

September 20, 2012

In an abundance of caution, Fair Oaks Farms is recalling raw ground beef with the code dates 243 (manufactured on August 30, 2012). OSI West Jordan, establishment 104U received raw materials from an establishment that is recalling beef trimmings due to the potential of *E.coli* O157:H7 contamination. Your raw ground beef product (as indicated below) was manufactured with these beef trimmings. The beef materials are received with a certificate of analysis (COA) for *E.coli* O157:H7, with negative results. In addition to the COA, OSI West Jordan has a robust sample and testing program in place for your finished product for *E.coli* O157:H7. All of the tests on your finished product from code date 243 tested negative.

If you have any further questions, please call Sharon Birkett at 630.851.6600 or Annette Stich at 262.947.0320
