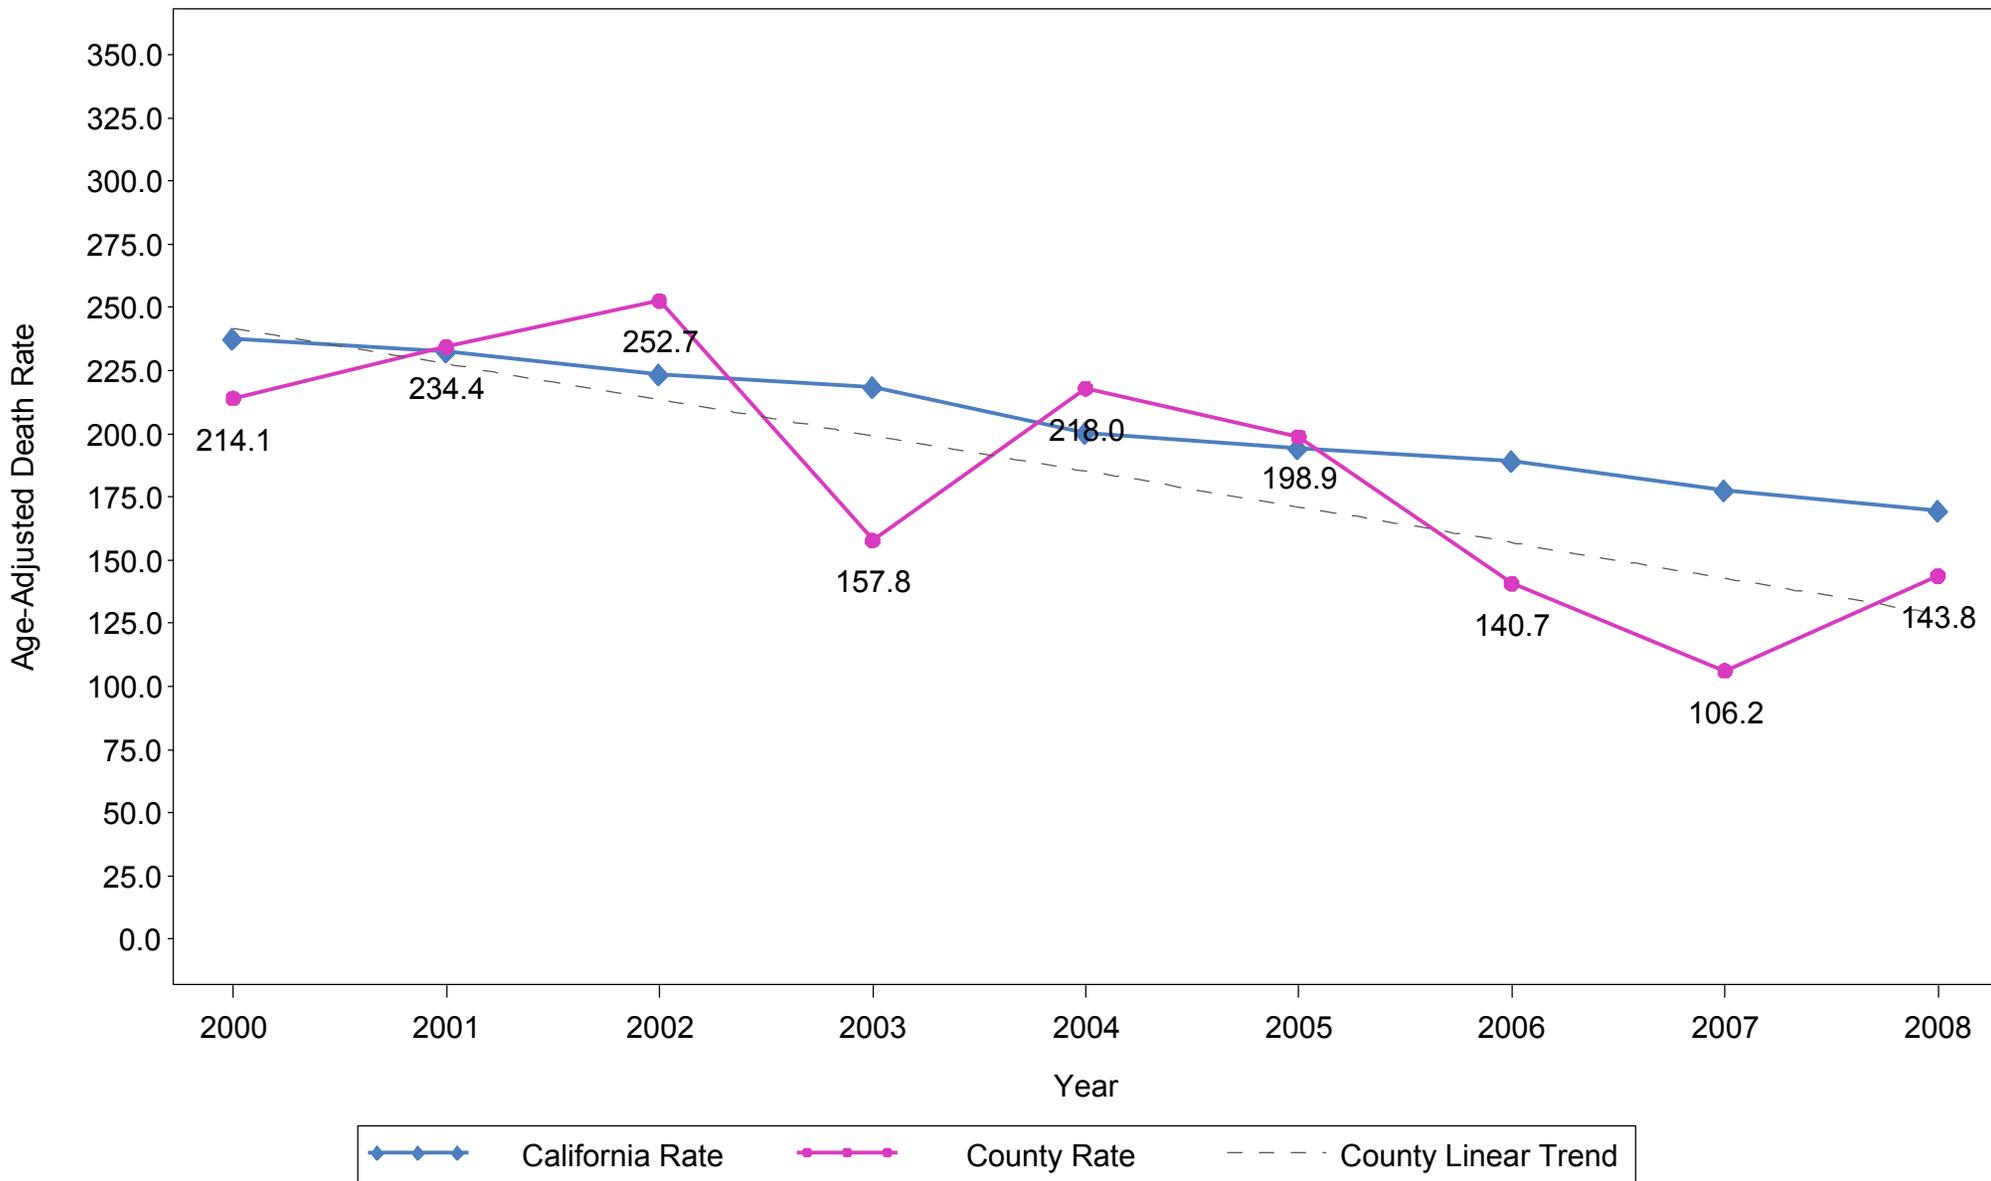

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Lassen County

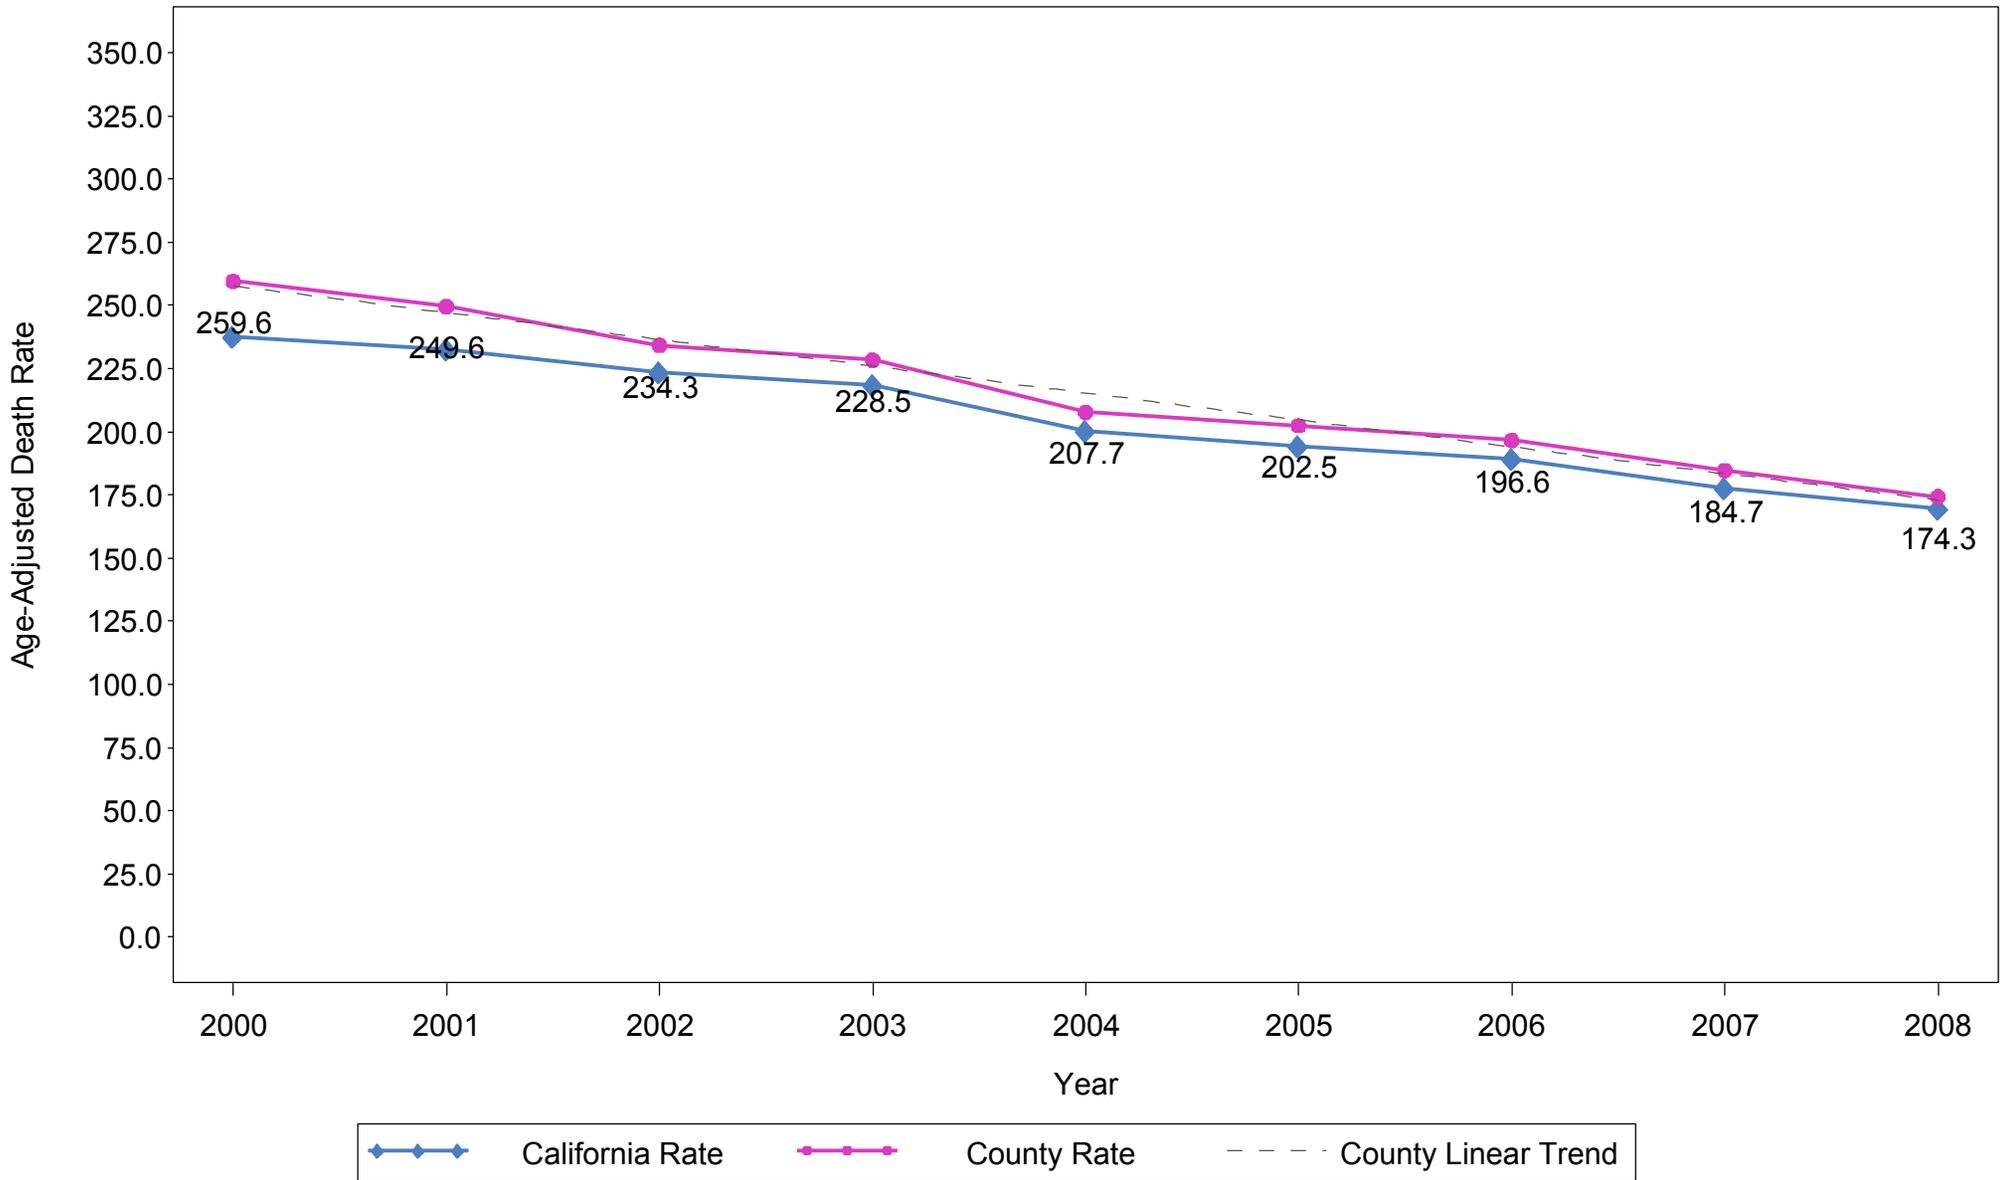

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Los Angeles County

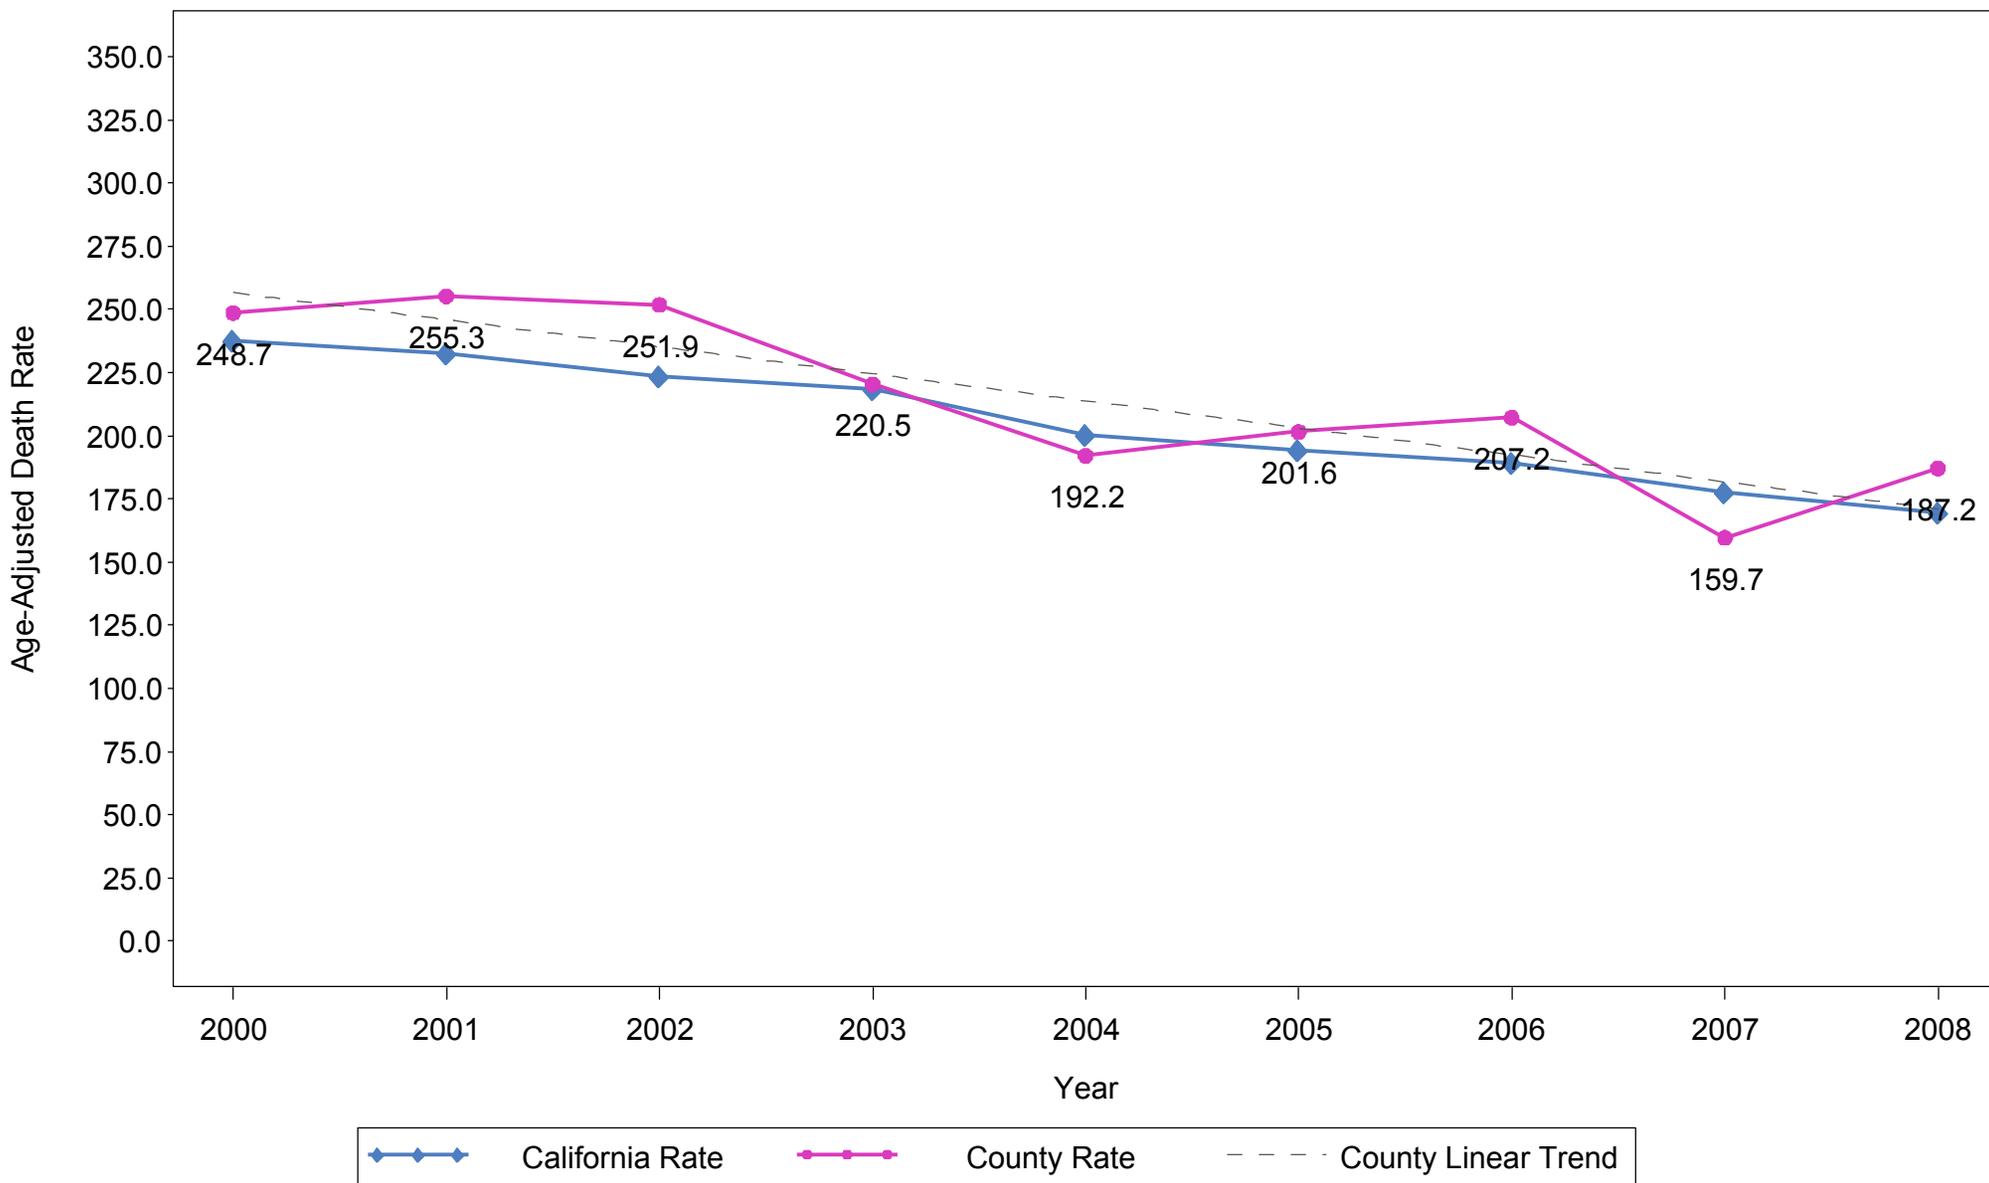

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Madera County

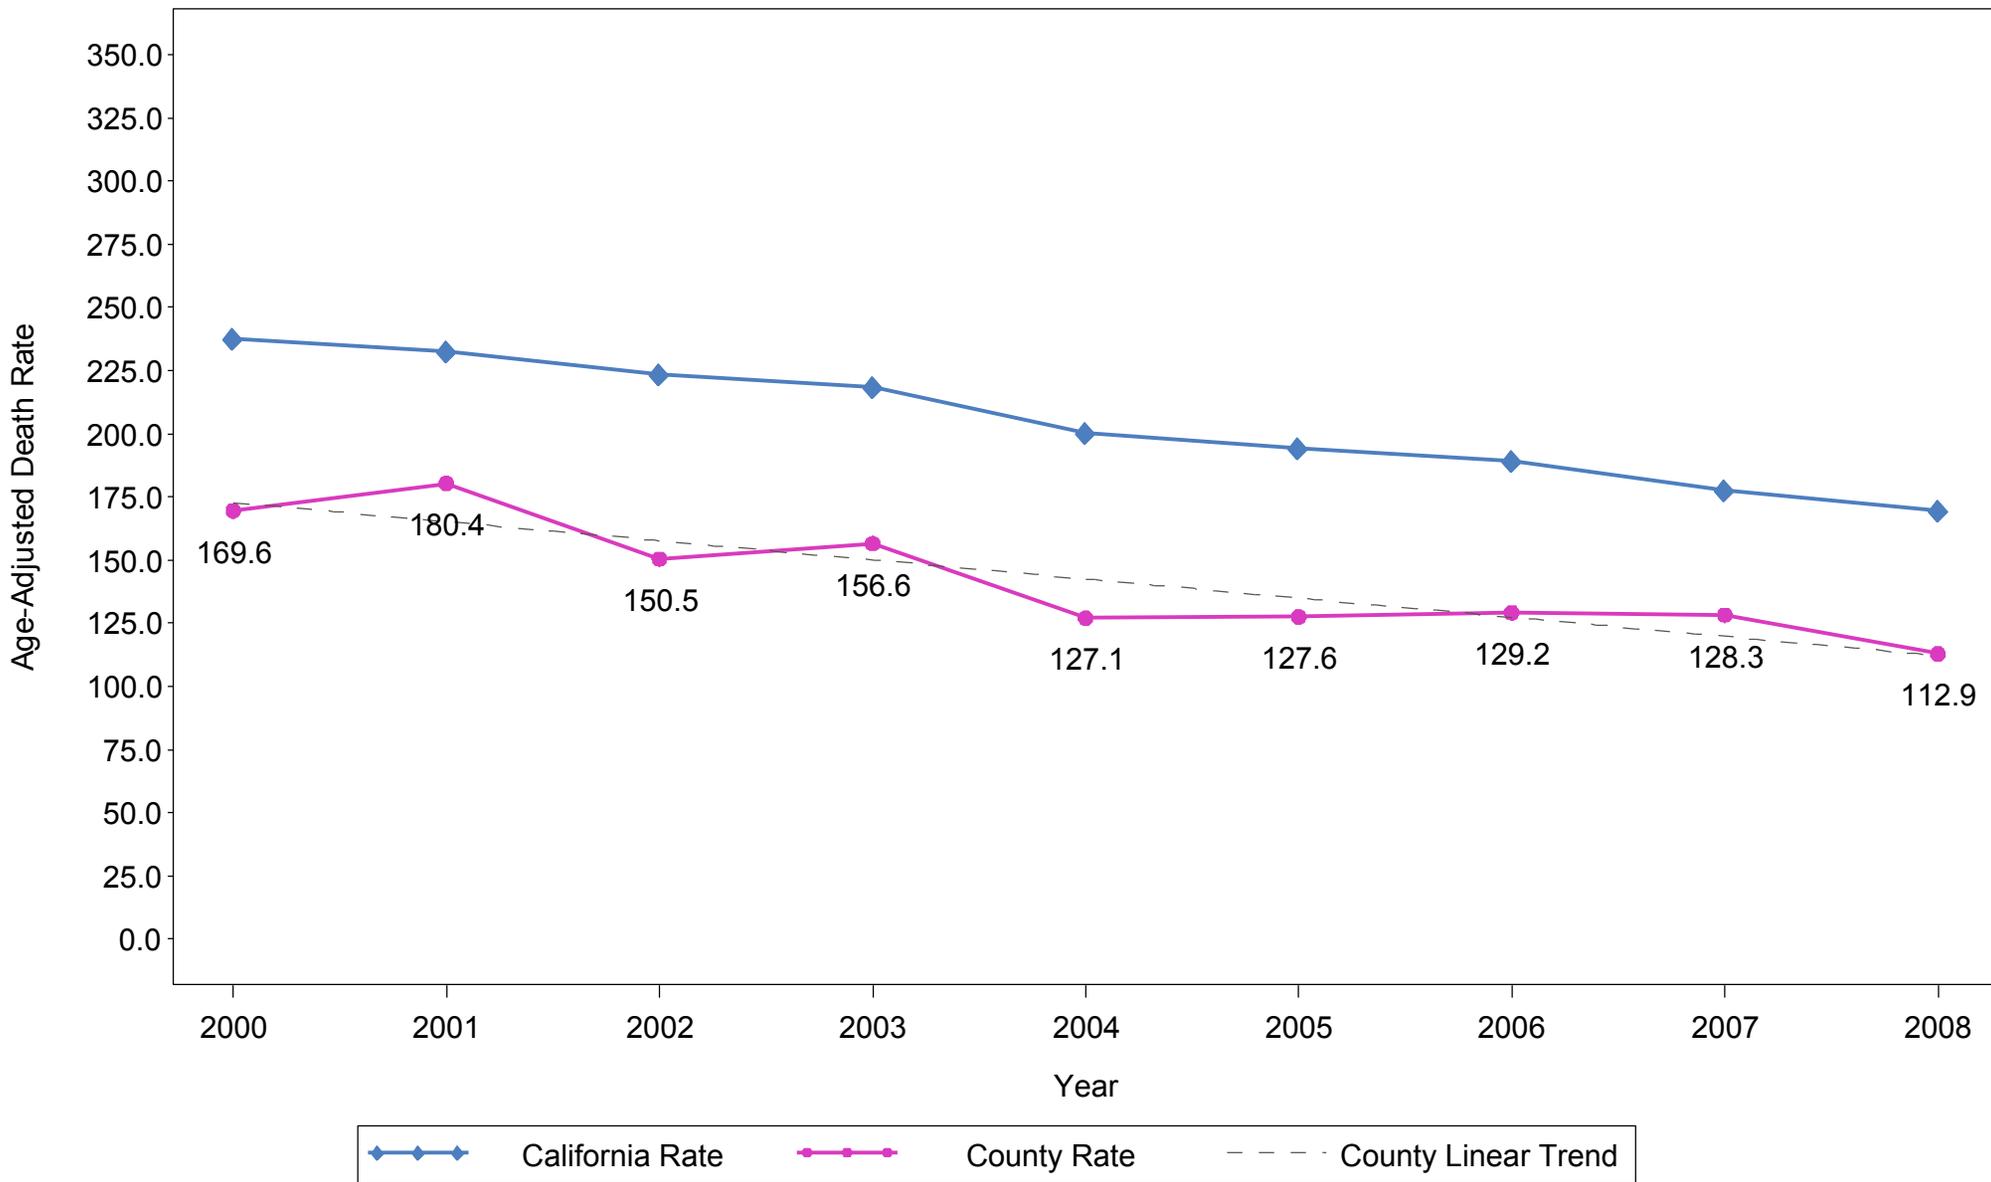

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Marin County

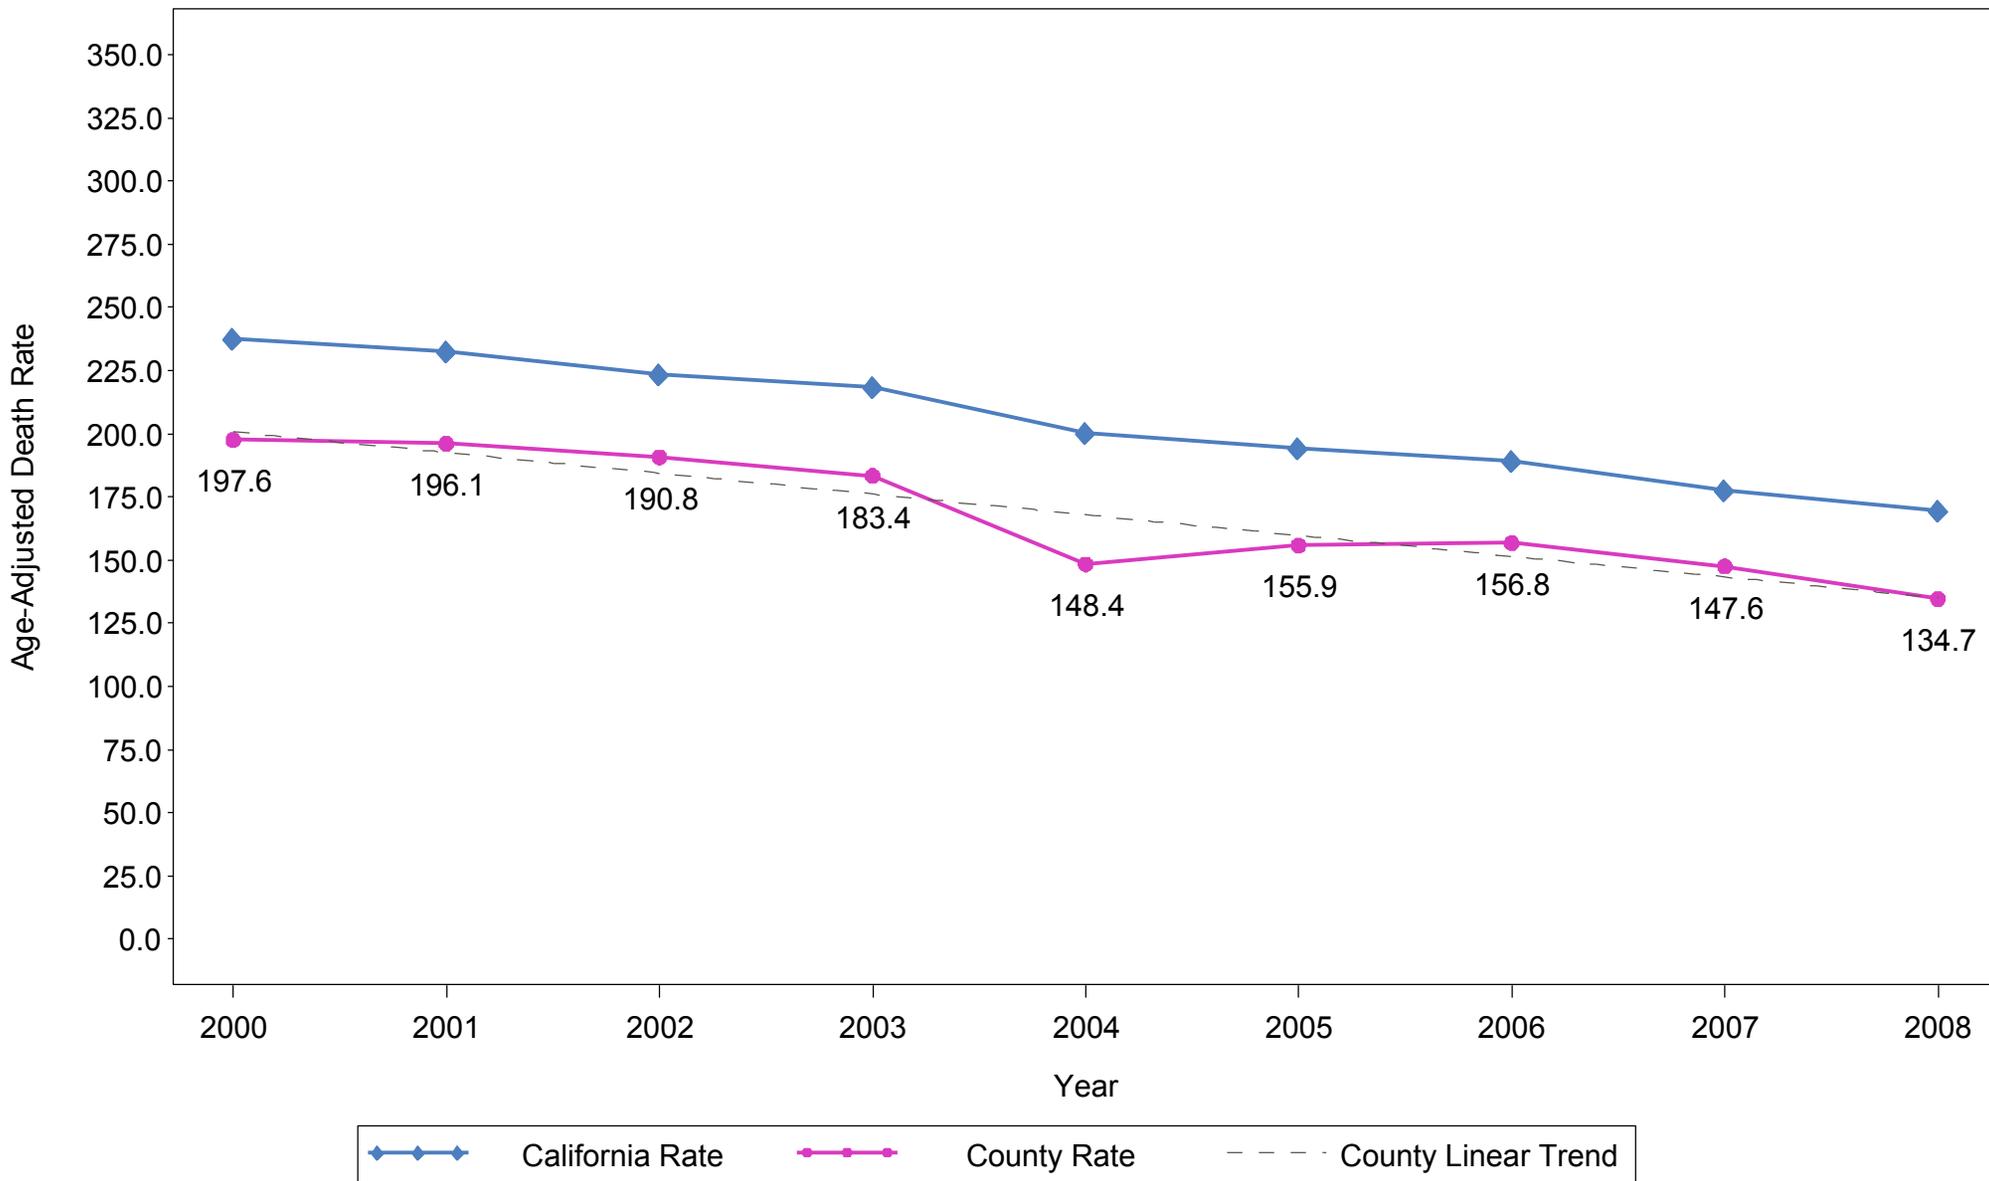

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Monterey County

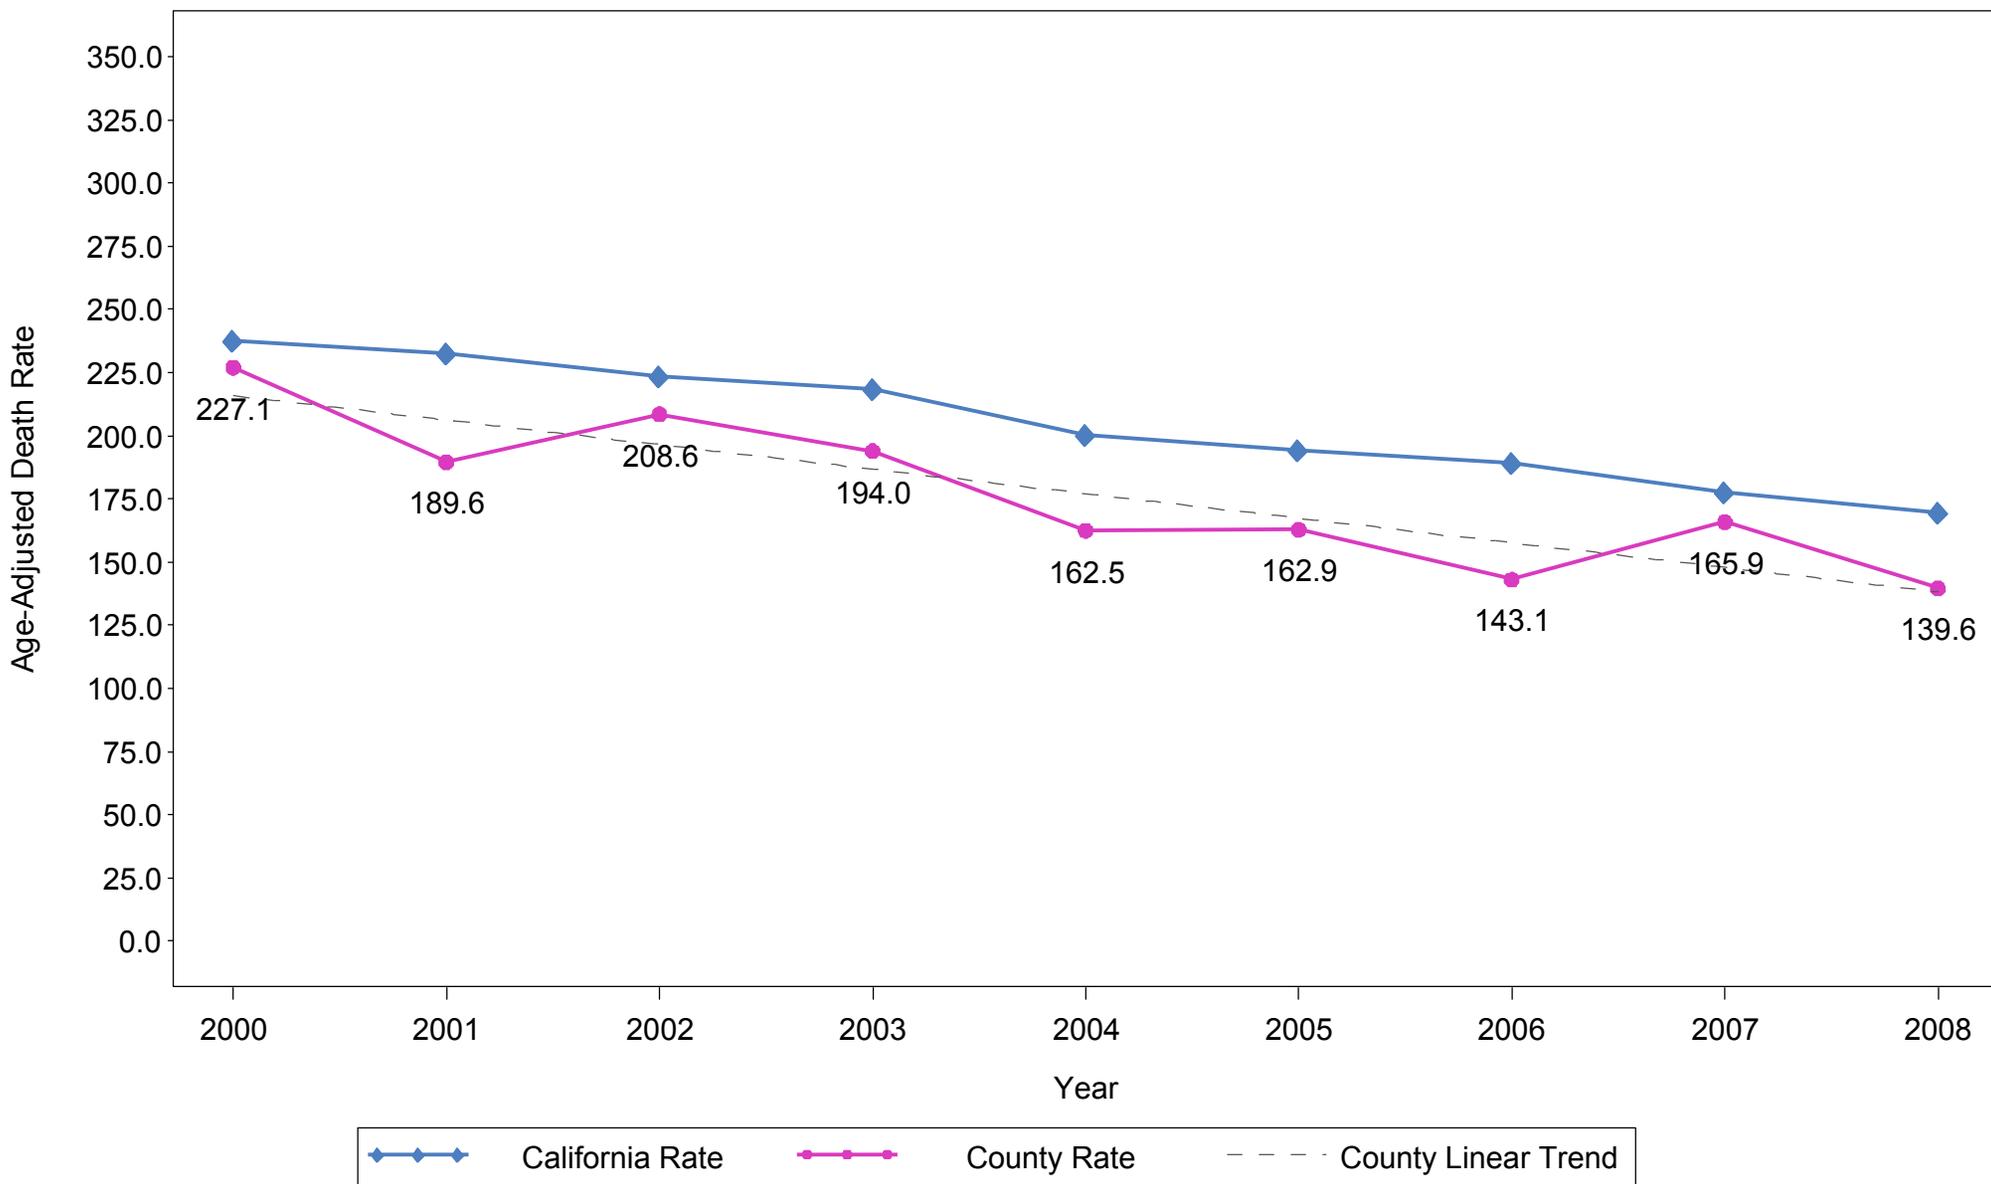

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Napa County

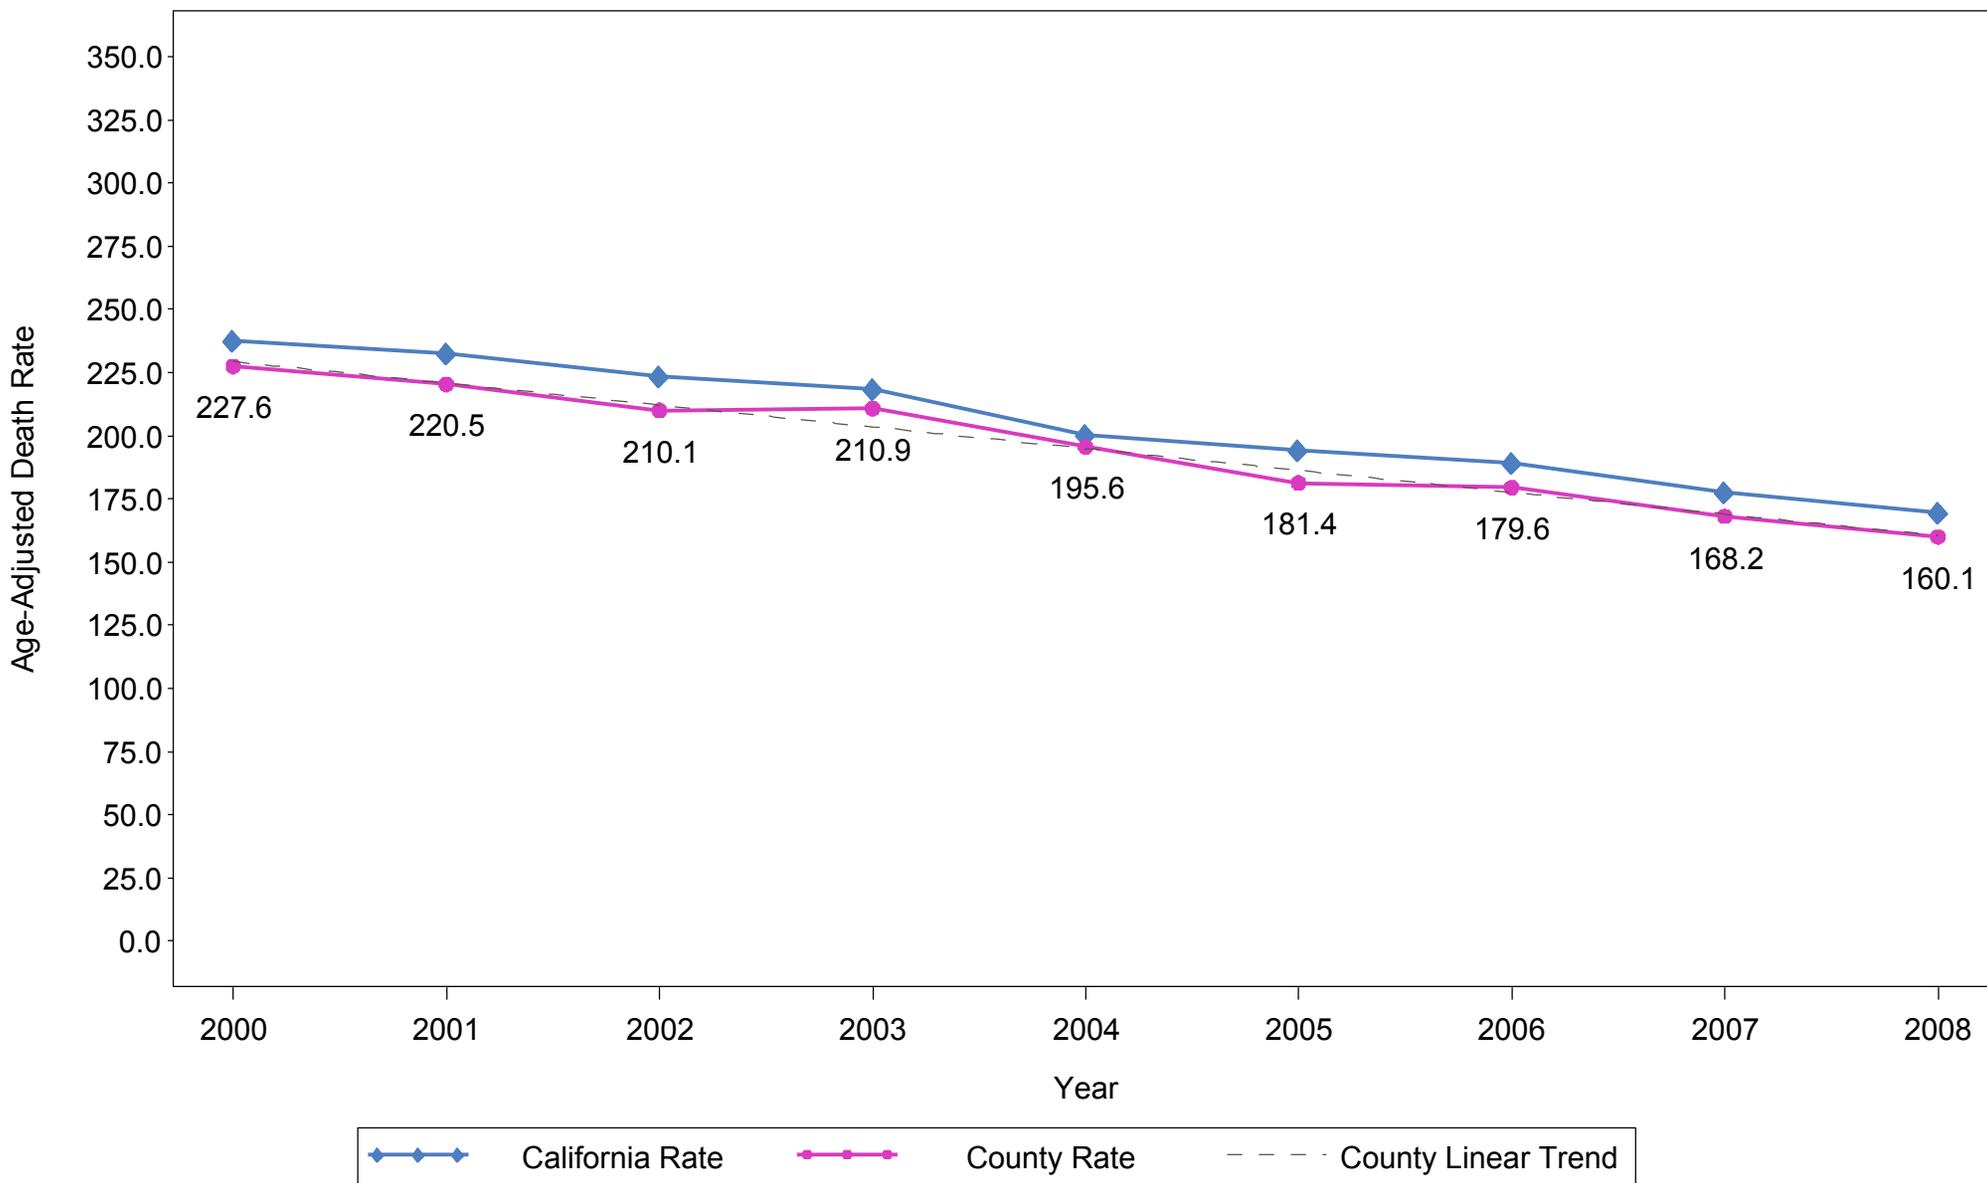

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Orange County

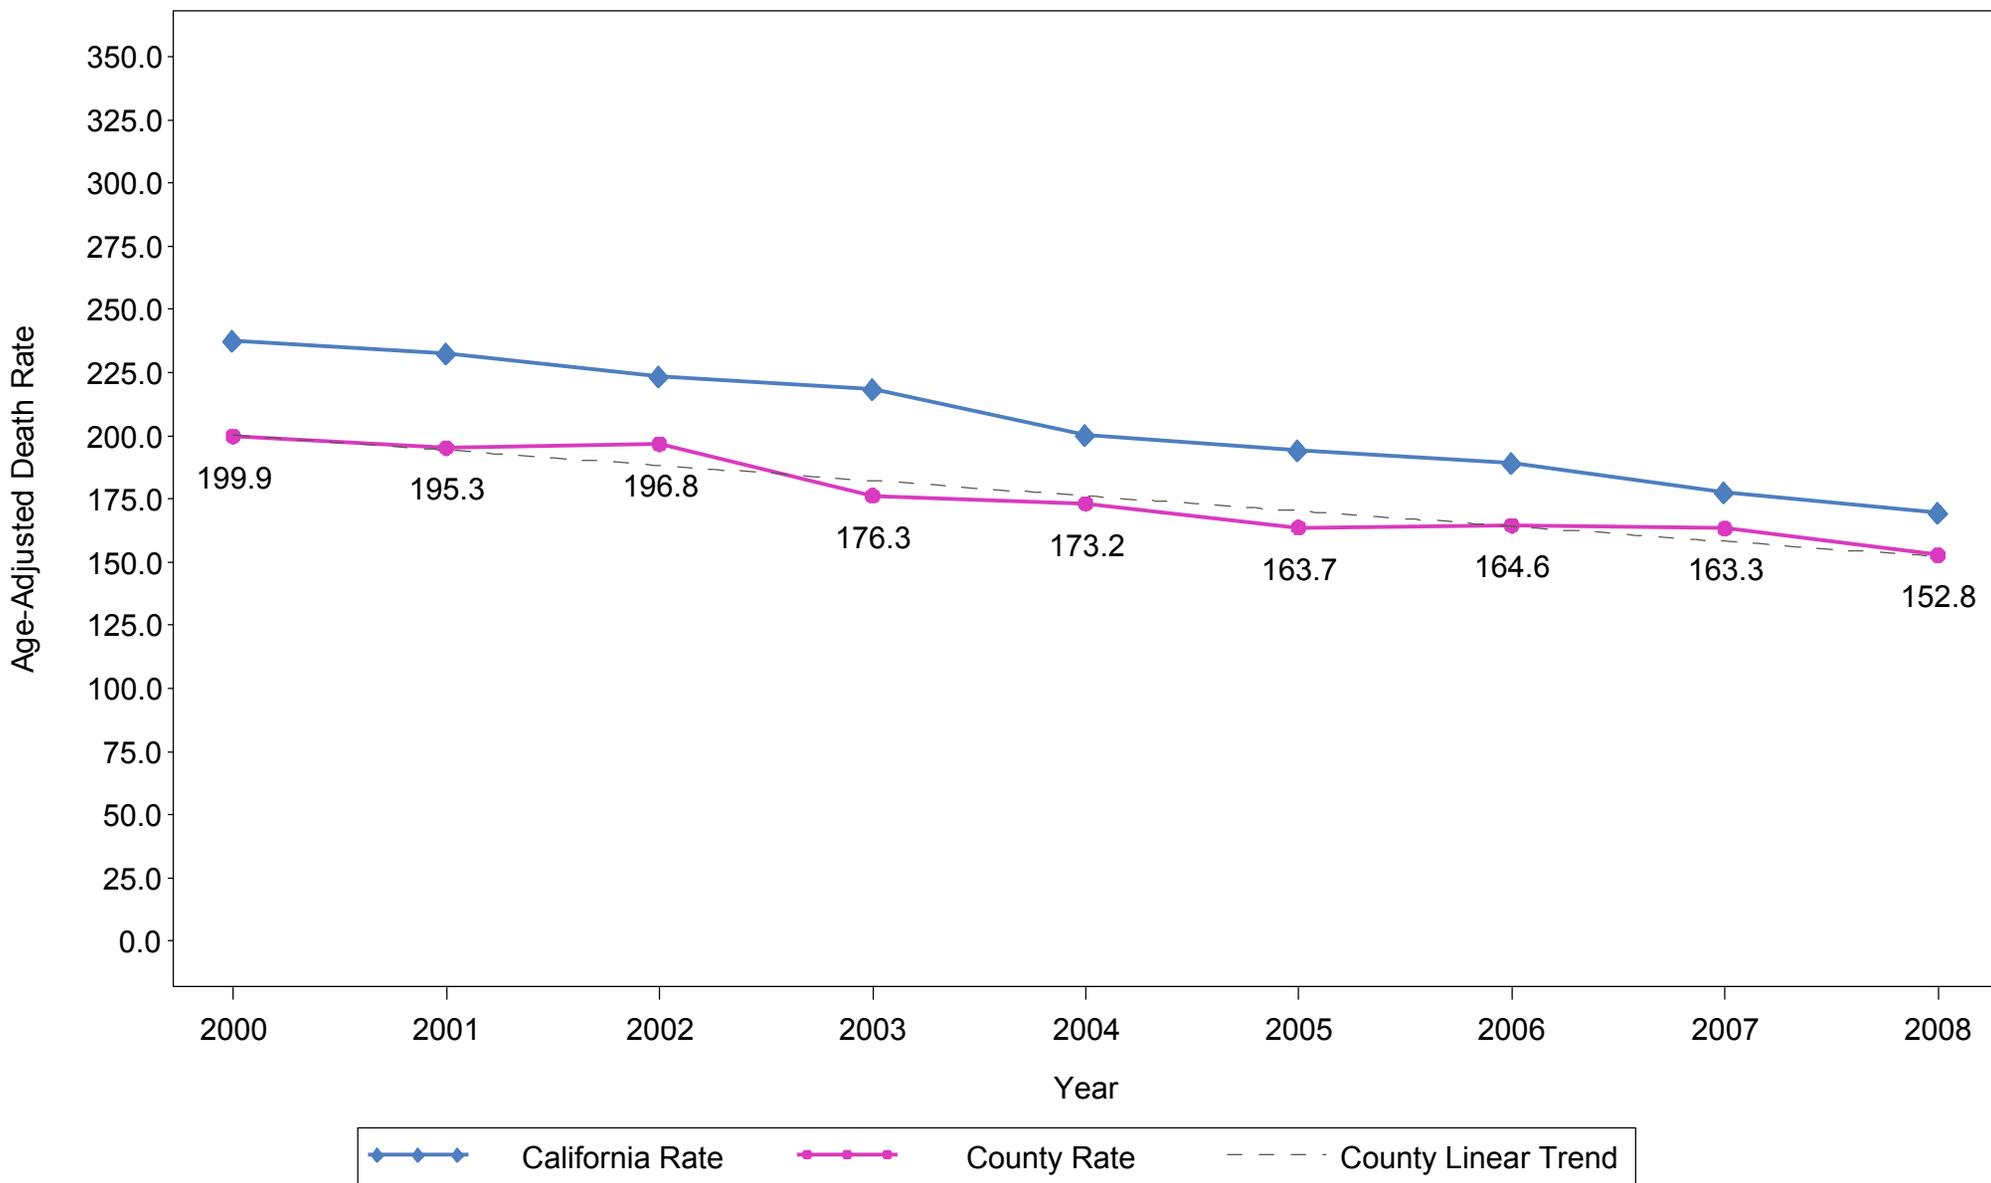

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Placer County

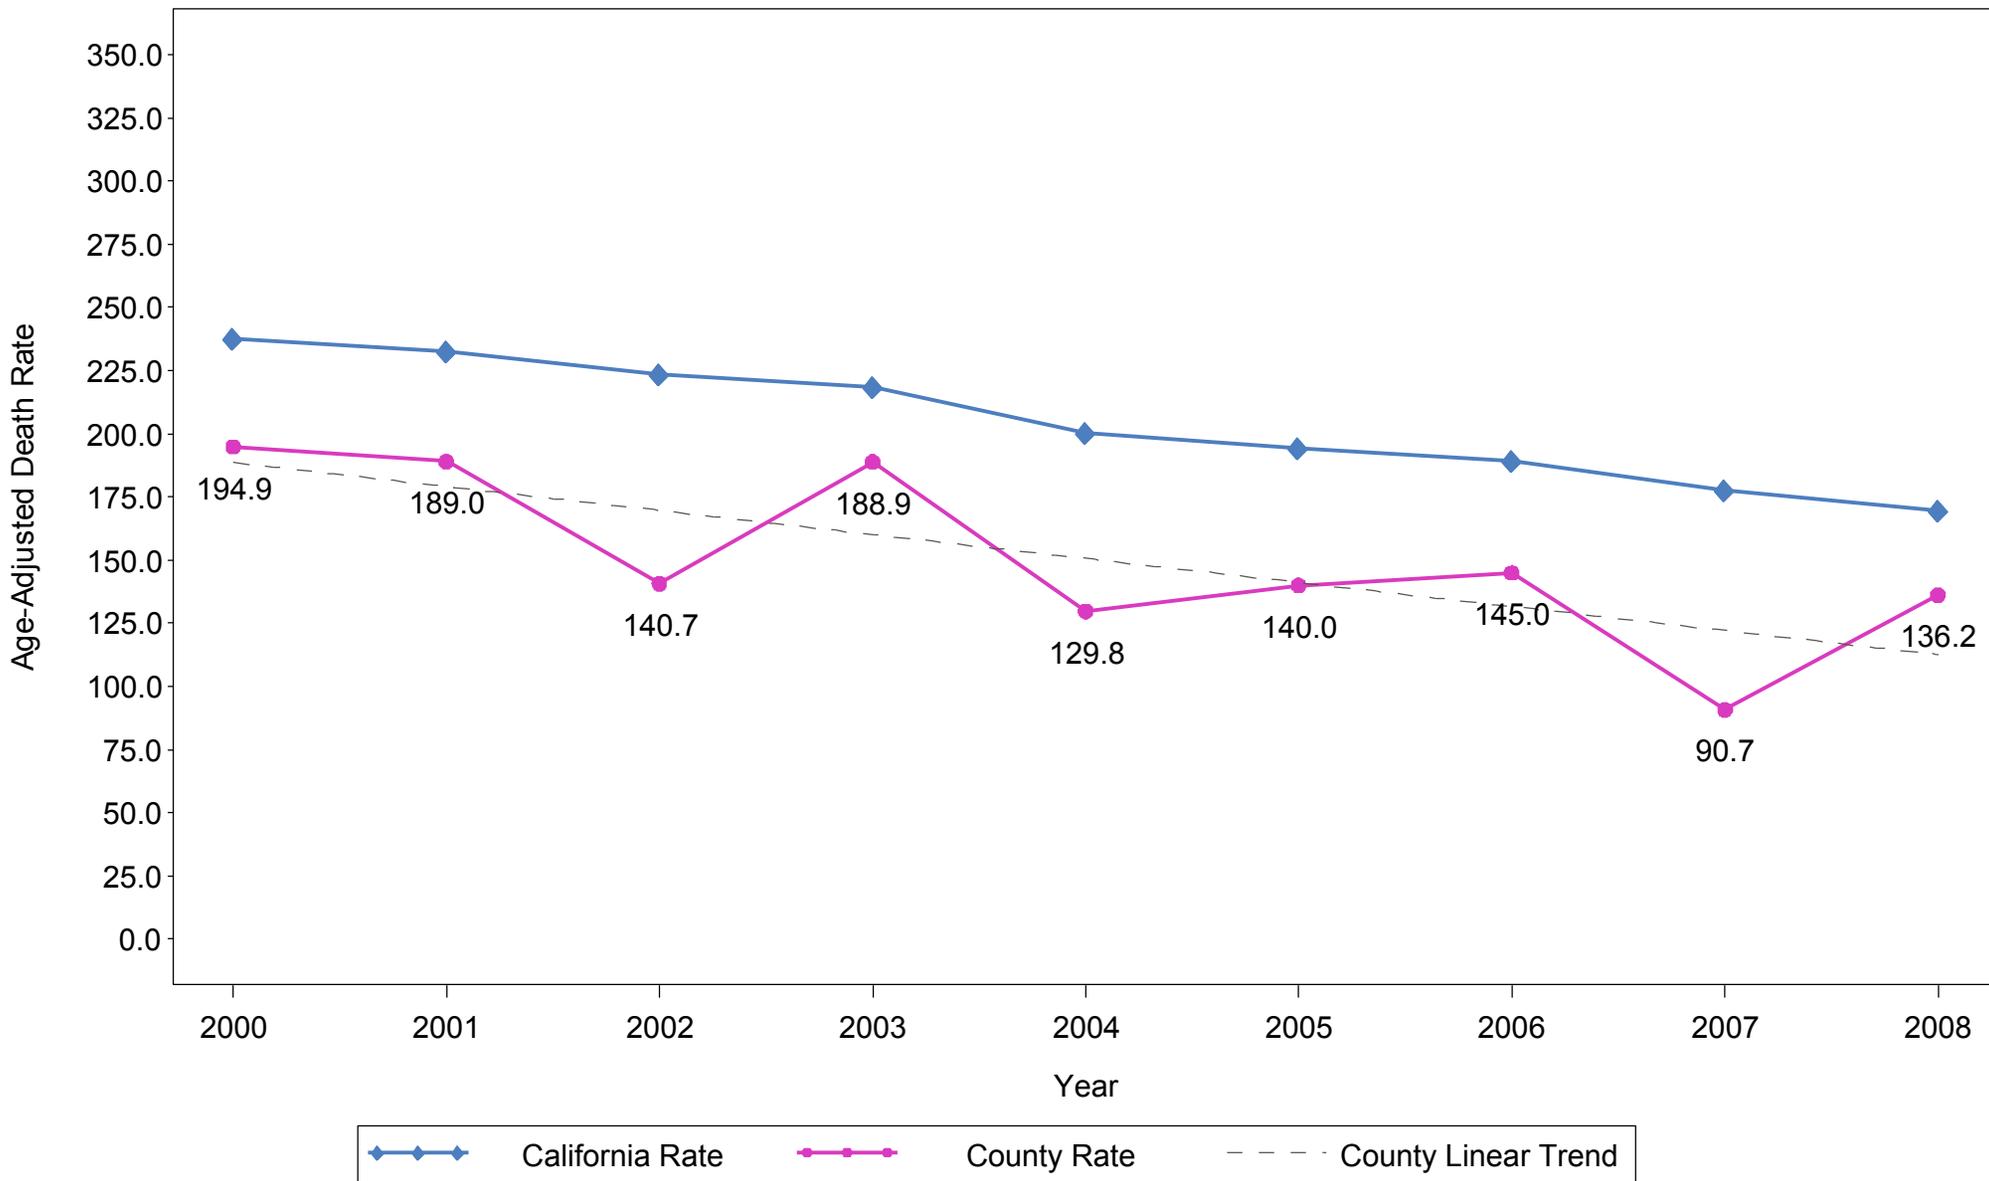

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Plumas County

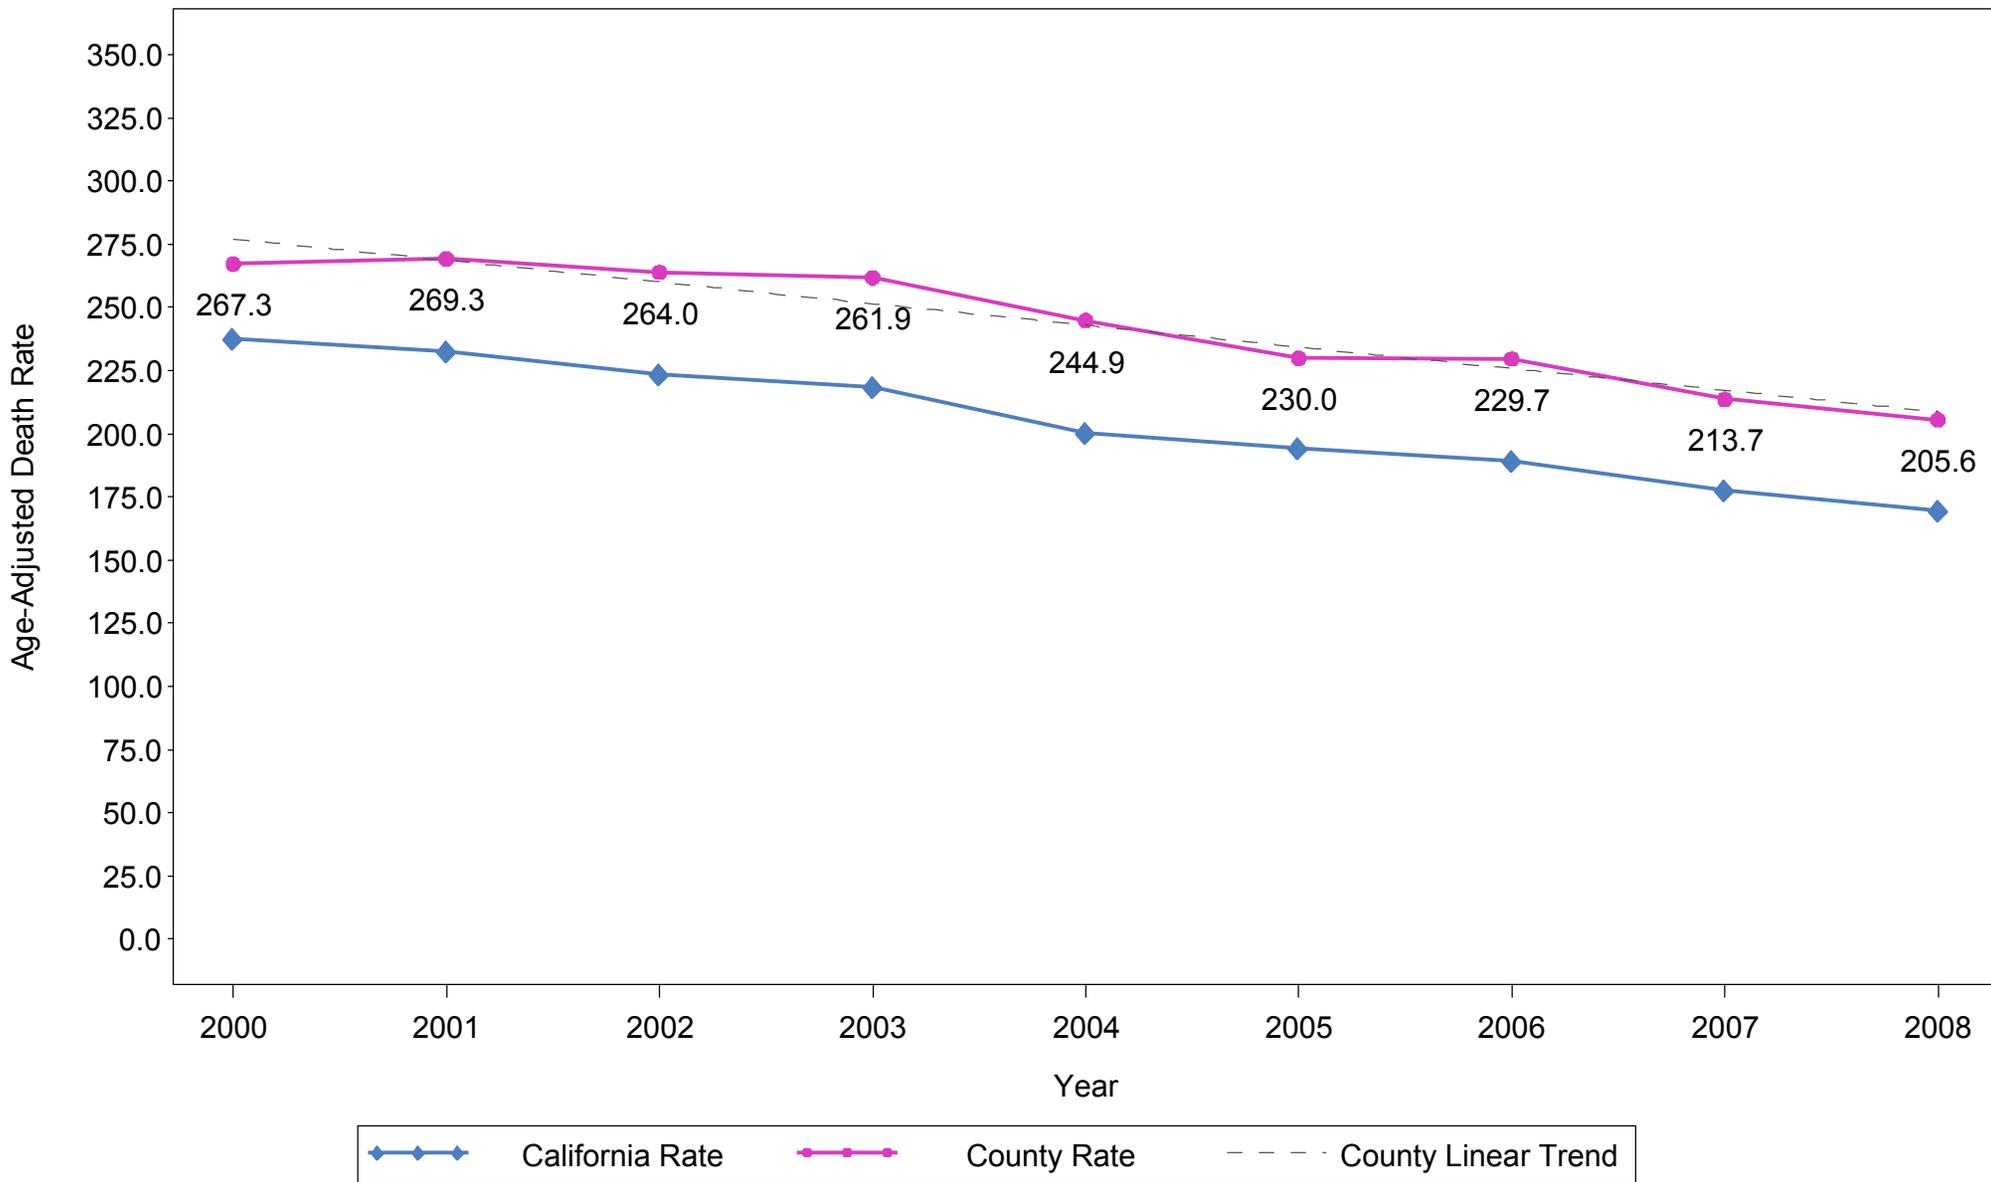

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Riverside County

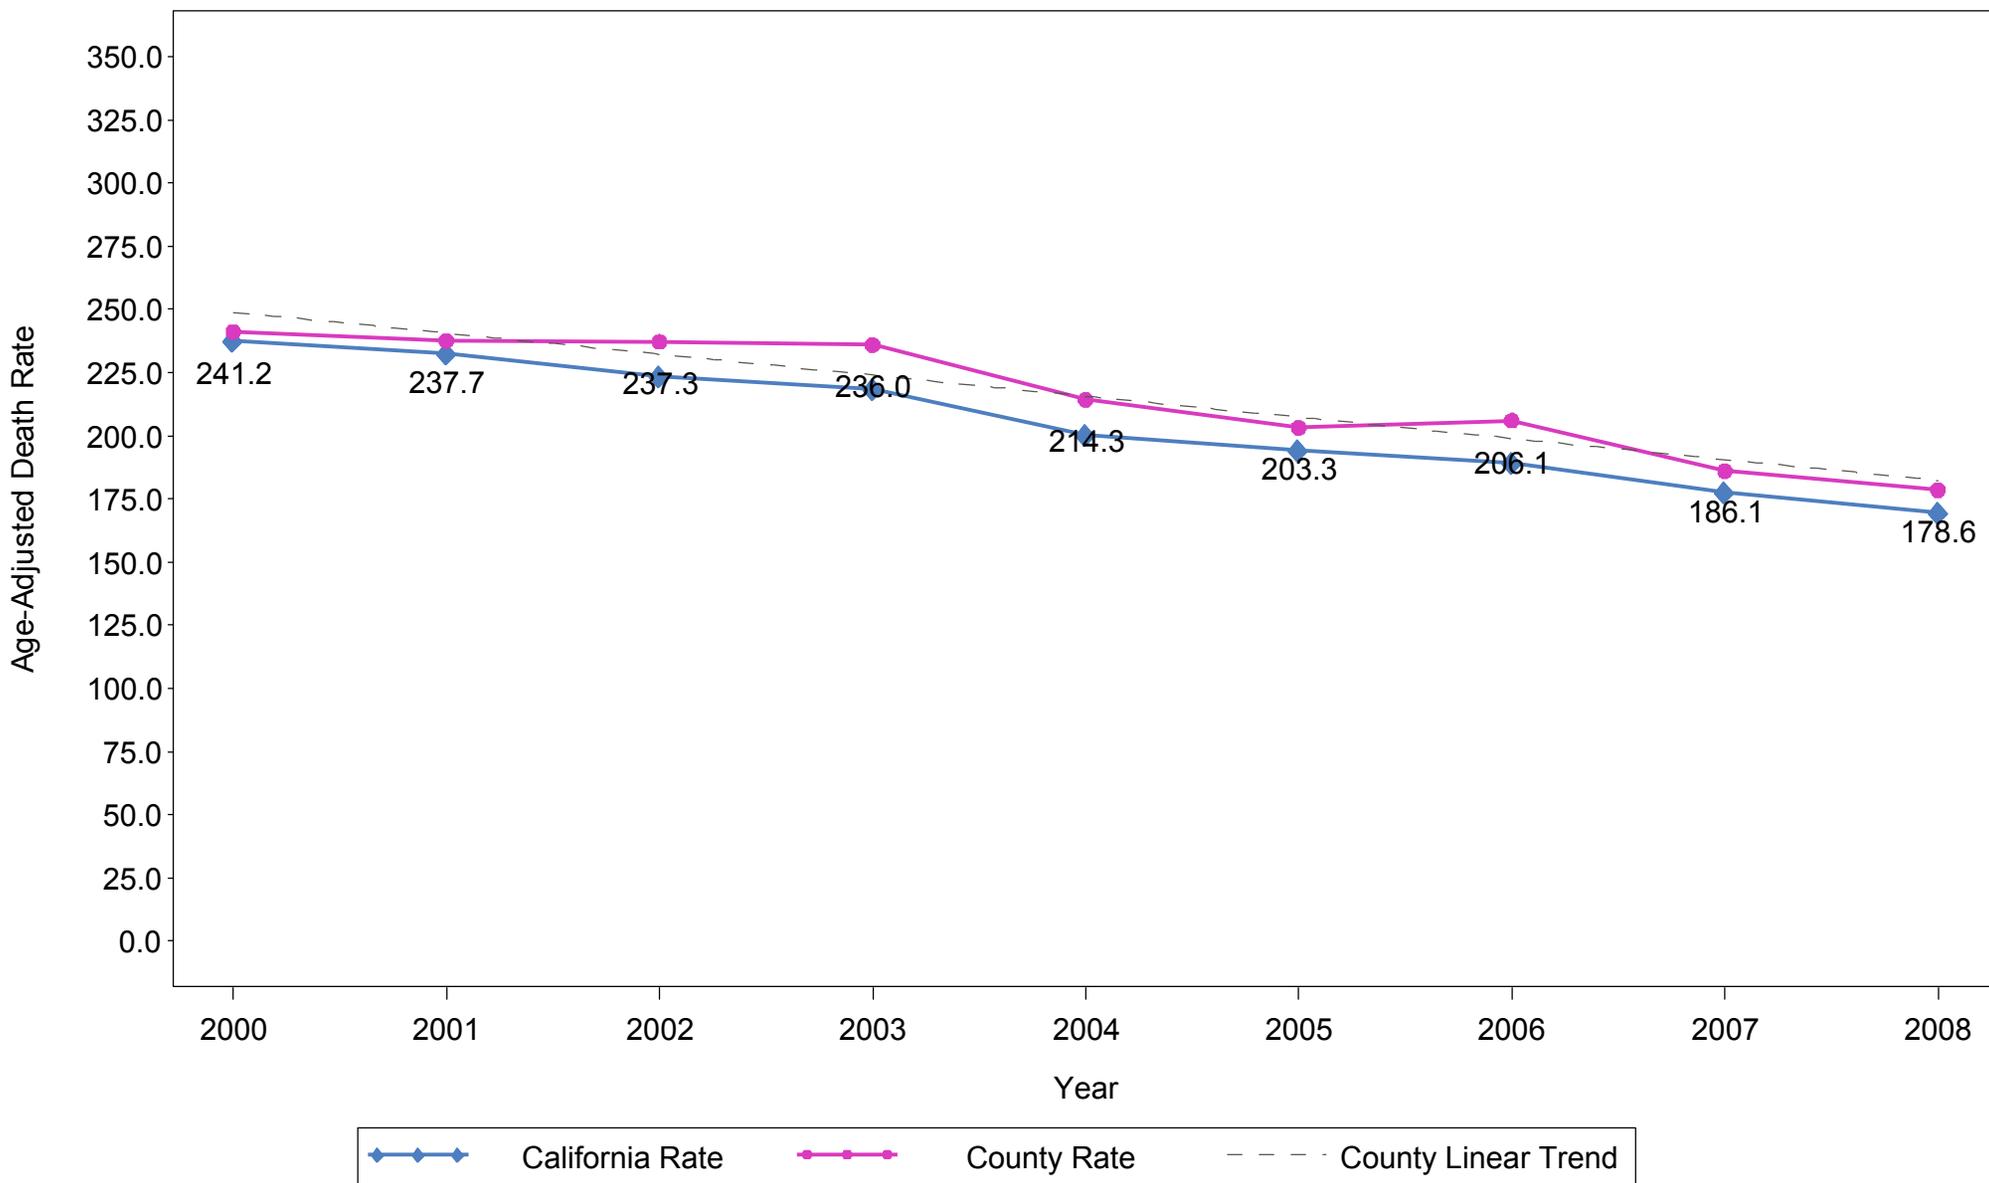

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Sacramento County

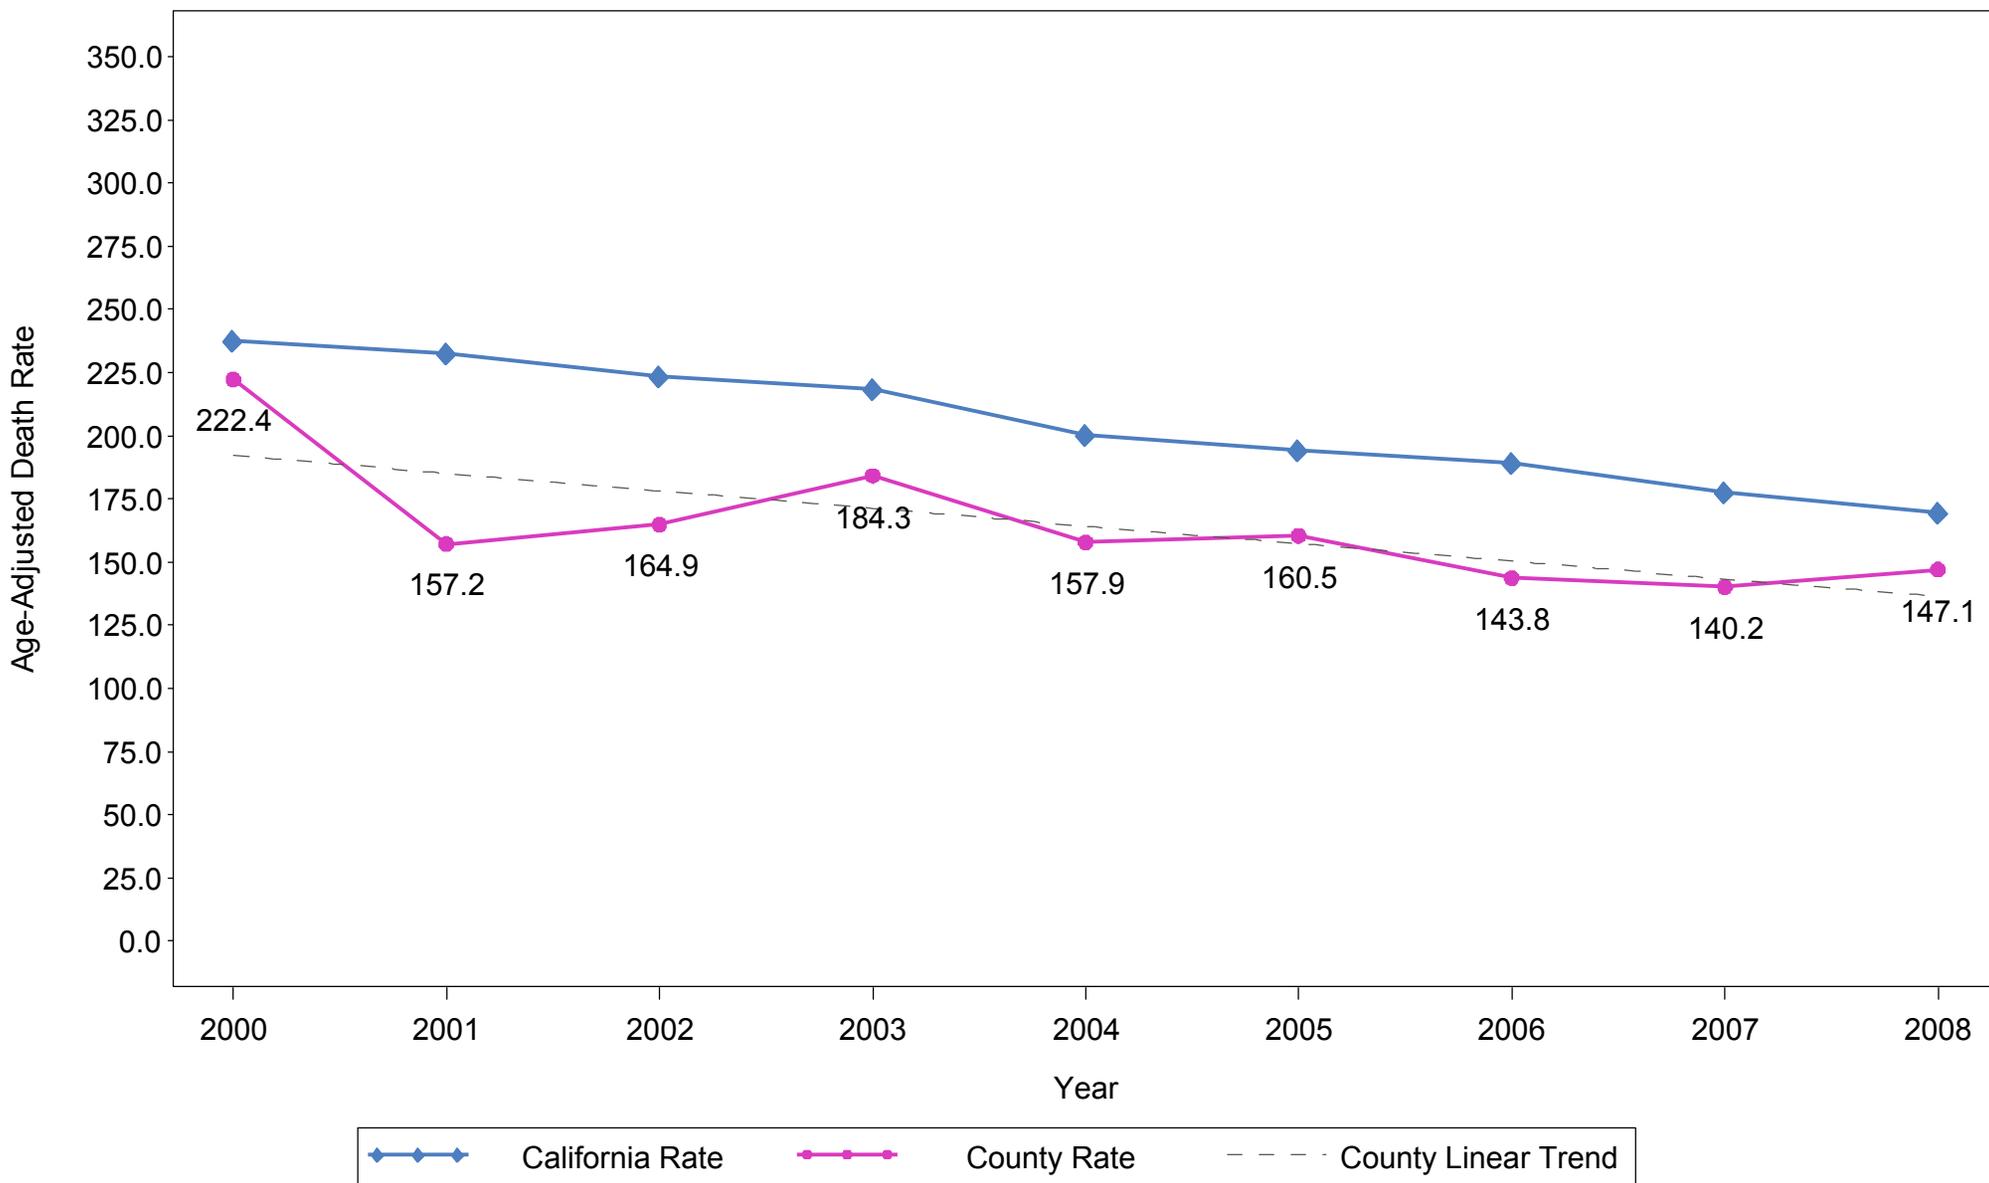

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Benito County

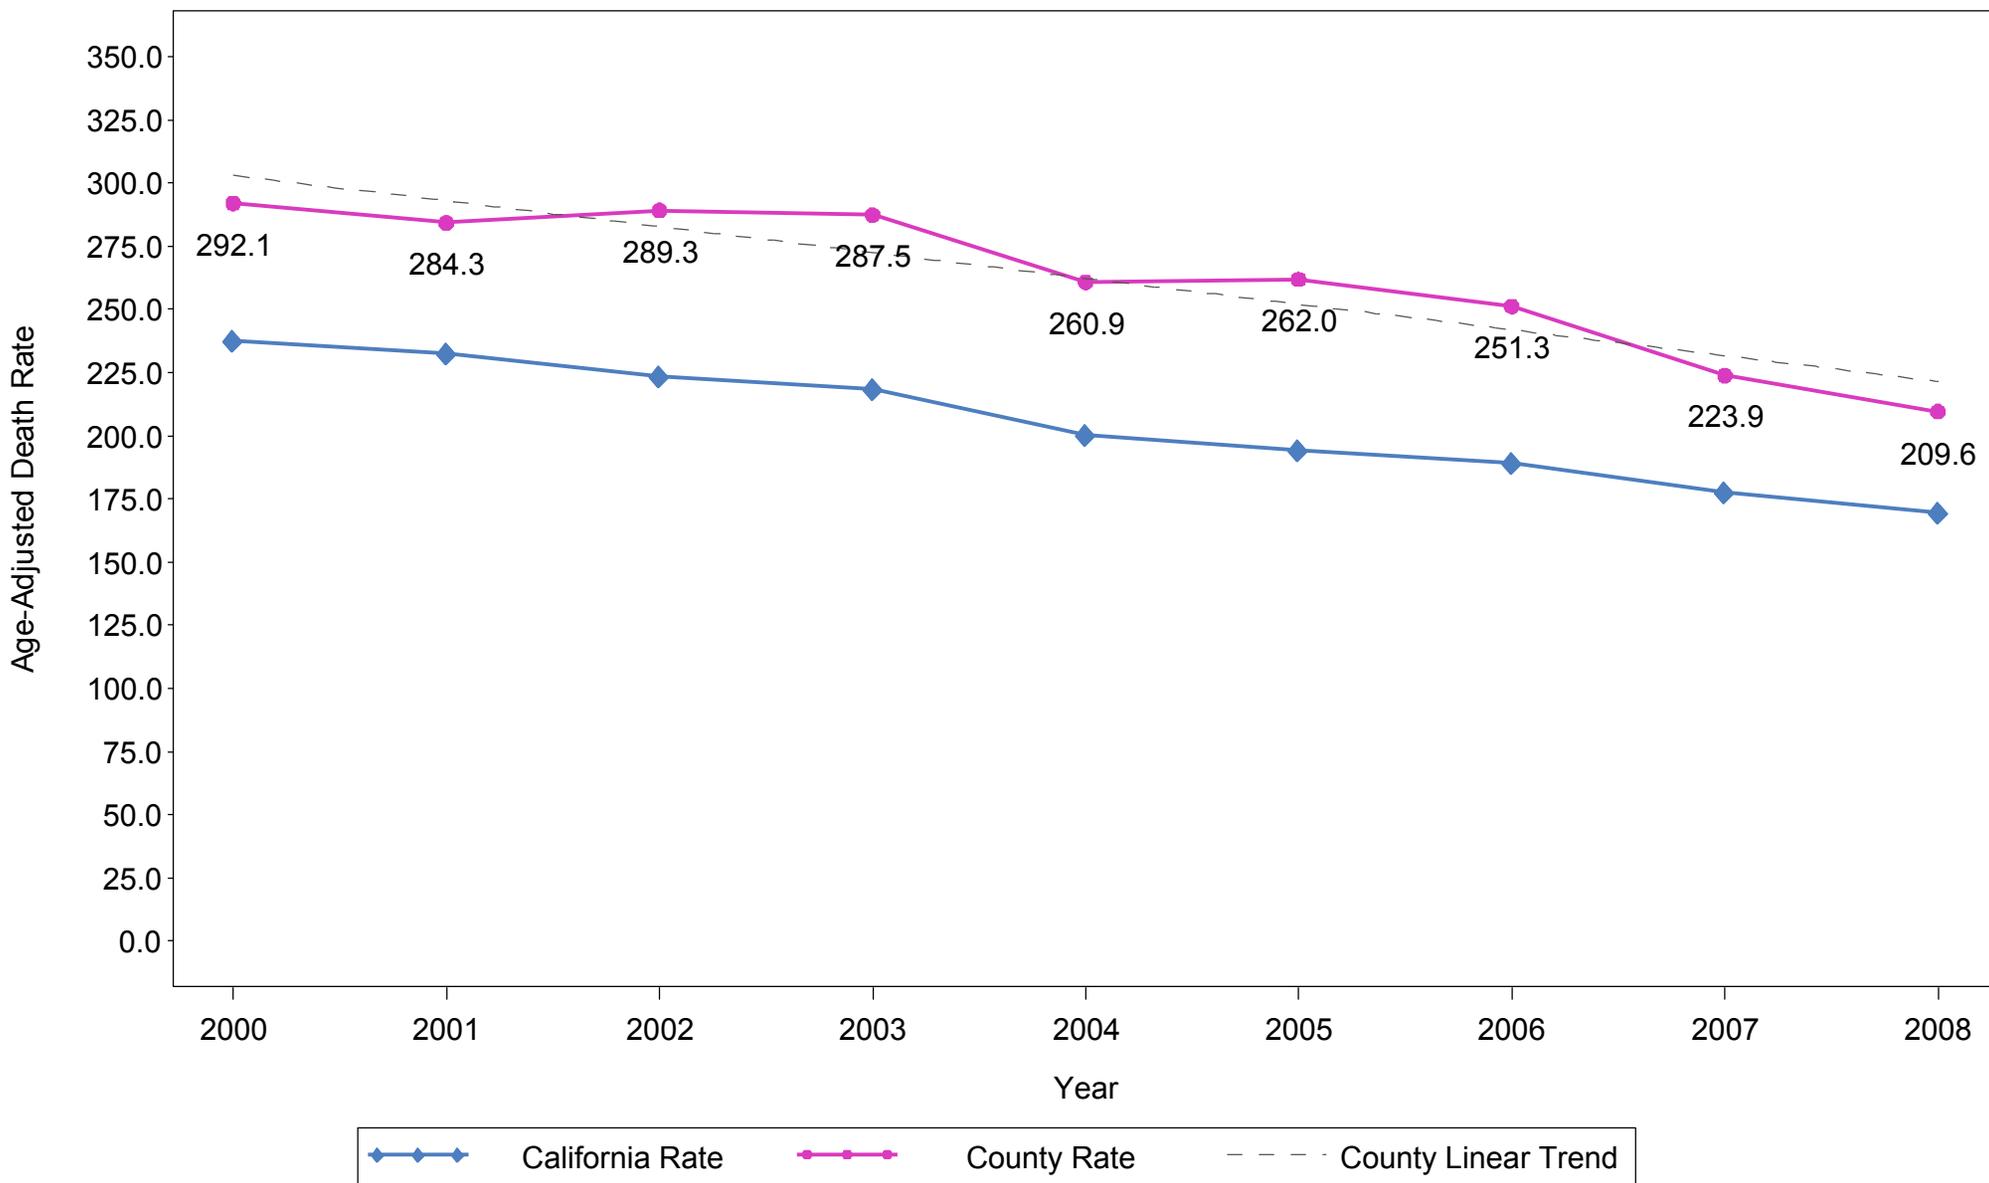

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Bernardino County

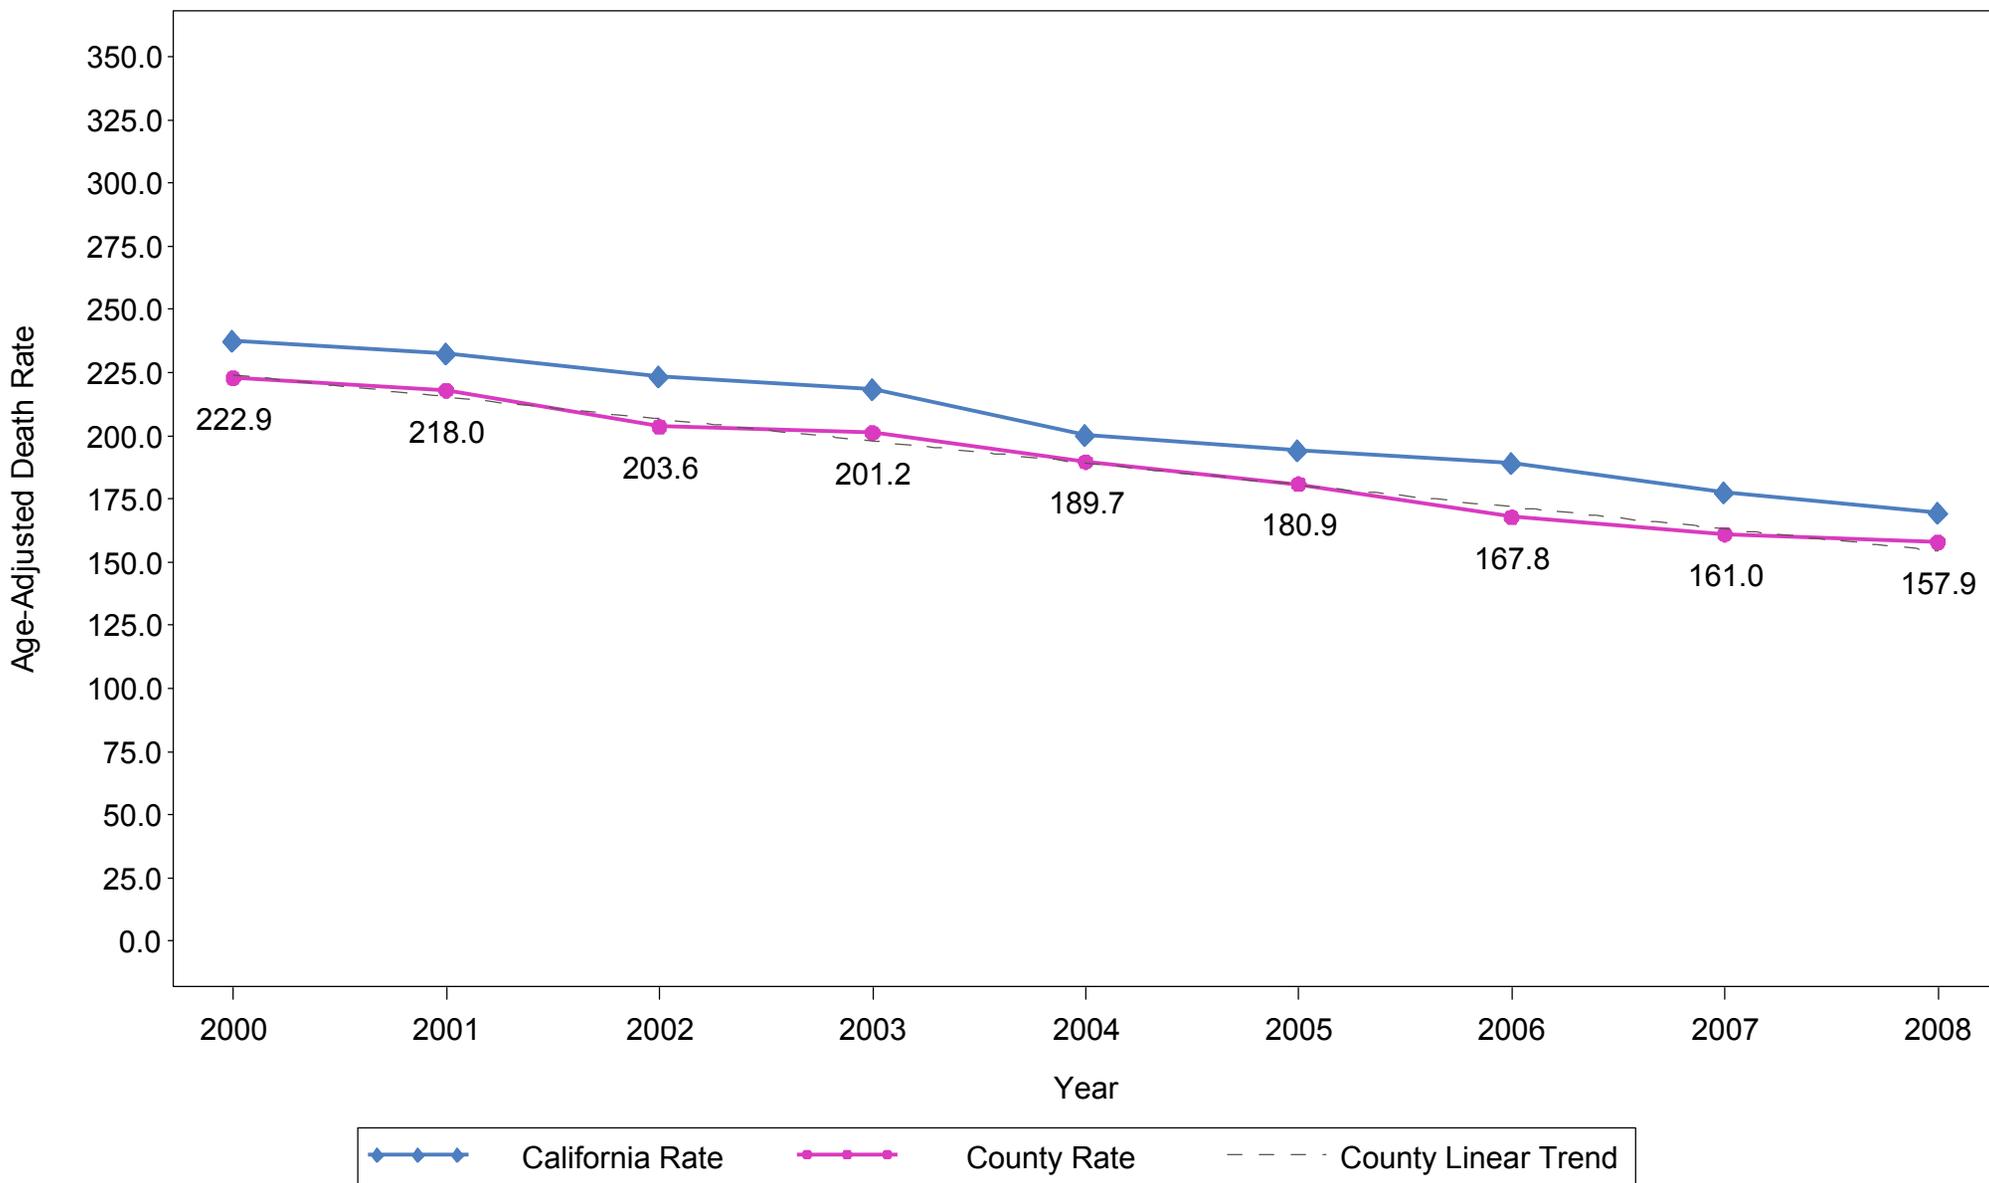

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Diego County

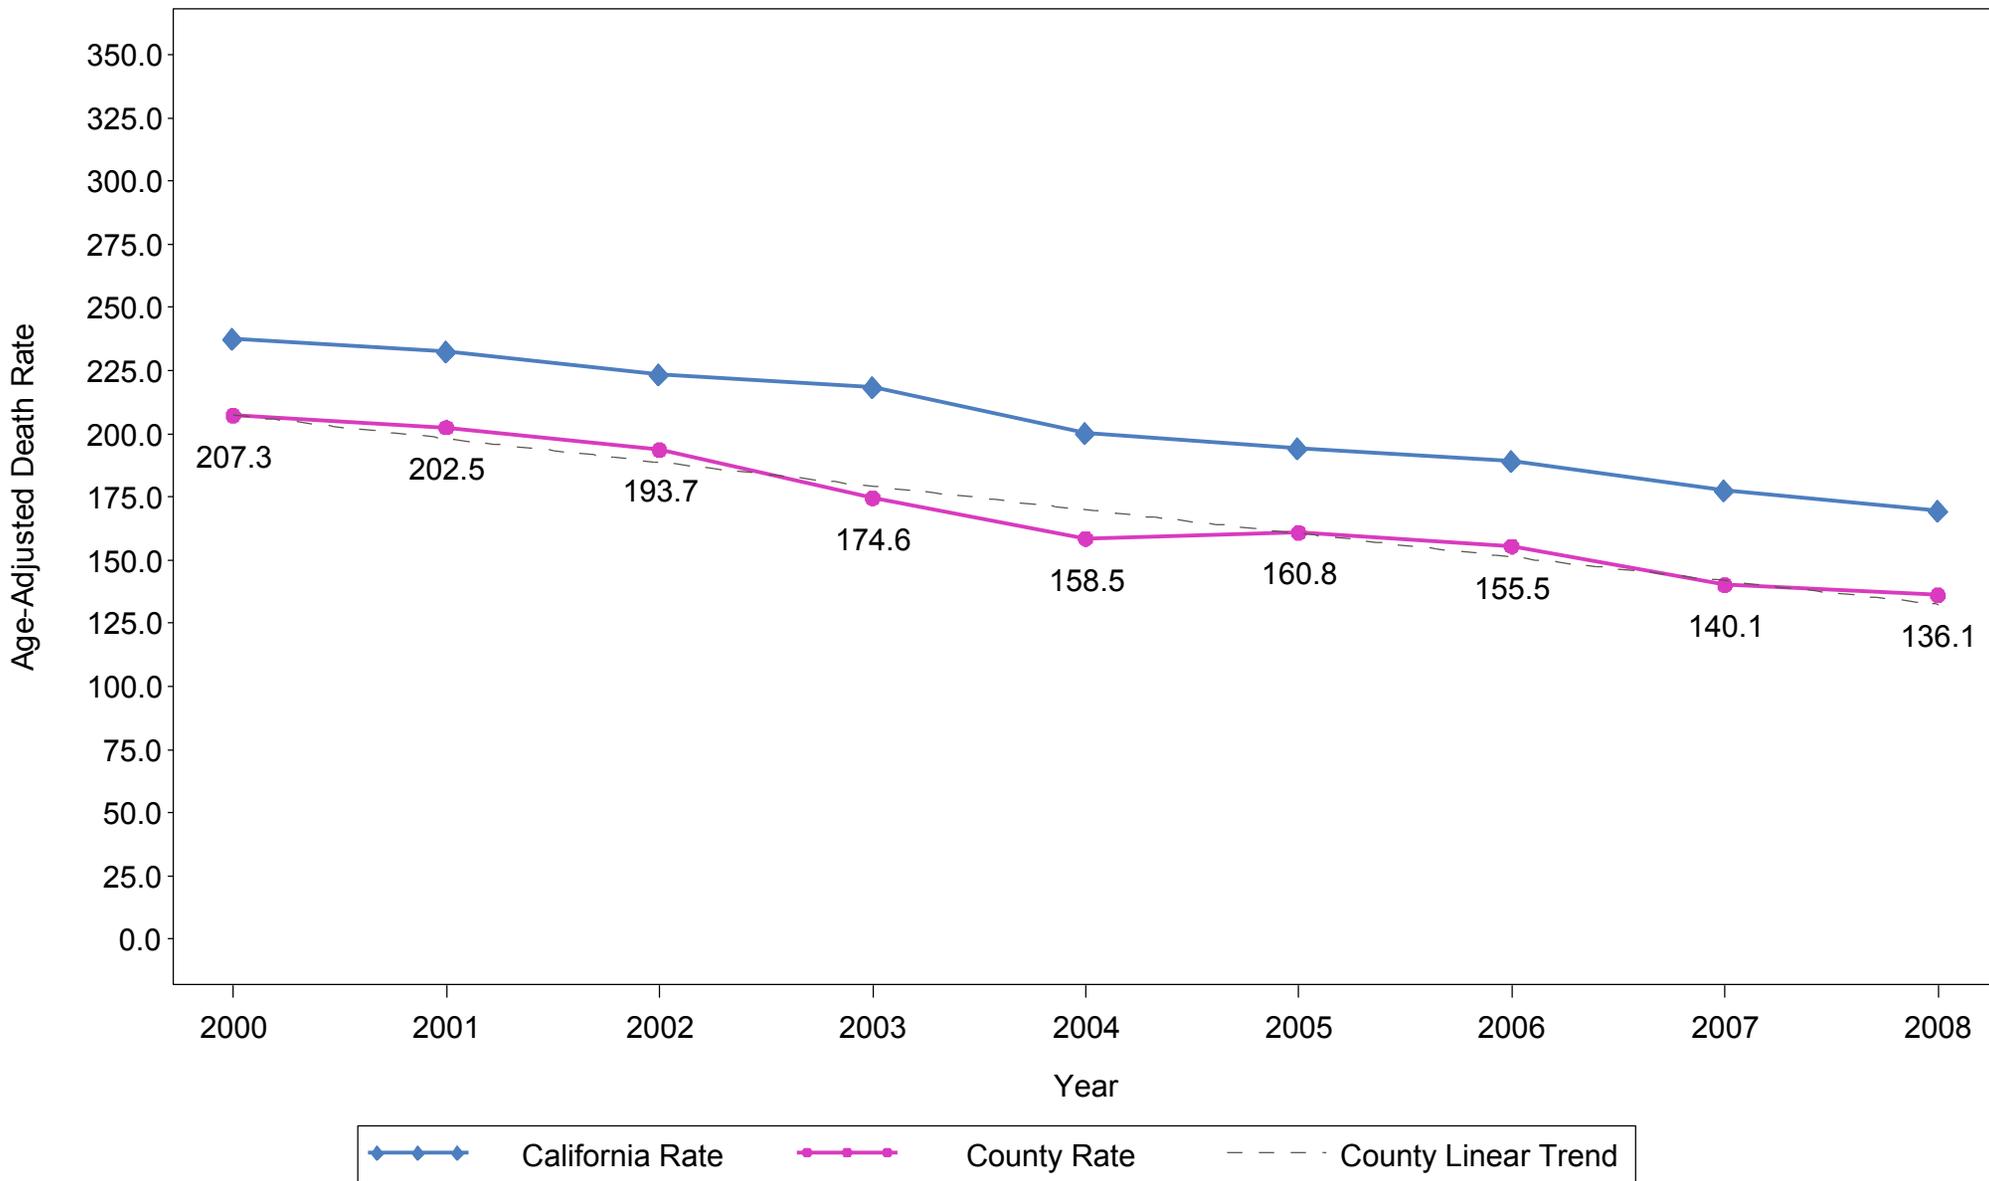

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Francisco County

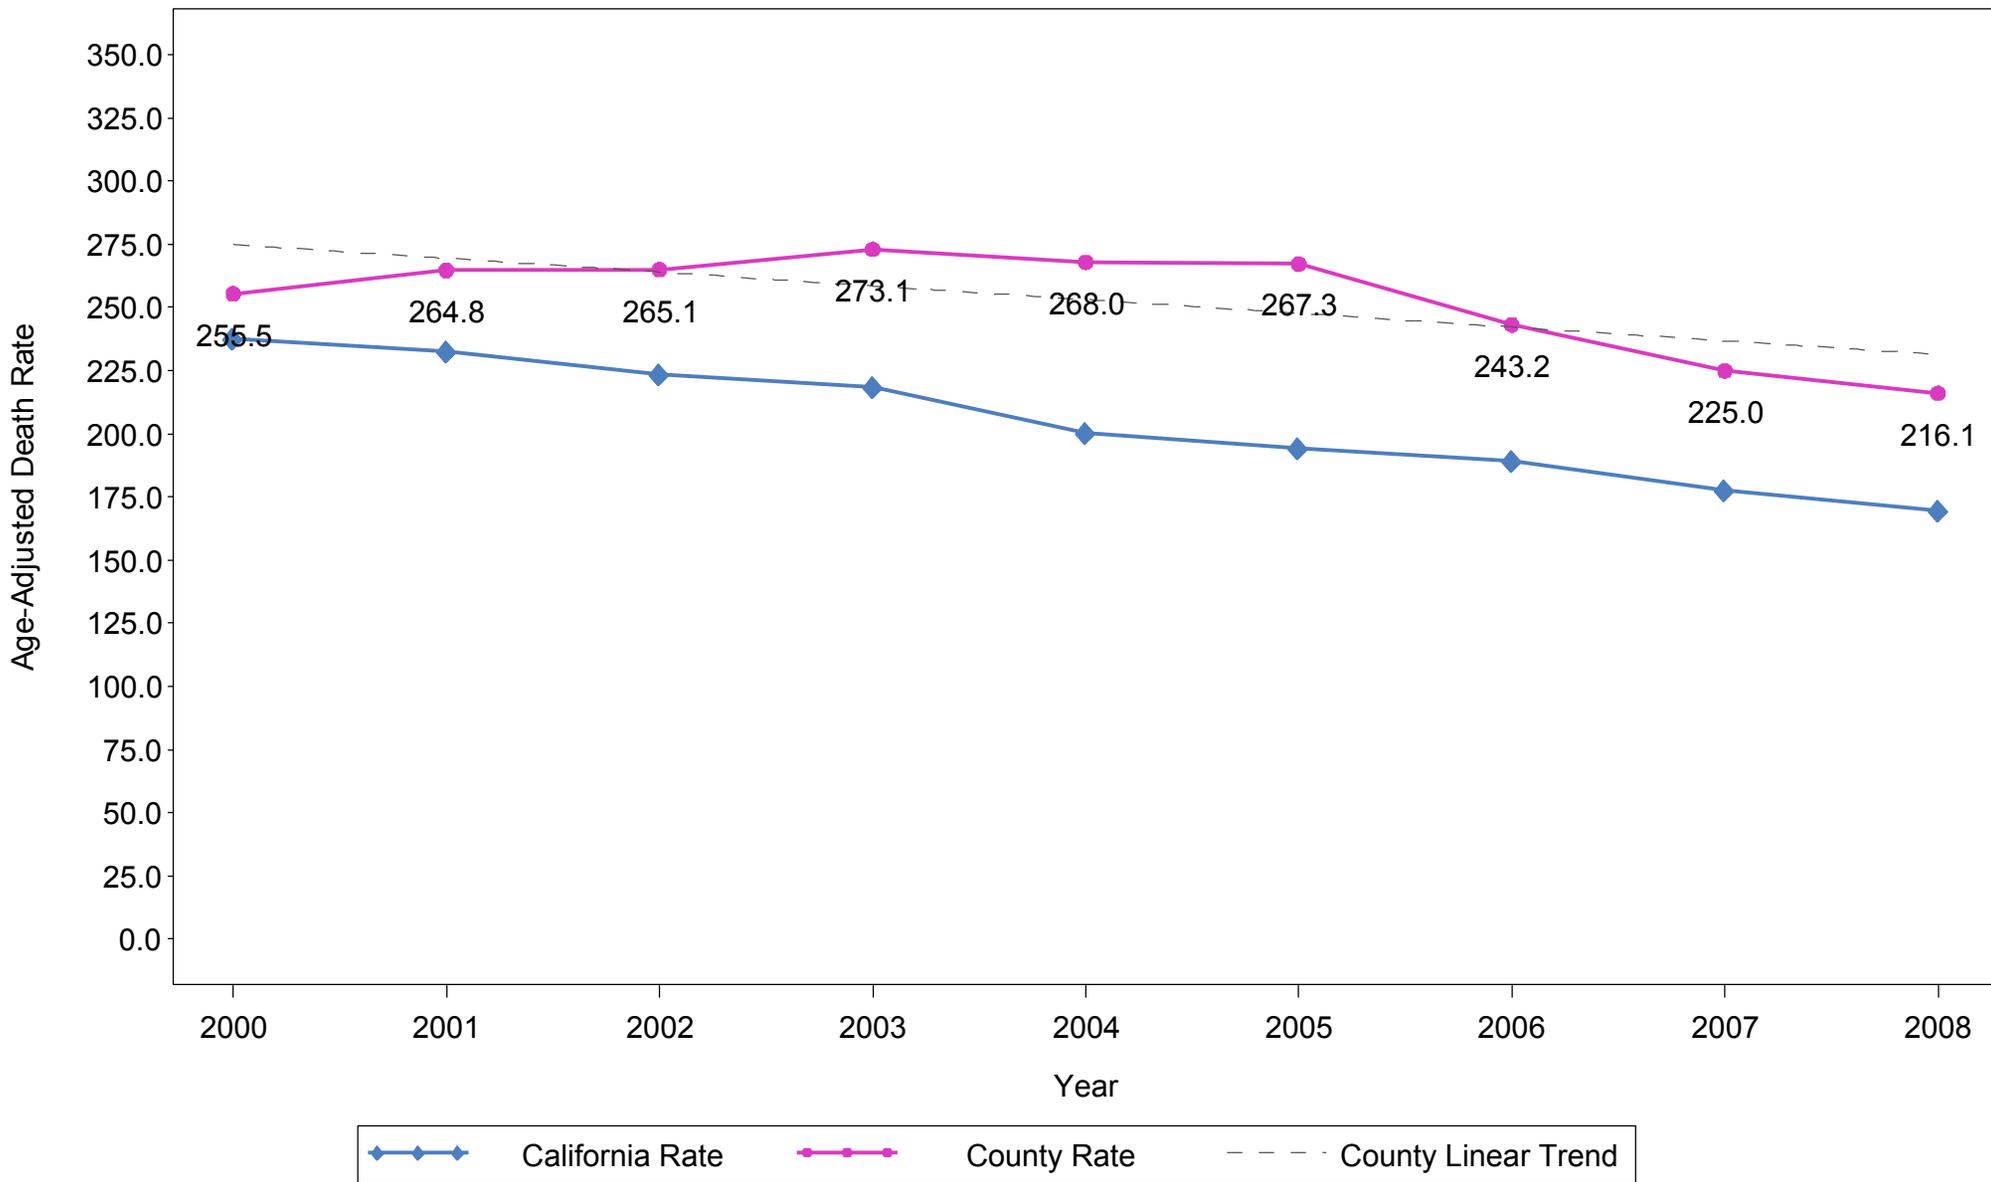

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Joaquin County

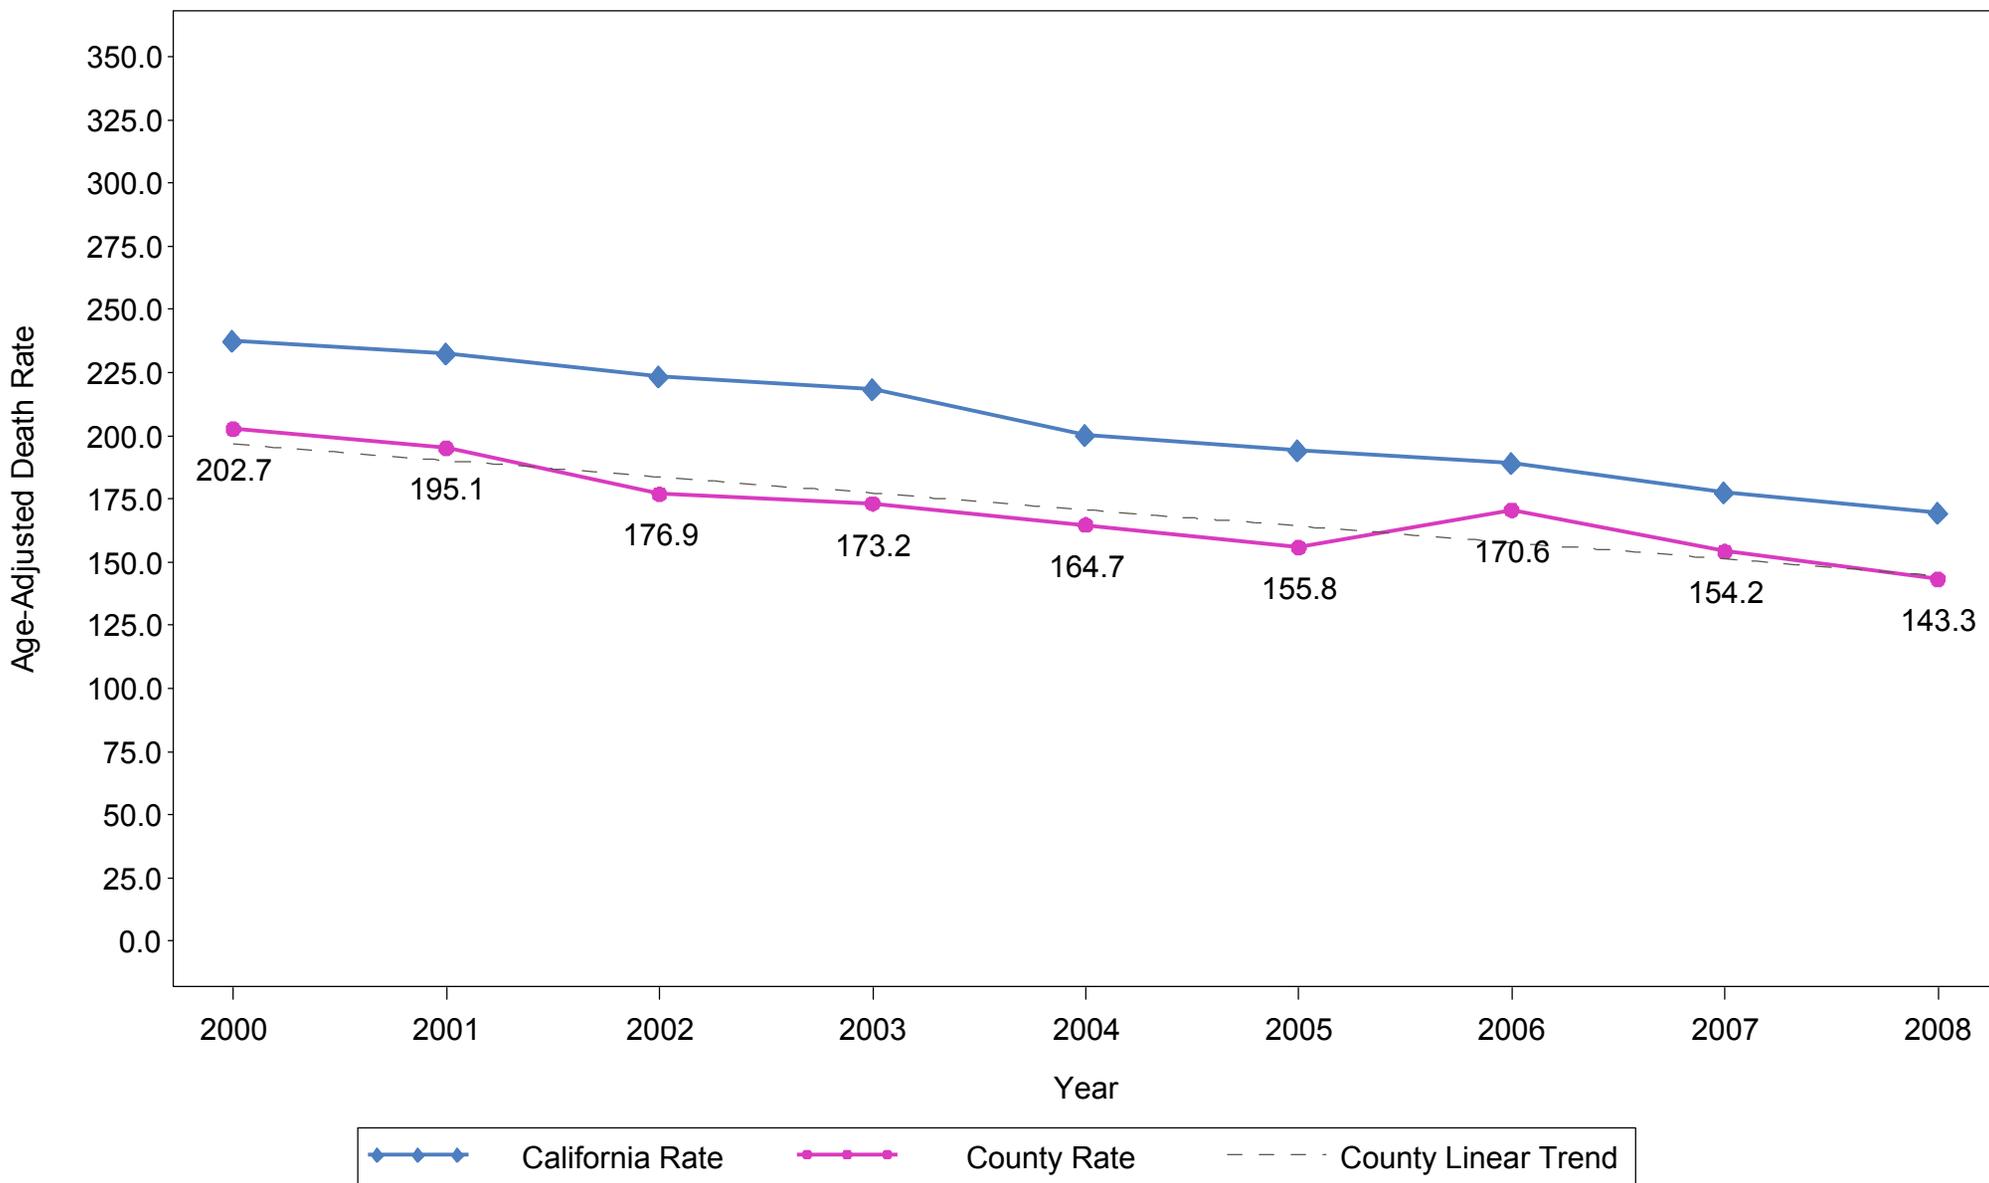

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Luis Obispo County

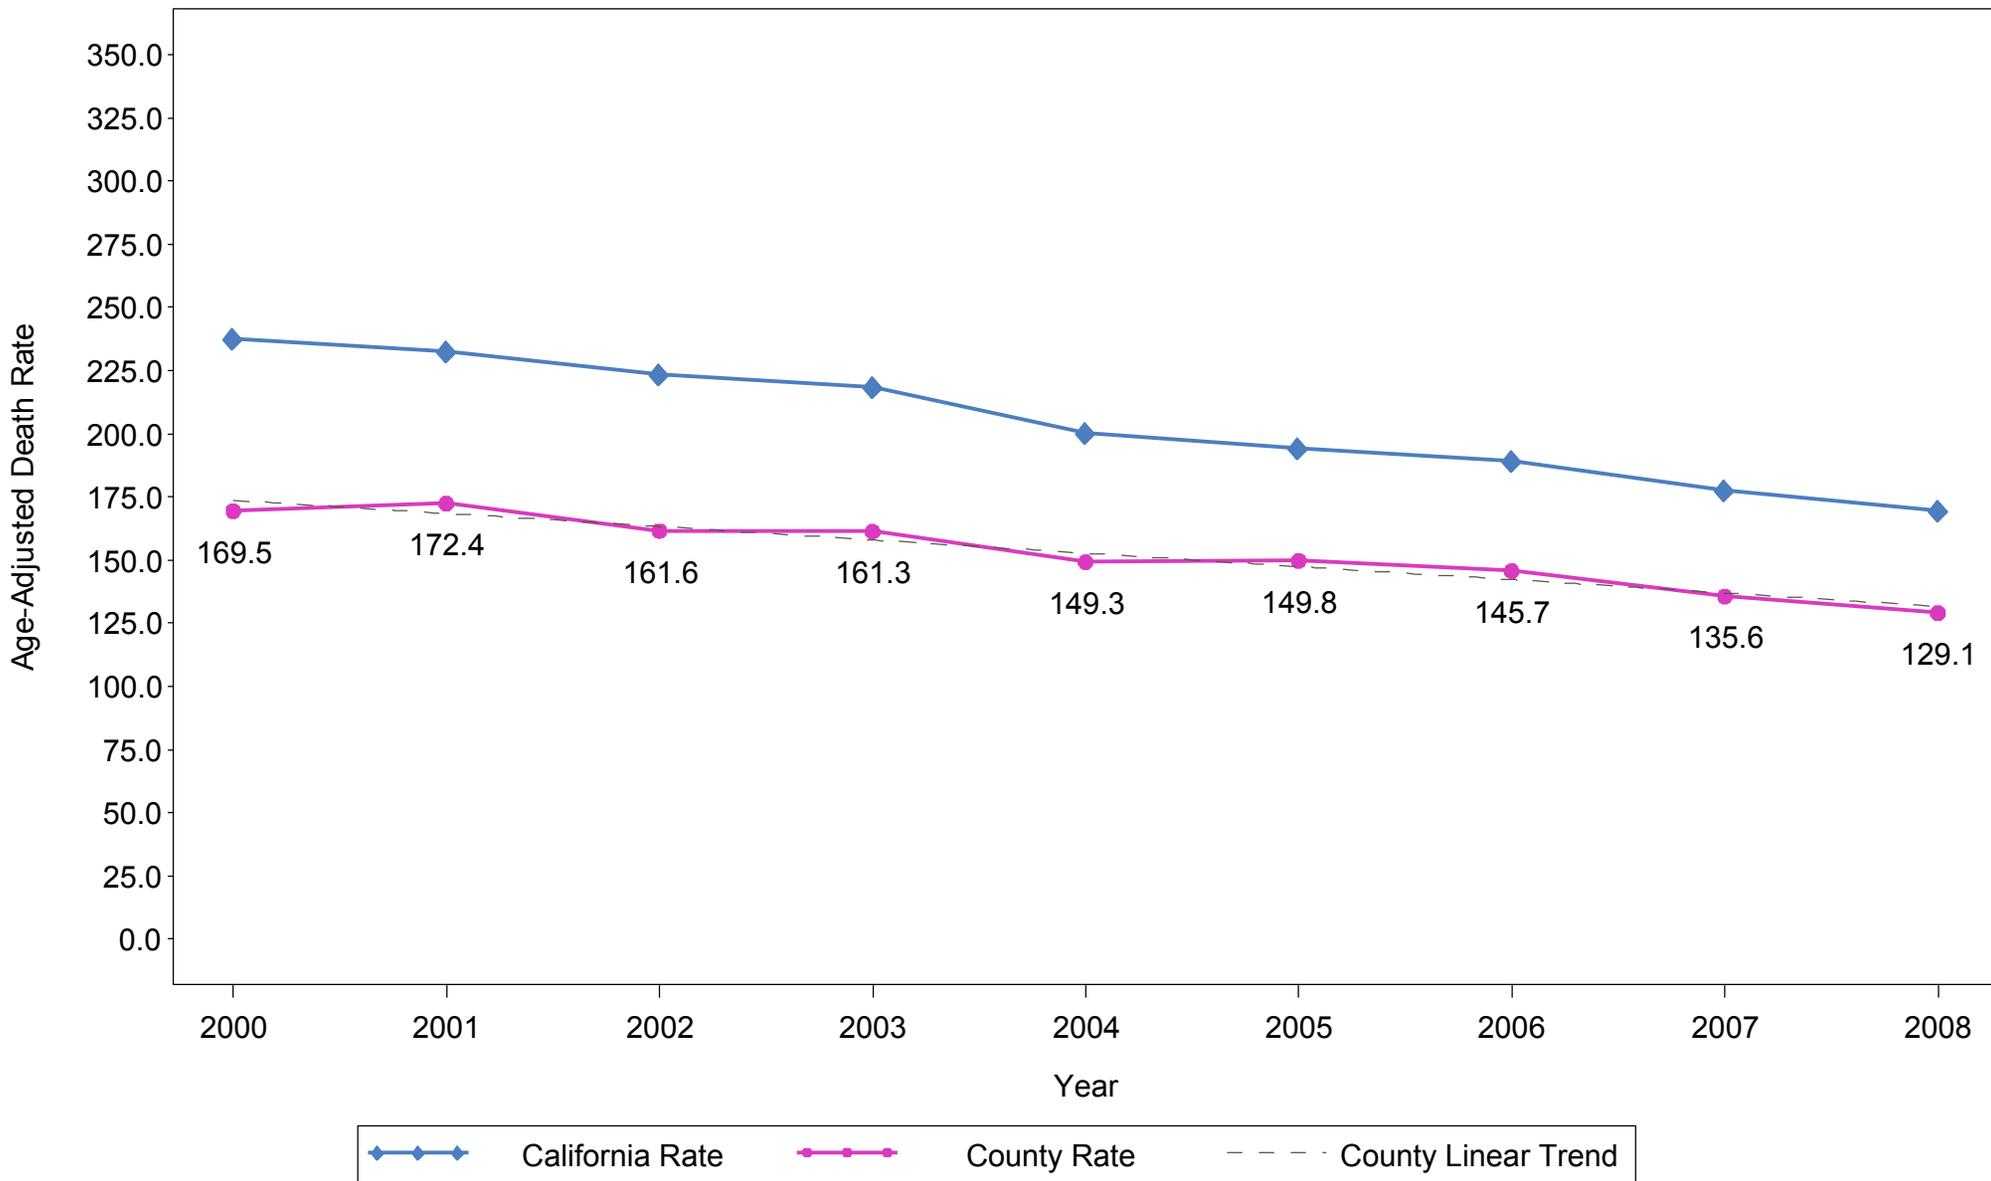

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
San Mateo County

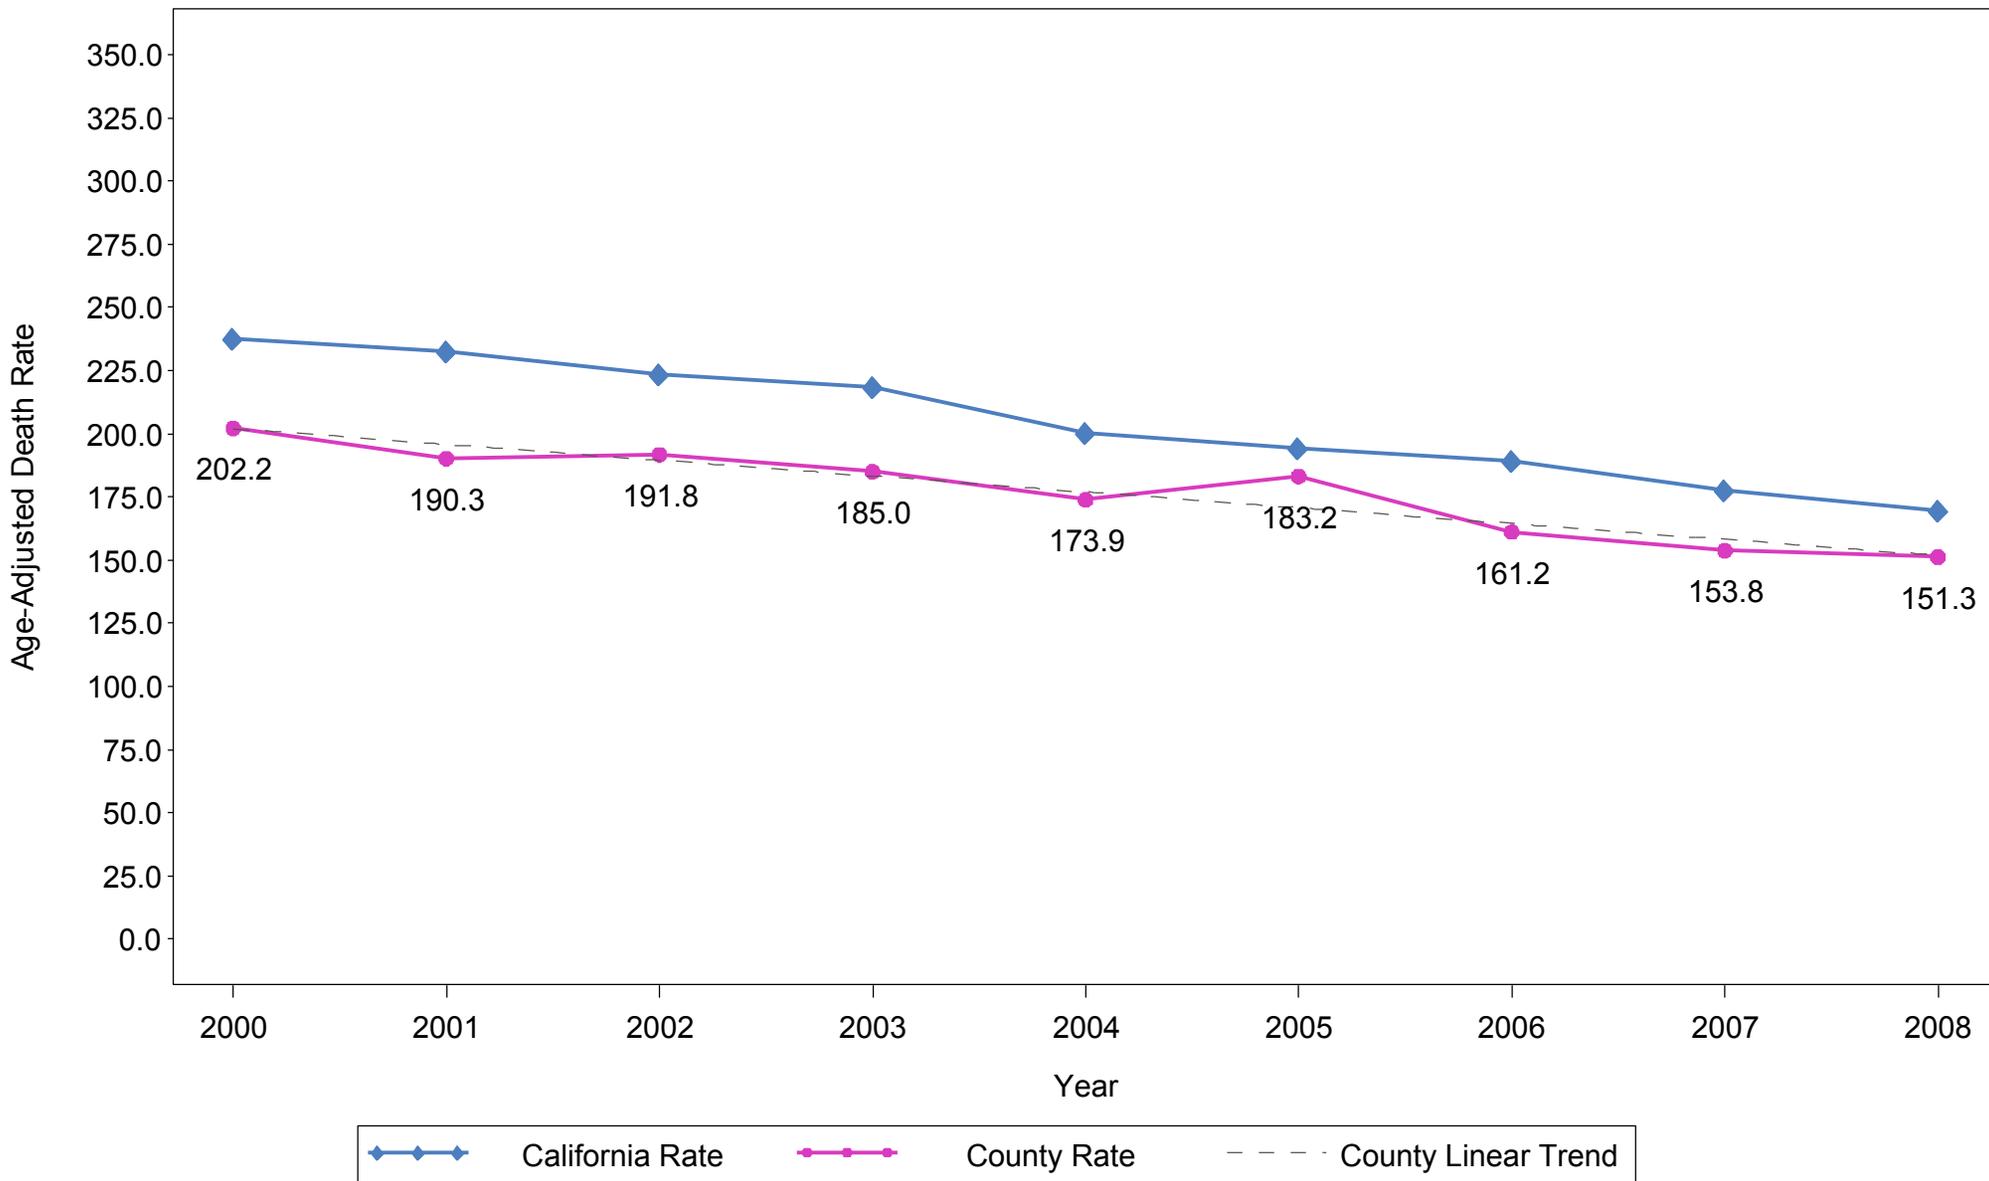

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Santa Barbara County

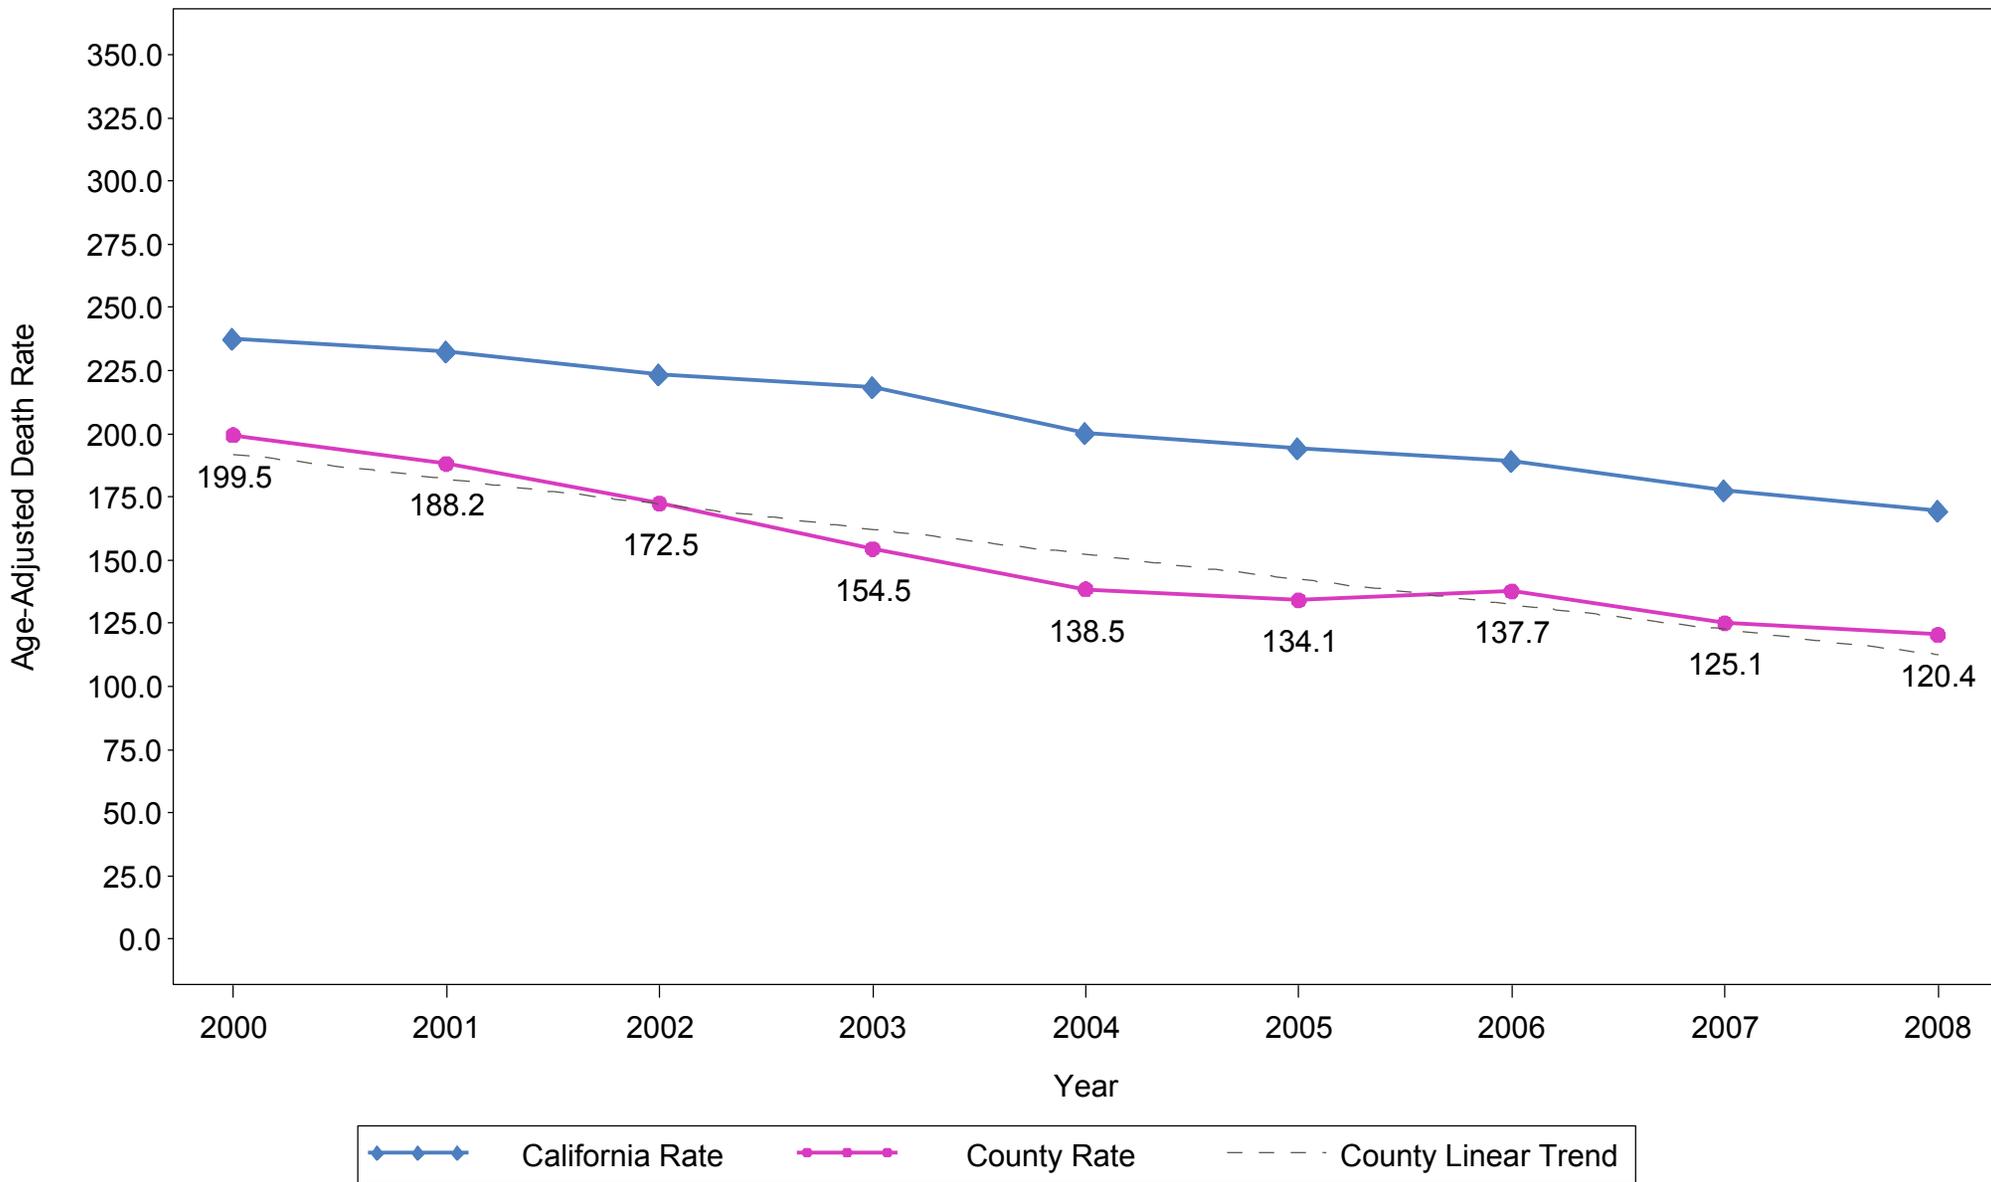

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Santa Clara County

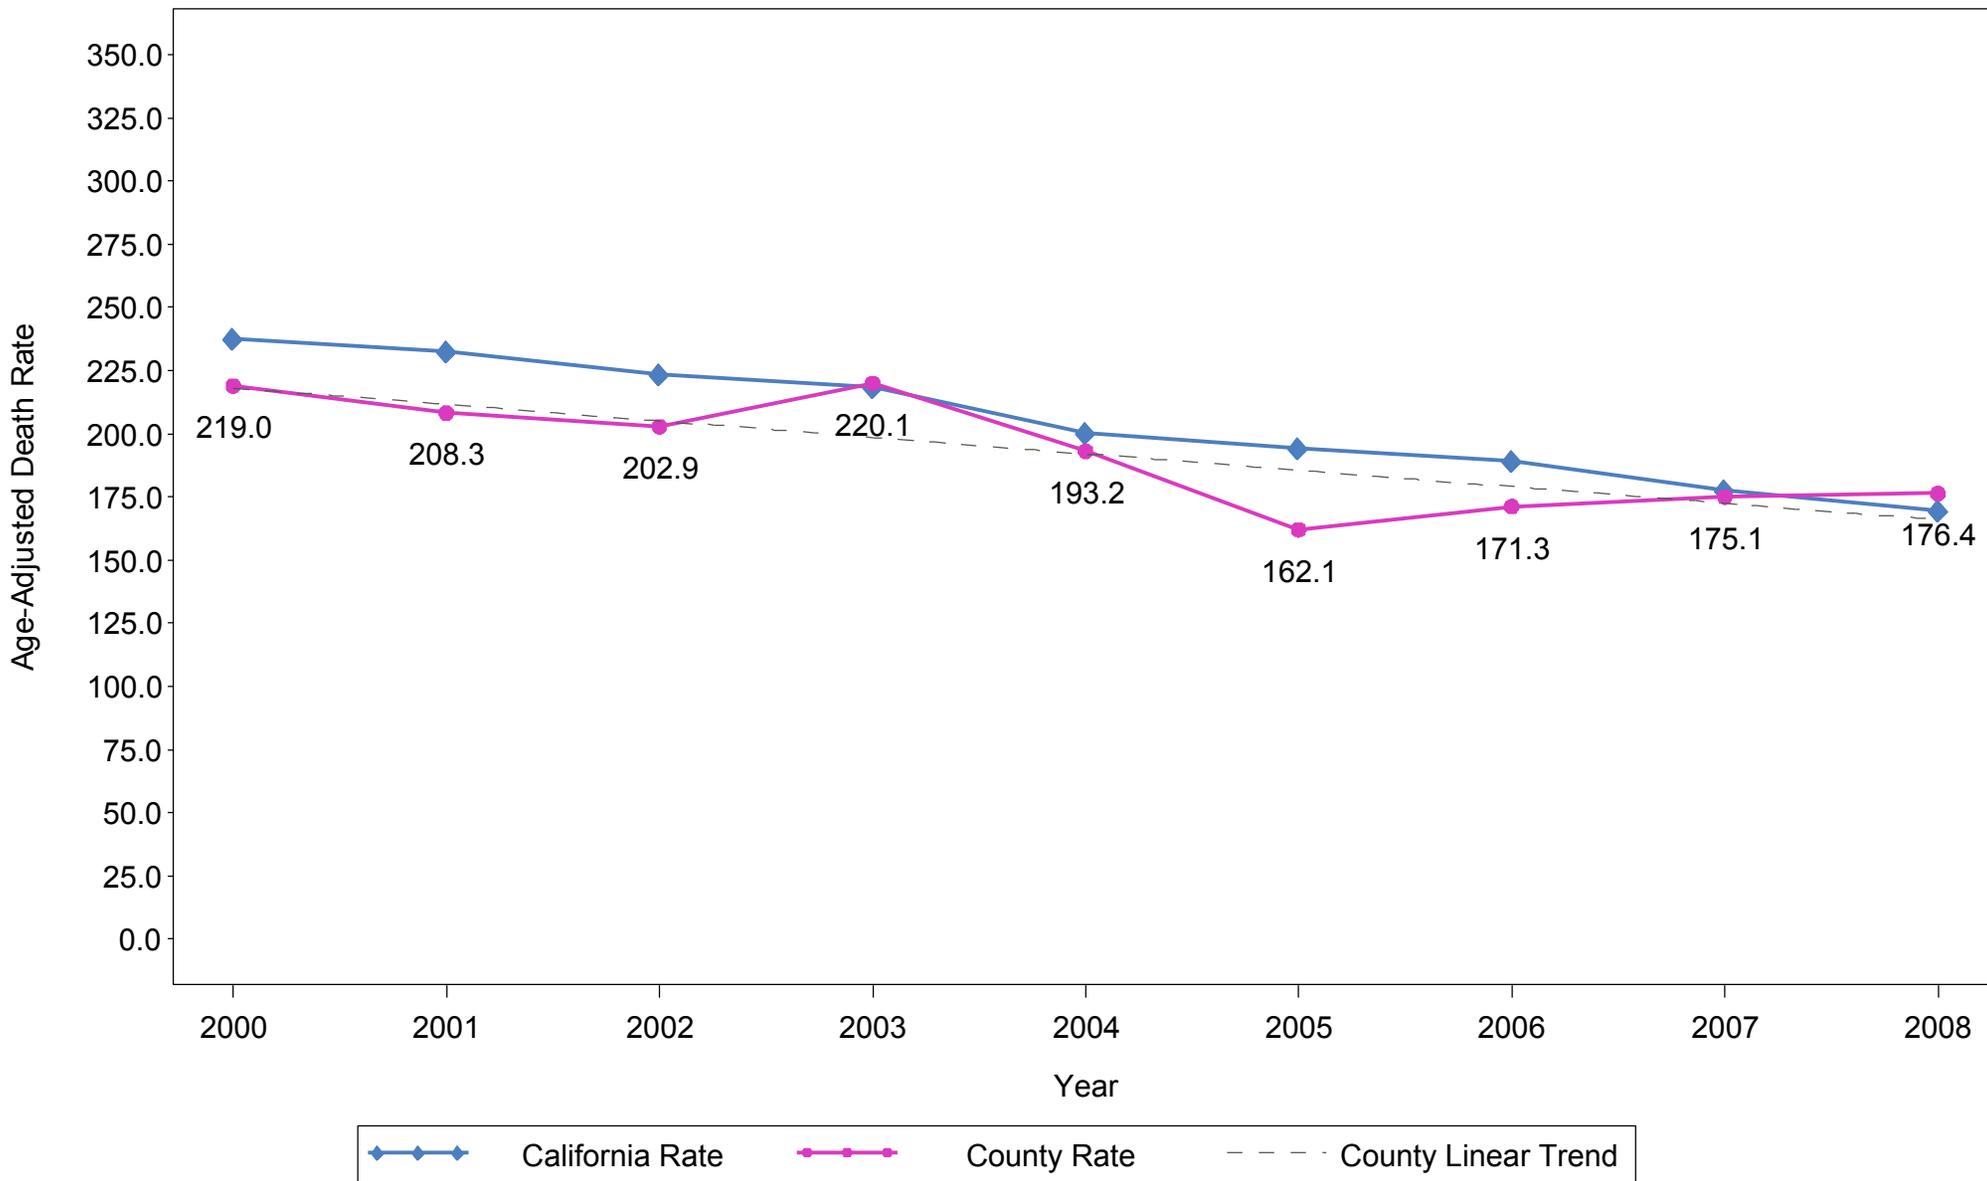

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Santa Cruz County

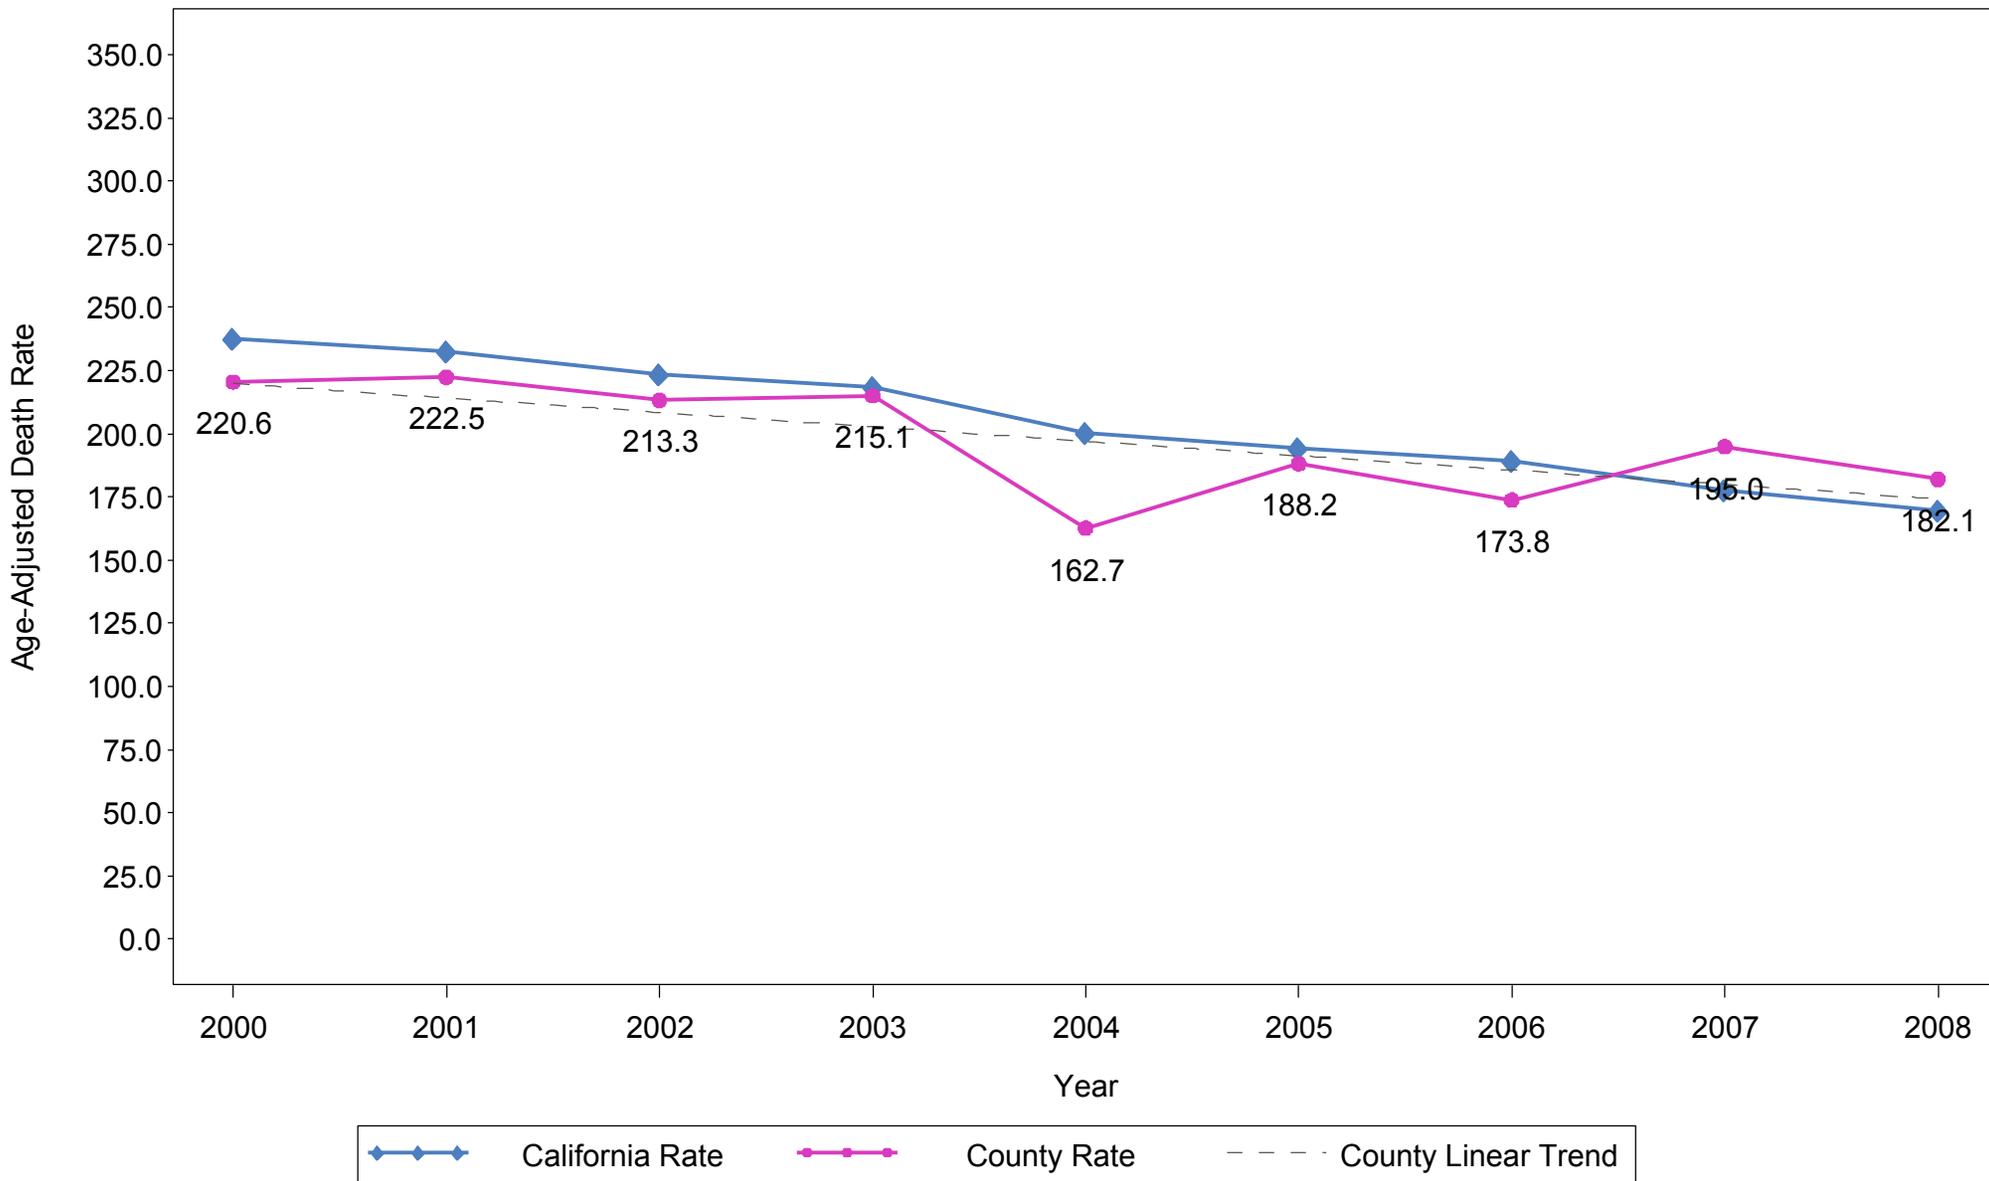

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Siskiyou County

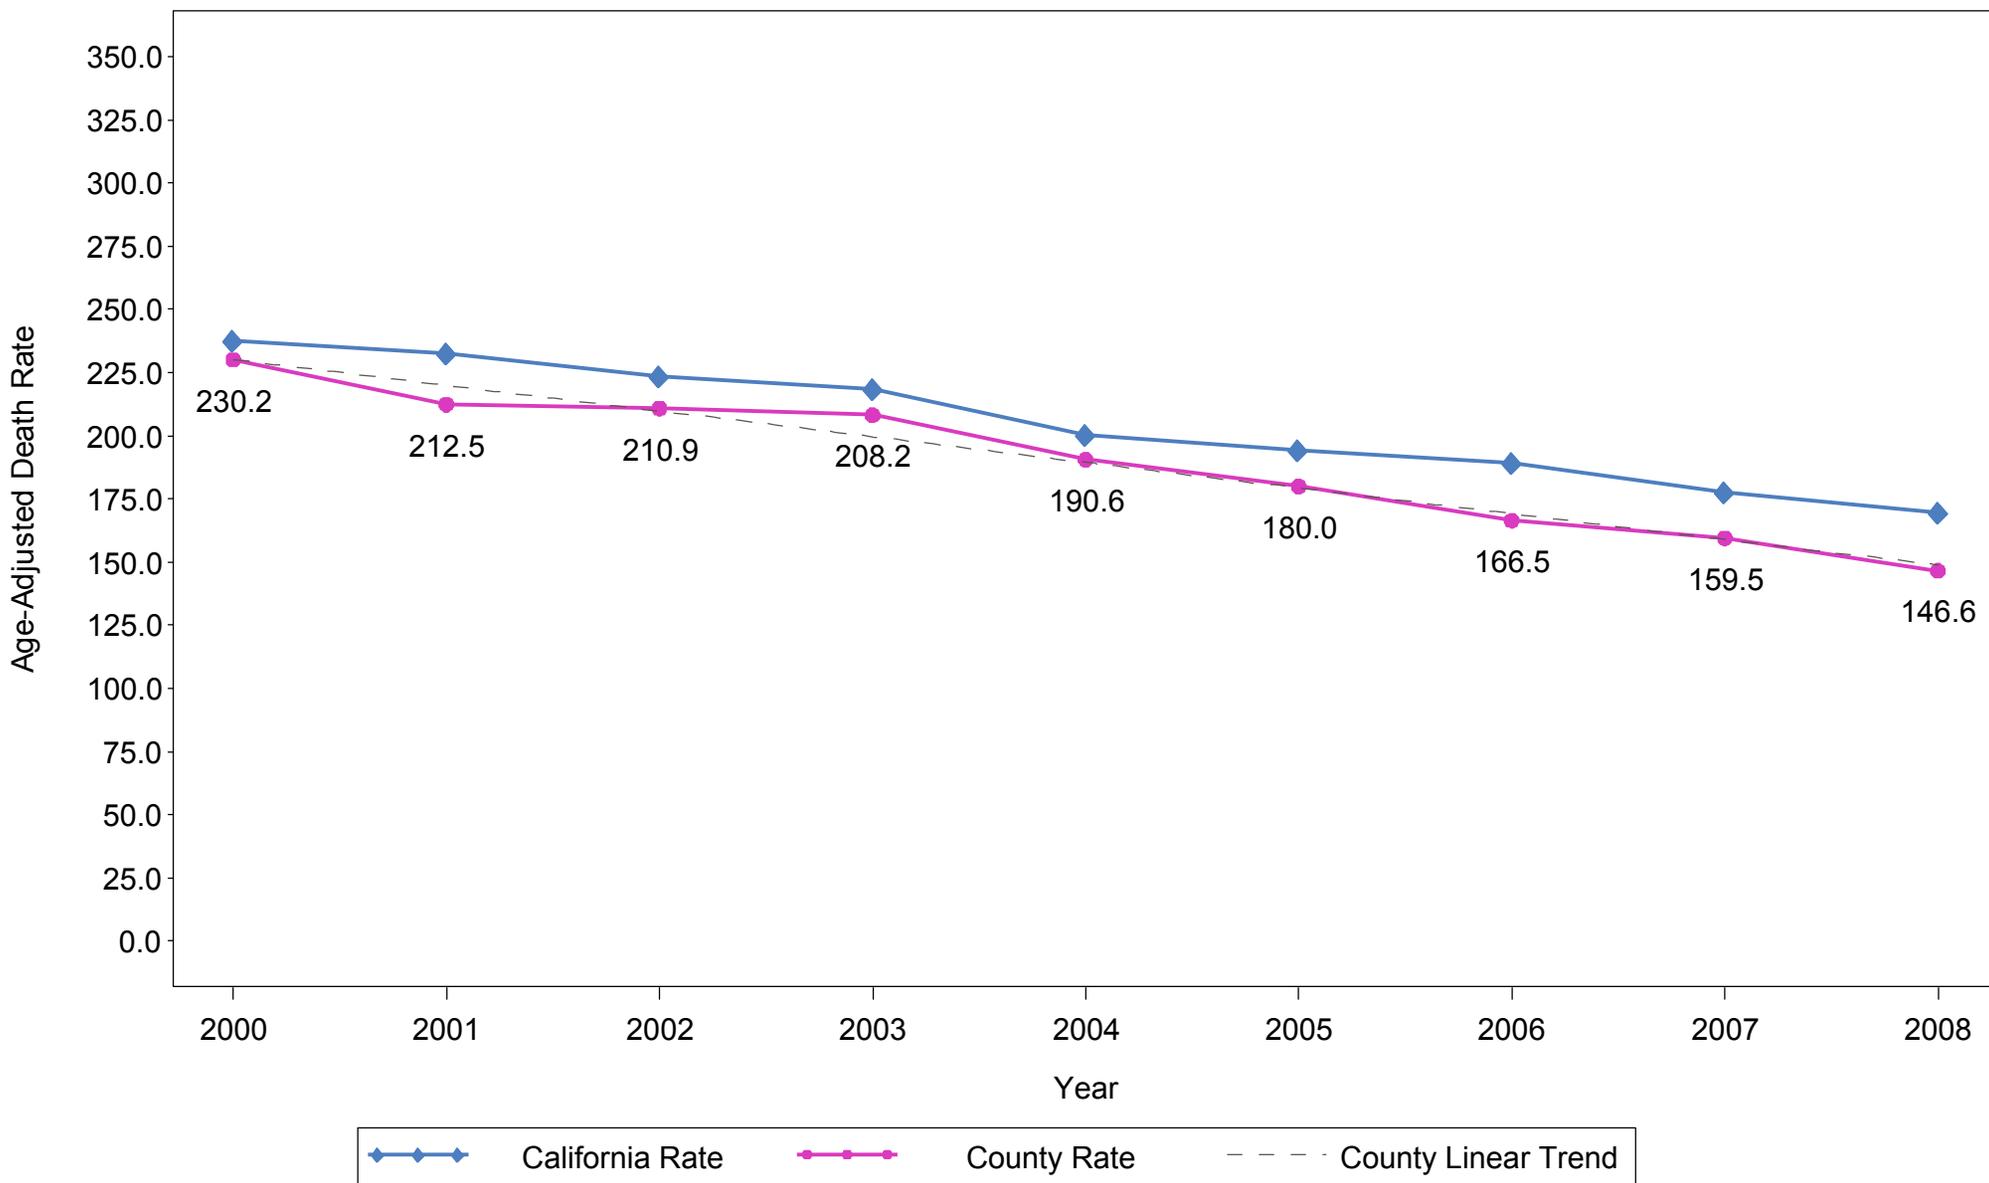

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records

California Department of Finance, Race/Ethnic Population with Age and Sex Detail, 2000-2050. Sacramento, CA, July 2007.

Note: Rates are per 100,000 population and are age-adjusted using the year 2000 U.S. standard population. Refer to Table 5 for age-adjusted rates by county of residence.

Heart Disease Age-Adjusted Death Rates, 2000-2008  
Solano County

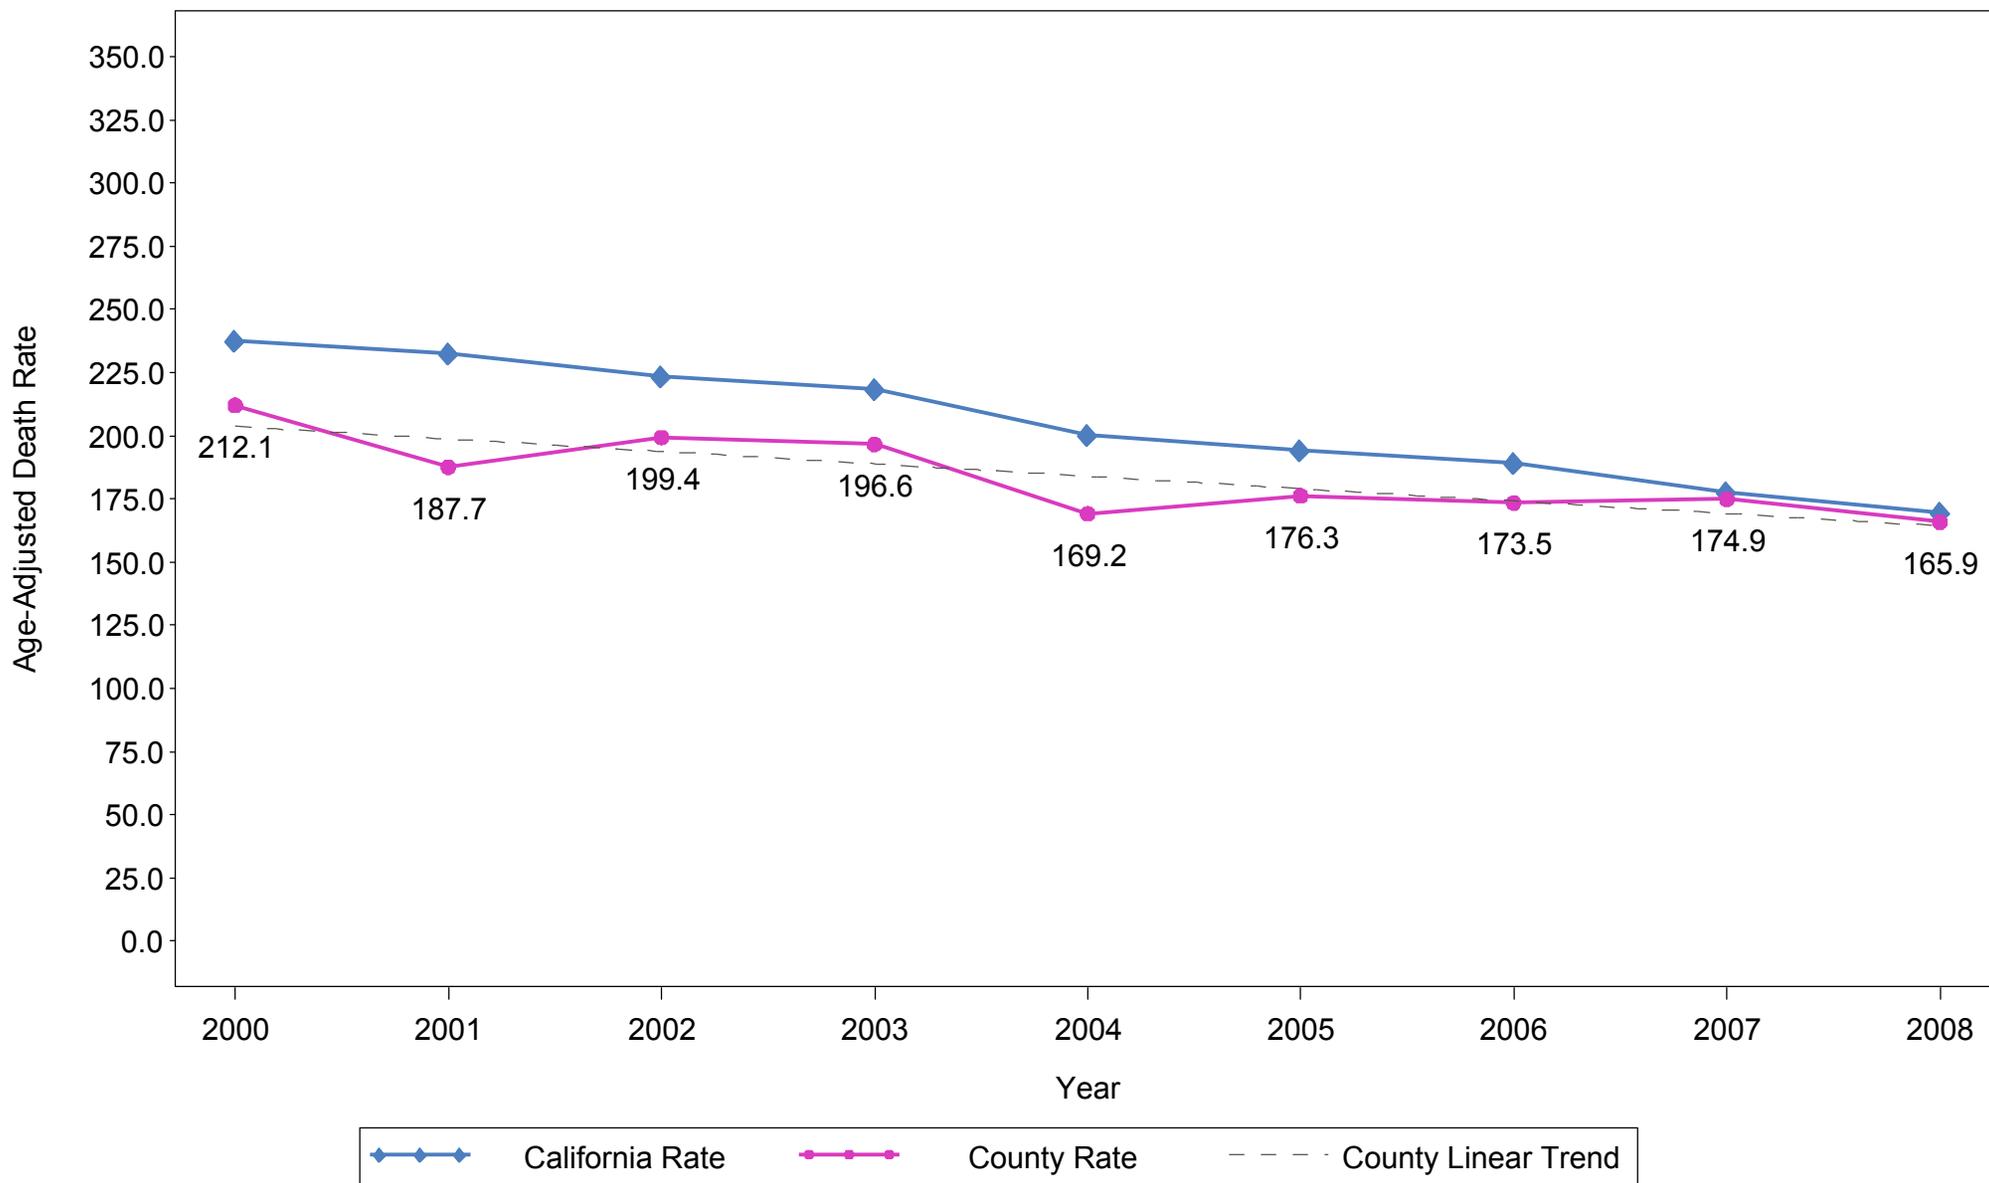

County showed a statistically significant trend over the period examined. See Technical Notes for information about statistical significance.

Sources: California Department of Public Health, Death Records
