

# SCAFFOLD SAFETY

## Things to do before giving this tailgate training

- ▶ Make sure the scaffolding company you hire uses a qualified person to supervise and sign off on the correct installation of the scaffolding.
- ▶ Review Key Training Points on the back of card 3a (different areas can be covered at several tailgates).
- ▶ Look up in the index of Cal/OSHA Pocket Guide for the Construction Industry *scaffolds* and read the pages listed ([http://www.dir.ca.gov/dosh/dosh\\_publications/ConstGuideOnline.pdf](http://www.dir.ca.gov/dosh/dosh_publications/ConstGuideOnline.pdf)).
- ▶ Download a copy of the video *Preventing Falls through Skylights* (see download instructions: <http://www.cdph.ca.gov/programs/ohb-face/Pages/SkylightAction.aspx>) onto a DVD or flash drive or view the video on YouTube: <http://dld.bz/c2bjp>.
- ▶ Make sure the computer you plan to show the video on has good speaker volume, and choose a viewing location that isn't too bright.
- ▶ Be prepared to discuss what happened in the video and what are your company's ways for preventing falls from scaffolding on this jobsite.
