Dashboard Instructions

This data dashboard consists of several elements, some of which are interactive. Below are general instructions on how to use this dashboard.

Filters

At the top left corner of the dashboard there is a filter that allows the user to select a specific fiscal year. Once the fiscal year is selected, the dashboard will automatically update to show only the data corresponding to that reporting period.

Download the Data

The underlying data for the dashboard can be downloaded as one comma-separated values (CSV) table which includes fiscal years, categories and subcategories, and the corresponding values (i.e., numbers and/or percentages, as applicable).
