Tuberculosis Control Branch

### Schedule for Reporting Contacts to Tuberculosis (TB) Cases in California

The Aggregate Reports for TB Program Evaluation: Follow-up and Treatment for Contacts to TB Cases (ARPE) are submitted to the California Tuberculosis Control Branch (TBCB) in preliminary and final full-year cohorts. Six-month cohort reports are no longer required.

Some local health jurisdictions (LHDs) may wish to continue to track contact investigation in six-month cohorts. Upon request, TBCB can provide line listings of cases for contact investigation in six-month cohorts.

<b>Cohort Year</b> <i>Report contacts to cases counted in calendar year:</i>	<b>Preliminary or Final Form</b>	<b>Date of Request</b> <i>TBCB emails line listings to LHDs by:</i>	<b>Date Due</b> <i>LHDs submit ARPE form to TBCB by:</i>
