2. Red P On WIC Family Profile Screen Due To A File Fix To Delete Existing Prescriptions

There was a file fix to delete any unissued Child prescriptions from the June 2014 prescription month forward. The IT packages were included in the file fix. See below for an example of the WIC FAMILY PROFILE screen with the red P.

The food packages that were deleted in the file fix are as follows:

IT4W, IT4L, IT4S, IT4C, IT4P, IT4G, IT4A, CT4W, CT4X, CT4L, CT4S, CT4C, CT4P, CT4G, CT4A, CF4C, CF4P, CF4G, CF4A, CP4, CP4X, CP4L, CP4S, CT4H and CP4H.

Note: The red P on the WIC Family Profile **only** displays if the current month prescription has not been issued. **Please remember that when a Food Prescription is deleted, ISIS reverts back to the default package for that individual's category.** For example, if a child had a therapeutic food package of CF4A, after the file fix when local agencies access the record through Change, it would default back to CP4.
