

2. Turbo Error when Adding Weight to BF/Non-BF Participant Types

When attempting to add the weight for Breastfeeding/Non-Breastfeeding participant type on the Breastfeeding/Non-Breastfeeding Weight (ICC35M01) (Figure B) screen users would receive a Turbo error when trying to progress through the Change process. Only records that had the weight information initially left blank during the Certification process were affected. This issue has been resolved and the fix will be effective 7/1/13.

3. Remove Individual Comment to Record Health Questions – Infant Screen Entries

Beginning June 3, 2013, ISIS began creating Individual Comments to record the entries on the Health Questions – Infant (ICE41M01) screen for research purposes. It has been determined that this functionality is no longer necessary and the functionality will be removed. Effective 7/1/13, Individual Comments will not be added to record information entered on the Health Questions – Infant screen.

4. Add edits to the ISIS Change Certification Dates (ICC14M01) and Transfer Individual (ITR21M01) screens to prevent a certification end date that is later than a child's 5th birthday.

In ISIS there is nothing to prevent the entry of a certification end date that is later than the child's 5th birthday on the Change Certification Dates and Transfer Individual screens. An edit will be added to ISIS that will prevent a certification date end date from being later than the last day of the month in which the child turns 5 years old.

5. Add "T" for Pregnant Teen as a Source of Address Documentation

"T" for Pregnant Teen will be available as a source of Address Documentation on the Certify and Change Family (ICE11M01 (Figure C & D) and ICC10M01) screens effective 7/1/13. This value is already allowed as a source of income documentation.
