

# Asthma-Safer Cleaning in our Classroom

OUR CLASSROOM IS HEALTHIER AND ASTHMA-SAFER AS PART OF THE

## 2019-2020 CLEANING FOR ASTHMA-SAFE SCHOOLS MICROFIBER PROJECT

Microfiber cloths can make cleaning easier and safer. We will clean with microfiber cloths for tasks like dusting and wiping desks after snack time or art projects. This simple change can help us use less cleaning and disinfecting chemicals, including disinfectant wipes. We will also keep products like wipes out of the landfill, because we can re-use microfiber hundreds of times.

Our class is taking an important step to use fewer products that can trigger and cause asthma. With this project, we are protecting the health of our teachers, students, volunteers, aides, and other school staff.
