

Fact Sheet

California Conference of Local Health Officers

Program Mission:

The mission of the California Conference of Local Health Officers (CCLHO) is to prevent disease and improve the health of all California residents. The Conference was established by statute in 1947 to advise the Department of Health Services (now the California Department of Public Health), other departments, boards, commissions, and officials of federal, state and local agencies, the Legislature and other organizations on all matters affecting health.

Program Description:

The membership of CCLHO includes the 61 legally appointed physician health officers in California, one from each of the 58 counties and the three cities of Berkeley, Long Beach and Pasadena. CCLHO provides a state/local forum for the discussion of significant health issues in order to develop recommendations for appropriate health policy. Its various program committees consider technical and policy issues in communicable disease control and prevention; chronic disease and injury prevention; environmental health; health equity; maternal, child and adolescent health; and health systems integration.
