

Change Cycle Notice – Effective June 3, 2013

Background

It is mandated by the USDA that blood work data is collected by WIC agencies for participants who are enrolled or without current bloodwork. The Blood Work Pilot project will provide Pronto devices for hemoglobin screening to a select group of agencies. For further background information, please refer to PWPC LASB#: 05-17-13-027: "CA Bloodwork Pilot Protocol and Additional Information".

ISIS Changes

As part of the Bloodwork Pilot project a field has been added to the Integrated Statewide Information System (ISIS) effective June 3, 2013 that will require that the user indicate whether or not a Pronto device was used to collect hemoglobin data. The Pronto Indicator field will be located on the Health Information Screen (Figure A) and the Lab Results screen (Figure B). ISIS will require that either a "Y" for Yes or an "N" for No is entered into the Pronto Indicator field if hemoglobin data has been entered for all participant types. If your agency is **not** part of the Bloodwork Pilot project and is not using Pronto device, then simply enter "N" for No in the Pronto Indicator field.

Existing Records

Existing records with hemoglobin entries on the Lab Results screen will have the Pronto field populated with an “N” for all records with a Record Create Date of January 1, 2008 or later.

Reporting

The value from the Pronto Indicator field will be available for reporting in the WIC Information Exchange (WIX) along with other Lab data in the Agency Snapshot Universe effective August 10, 2013.

Questions

If you have questions about the Pronto Indicator field or reporting, contact the ISIS Help Desk at 1-800-224-7472. If you have other questions regarding the Bloodwork Pilot Project, contact Denay Mintz at (916) 928-8762.
