~ Remember ~
- Baby teeth are important.
- Get a “Dental Home” for regular visits to the dentist.
- Make your child’s first visit by age one.
- Brush your child’s teeth every morning and night with a tiny dab of fluoride toothpaste.
- Limit sugary snacks, drinks and juices.

Adapted from Dept of Public Health San Bernardino County by the California Child Health & Disability Prevention Program Oral Health Subcommittee Revised 9/19/12
Fluoride Varnish is a new and easy way to help protect teeth against tooth decay!

- Is a protective coating that is painted on teeth to prevent tooth decay
- Is safe, quick and doesn't hurt
- Helps even if using fluoride drops, tablets, rinses, toothpaste or drinking fluoridated water
- Can be applied at Child Health & Disability Prevention (CHDP) visits and other medical and dental visits
- Works best when applied 2 or more times a year
- Can be applied as soon as the first tooth comes in
- May briefly coat teeth a slightly yellow color - brushing the next morning will return teeth to their normal color
