Treatment type (drug & dosage)		X				
Treatment date		X				
Provider name						X
Laboratory name						X
Reported by						X
Symptoms ⁵		X				
Partner management ⁵		X				
Tier 3						
ALL other Fields						

Notes:

1 - CaIREDIE System Required Field, i.e. the case cannot be submitted without these fields completed.

2 - Includes "Unknown" option.

3 - Autopopulated by system, but can be changed as needed.

4 - If only a lab slip is received (no CMR) or it is received first, please populate "date of diagnosis" with "date of specimen collection".

5 - Data are not currently adequately completed by providers to be useful, however LHJs may want to make this a priority and place effort into collecting reliably.

6 - The Laboratory Info tab is populated by ELRs.

7 - The Health Dept Follow-up tab replaces the STD Field Record and can also be used to collect patient HIV test, status and linkage to care information.

* Some fields (in particular, address and race/ethnicity) may not be available if only a lab report is received

† Valuable demographic and source data that should be entered for all cases if resources permit
