Dust and dirt with lead can hurt.

Keep kids away from lead where they play.
Lead may be in dust and dirt from the past use of lead in gasoline, house paint, and factories.

Here is what you can do to protect your child from lead:

- Wash your child’s hands and toys often.
- Use a damp cloth or mop to clean windowsills and floors.
- Cover bare dirt in your yard with plants or a ground cover.
- Ask your child’s doctor about testing for lead. Most children get tested at 1 and 2 years.
