2. Federal Cross-Cutting Requirements Certification

Federal “Cross-Cutting Requirements” are those provisions in federal law which “apply by their own terms” to projects and activities receiving federal financial assistance. While some of these requirements apply to any project utilizing federal funds, many of these will not be applicable to a short term planning study. If, however, the water system plans to seek construction funding for the project from the SDWSRF these requirements should be reviewed to determine which, if any, will apply to the proposed construction project.

In order to enter into a SDWSRF funding agreement with the Department of Public Health for a project that is subject to the Federal Cross-Cutting Requirements, a water system is required to certify that they are in compliance with each of the following federal regulatory requirements:

Environmental Authorities

1. Archeological and Historic Preservation Act of 1974, Pub. L. 86-523, as amended
2. Clean Air Act, Pub. L. 84-159, as amended

Applicants must be able to demonstrate to CDPH that they have procedures in place to select a firm with the proper expertise and experience. Failure to select a qualified firm may compromise the applicant’s grant funding eligibility.

§63011. Planning Funding.

***Subsection (d).** When contracting for architectural, landscape architectural, professional engineering, environmental, land surveying, and project management services for any part of a project for which **grant funding** is awarded, the applicant shall implement procedures that assure the services are engaged on the basis of demonstrated competence and qualifications for the types of services to be performed, and at reasonable prices.*

§63052. Construction.

***Subsection (c).** When contracting for architectural, landscape architectural, professional engineering, environmental, land surveying, and construction project management services for any part of a project for which **grant funding** is awarded, the applicant shall implement procedures that assure the services are engaged on the basis of demonstrated competence and qualifications for the types of services to be performed, and at reasonable prices. At a minimum, for any individual or firm it proposes contracting with to provide construction project management services for a project, the applicant shall demonstrate to the Department that the individual or firm and its personnel carrying out onsite responsibilities for the project have expertise and experience in construction project design review and evaluation, construction mobilization and supervision, bid evaluation, project scheduling, cost-benefit analysis, claims review and negotiation, and general management and administration of a construction project.*
