

Adolescent Sexual and Reproductive Health, Del Norte County, 2016

Adolescence is the developmental period from ages 10 to 19. During adolescence and into early adulthood, the brain undergoes the last major period of growth and reorganization, resulting in an increased need for stimulation and changes in social and emotional information processing. Adolescence is a time for youth to explore their identity and values. Often this occurs in the context of peer relationships though parents and other adult figures remain influential. Although the morbidity and mortality rates increase sharply from childhood through adolescence, most youth fare well. Adolescence is a critical time for establishing patterns for a positive adulthood - including an active role in one's reproductive and sexual health.

Del Norte County Adolescent Birth Rate by Age Group, 2006 - 2016

Adolescent Births In Del Norte County

- Fewer than 50 births occurred in Del Norte County in 2016.
- Because the number of female adolescents aged 15-19 living in Del Norte County is small, trends in birth rates over time should be interpreted with caution as small changes in the number of births per year can have large effects on the birth rate.
- The adolescent birth rate has decreased 45.8% since 2006; the state decreased 61.0% over the same period.
- 57.7% of adolescent births in Del Norte County were to mothers who reported a White race. The state average was 11.2%.
- 57.7% of adolescent births in Del Norte County occurred in areas of concentrated poverty. The state average was 55.2%.
