

New VWIX FTPS Details

VWIX FTPS Changes: Prior to March 23, 2016, the following changes need to be made to FTPS scripts:

- 1) Change the host name to ftp.vwix.ca.gov
- 2) Change the user ID to the new VWIX user ID that starts with the letter "F"
- 3) Change the password to the respective new password
- 4) Delete the command to change to a directory/folder on the host system
- 5) Delete quotation marks around the file name
- 6) Delete the SITE command (if this option was used for your previous VWIX script)

#	Option	Detail	Comment
1	Host Name	ftp.vwix.ca.gov	The host name ftp.vwix.ca.gov will resolve to the TCP/IP address of 67.157.110.14
2	Transfer Mode	ASCII	ASCII Text File (Not Binary)
3	TCP Ports	TCP port 21 to destination ftp.vwix.ca.gov TCP port 50200 through 50399 to destination 67.157.110.14	
4	SSL Option	AUTH SSL (Explicit)	If your FTP client allows you to turn off "SSL Listings" or "SSL Transfers," make sure to keep it turned on.
5	Connection Mode	PASV or Passive	
6	File Name Convention	Create and send each file with a unique file name.
