Sweet Success: Insulin Pump Use in Pregnancy (Continuous Subcutaneous Insulin Infusion)

February 27, 2009
California Diabetes & Pregnancy Program
Staff Development
Mountain View Plaza
11255 Mountain View Ave., Suite 10
Loma Linda, CA 92354

A Regional Perinatal System Program supported in part through contracts with the state of California Department of Health Services: MCAH Branch, Title V Funds

Program Overview

This program is designed to provide training in the care of the woman with diabetes using insulin pump therapy (continuous subcutaneous insulin infusion) during pregnancy. It is intended for Sweet Success affiliate staff and healthcare providers who desire training and clarification in caring for women using insulin pump therapy who have a pregnancy complicated by diabetes. Attendees will have the option of using CSII (saline) during the training.

FACULTY

Dana Paul, MPH, RD, CDE
Clinical Manager
Animas Corporation

Ann LeComte, RN, BS, CDE
Clinical Manager
Animas Corporation

Course Objectives

Upon completion of this program, the participant should be able to:

Counsel women before, during, and after pregnancy about reducing long and short term risks of hyperglycemia during pregnancy through the use of insulin pump therapy (CSII)

State the Sweet Success blood glucose targets during pregnancy and lactation for women with diabetes on CSII

Describe a healthy eating plan for women with diabetes during pregnancy who are using an insulin pump

Explain how to safely and accurately use CSII to achieve normoglycemia
