In a recent incident, a 33-year-old tree trimmer, Matt A.*, died while he was chipping tree branches and lost his balance or his gloves were caught in the feed rollers. He was pulled through the machine. Matt was standing in front of the opening to the hopper feeding in small branches when the incident occurred.

<table>
<thead>
<tr>
<th>WHAT WENT WRONG?</th>
<th>WHAT SHOULD BE DONE?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Matt was unable to reach the safety stop bar.</td>
<td>Stand to the side of the chipper when feeding in material.</td>
</tr>
<tr>
<td>Matt was too close to the feed rollers.</td>
<td>Use a long branch or stick to push in small branches.</td>
</tr>
<tr>
<td>There was no one immediately available to help.</td>
<td>Have at least two workers for each chipper.</td>
</tr>
</tbody>
</table>

The California Fatality Assessment and Control Evaluation (FACE) program has been investigating work-related deaths since 1992. The goal of the FACE program is to prevent these deaths by informing workers and managers of worksite hazards and how to avoid them.

For complete fatality reports of this case (00CA010), or other cases, and additional information on the California FACE program, please contact:
California Department of Public Health
Occupational Health Branch (OHB), FACE Program
850 Marina Bay Parkway, Building P, 3rd Floor, Richmond, CA 94804
