Enhancements

This section is used to describe changes made that were **not** as a result of a defect.

1. Food Changes - 2% Milk No Longer Allowed For Women and Children Age 2 and Over

CURRENT:	USDA's Final Rule revising the WIC FOOD PACKAGES eliminates the 2% reduced fat milk as the standard option for women and children age 2 and over. The Final Rule requires that only lowfat (1%) or nonfat milk be the standard issuance for women and children age 2 and over.
CHANGE:	The new milk wording began printing on FIs on October 1st, 2014.

Below is an example of an FI with the new lowfat (1%) / nonfat milk wording:

Fixes

This section is used to describe fixes made that were a result of a defect.

1. Prepare Family Packages Screen - Certification Period FI's Issued Message

PROBLEM:	If an S is placed next to an individual's name and the F6 key is pressed, AND all of the FIs have been issued for the individual's certification period, ISIS returns the cursor to the NUMBER OF MONTHS TO ISSUE field.
RESOLUTION:	ISIS now displays the following message: ALL CHECKS ARE ISSUED IN THIS CERT PERIOD. CAN'T CHANGE ISSUED PRESCRIPTIONS.

2. Invalid Category Message When Trying To Change Categories in the Change Breastfeeding/Non-Breastfeeding Summary Screen

PROBLEM:	When trying to change categories from B to N or N to B in the Change Breastfeeding/Non-Breastfeeding Summary screen, the following error message is incorrectly displayed: CANNOT CHANGE CATEGORY TO ~1. EXIT AND CERTIFY INDIVIDUAL.
RESOLUTION:	ISIS no longer displays this erroneous message.

3. Prenatal Weight Gain Screen

PROBLEM:	The Prenatal Weight Gain screen displays the BMI number for the individual but it does not display the associated literal description of the BMI number.
RESOLUTION:	ISIS now displays the literal description for all BMI numbers.

RESOLUTION:	<p>ISIS now displays a message that clearly identifies the problem:</p> <p>NO PRINTERS OF TYPE 'P' HAVE BEEN ASSIGNED TO THIS CLINIC.</p>
