Homes built before 1978 may have lead in the paint.

Do not scrape or sand paint on your home unless you know it does not have lead in it.

Scraping and sanding old paint can create dangerous lead dust
Leak in dust is very harmful to young children and can cause lead poisoning. Lead can harm the brain, nerves, and kidneys of a young child. Lead poisoning can make it very hard for a young child to learn, pay attention, and behave.

You and your family can swallow or breathe in lead dust
You can breathe in lead dust while dry scraping or sanding. Others nearby can breathe it in too. Lead dust in the air can fall down into your food and drinks. Lead dust can get into your child’s body when they put things in their mouth that have lead dust on them, like their toys or hands.

Have your paint tested for lead
The only way to know if your home has lead in the paint is to have it tested. For information about testing, go to www.cdph.ca.gov/Programs/CDPHP/DEODEC/CLPPB/Pages/home_test.aspx

Keep your family safe from lead
Hire a CA State Certified lead professional. These contractors are specially trained to test for lead in your home and safely remove it. To find a certified lead professional, go to www.cdph.ca.gov/Programs/CDPHP/DEODEC/CLPPB/Pages/LRCiare_Lead_prof.aspx or call 1-800-597-LEAD (5323).

While only CA State Certified lead professionals can find and remove lead from your home, all contractors hired for home repairs must get U.S. Environmental Protection Agency approved training to keep lead from spreading while they work. To find a contractor with this basic training, go to http://cfpub.epa.gov/rlpp/searchrp_firm.htm or call 1-800-424-LEAD (5323).

If you do not plan to hire a contractor, follow these tips to help contain lead dust while you work:

Before you work
• Remove everything you can from the work area, like rugs, curtains, furniture, toys, clothes, shoes, food, and drinks.
• Tape down heavy plastic sheeting for both inside and outside jobs. Cover the floor, big furniture, play structures, and nearby outside surfaces, like grass or concrete.
• Turn off the heater or air conditioner.
• Tape plastic over vents in the floor, ceiling, or walls.

After you work
• Make a curtain by taping plastic sheeting over the doorway to the work area.
• Put on work clothes and keep them separate from all other clothes.
• Remove work clothes and shoes and store them in a bag. Wash work clothes separately from the rest of your family’s laundry.
• Shower and wash your hair as soon as you finish working.
• Do not let children or pregnant women into the work area until you have cleaned it up.

If you think that your child or other family member has been around lead, ask your doctor to test for lead poisoning.

For more information on childhood lead poisoning, go to www.cdph.ca.gov/programs/clppb or call 1-510-620-5600.

If you do not plan to hire a contractor, follow these tips to help contain lead dust while you work:

Before you work
• Remove everything you can from the work area, like rugs, curtains, furniture, toys, clothes, shoes, food, and drinks.
• Tape down heavy plastic sheeting for both inside and outside jobs. Cover the floor, big furniture, play structures, and nearby outside surfaces, like grass or concrete.
• Turn off the heater or air conditioner.
• Tape plastic over vents in the floor, ceiling, or walls.

After you work
• Clean up the work area daily.
• Use a spray bottle to mist work clothes and shoes with water before and during sanding and scraping.
• Avoid tracking lead dust away from the work area:
- Do not leave the work area in your work clothes and shoes.
- Take off work clothes and shoes, wash your hands, and leave the work area before eating, drinking, or smoking.

If you think that your child or other family member has been around lead, ask your doctor to test for lead poisoning.
