

## Module 1: Hand Hygiene for EVS Staff Pre- and Post-Training Questions

**Facilitator notes:** Use the pre- and post-training questions below to gauge knowledge before and after each course. Note that this will add an additional 5-10 minutes before and after each module. You may alternatively use these questions for an optional post-training discussion. Results of these tests can help facilitators determine which infection prevention and control concepts were well-understood during the training session and which need additional time or training. To reduce potential test anxiety, let your staff know that these will not be graded. We suggest printing a copy of the pre- and post-training tests for each participant. Answers may be collected anonymously if preferred. Participants should have access to the correct answers after the tests are administered; facilitators may decide to review the questions and answers as a group.

### Module 1 Answer Key: Hand Hygiene for EVS Staff

Answers are bolded and marked with an asterisk (\*).

1. What are two ways to effectively clean your hands?
  - a. Use soap and facility approved hand lotion
