

# California Safe Cosmetics Program

## For Cosmetics Companies - Are You Required to Report Product Ingredient Information in California?

The following questions will help determine if you must report a product to the California Safe Cosmetics Reporting Portal:

- Does your company make \$1,000,000 or more annually in worldwide aggregate cosmetic sales?
- Does your company's name appear on the label of a cosmetic product sold in California after January 1, 2007?
- Do any of these cosmetics contain an ingredient identified as a known or suspected human carcinogen or reproductive toxicant?

Your company is subject to the mandatory reporting requirements of the CA Safe Cosmetics Act if you answered yes to all three of the above questions.
