

Module 3: Setting Up a Cleaning Cart

Pre- and Post-Training Questions

Facilitator notes: Use the pre- and post-training questions below to gauge knowledge before and after each course. Note that this will add an additional 5-10 minutes before and after each module. You may alternatively use these questions for an optional post-training discussion. Results of these tests can help facilitators determine which infection prevention and control concepts were well-understood during the training session and which need additional time or training. To reduce potential test anxiety, let your staff know that these will not be graded. We suggest printing a copy of the pre- and post-training tests for each participant. Answers may be collected anonymously if preferred. Participants should have access to the correct answers after the tests are administered; facilitators may decide to review the questions and answers as a group.

Module 3 Answer Key: Setting Up a Cleaning Cart

Answers are bolded and marked with an asterisk (*).

1. Which of the following infection prevention items *should* you always have on your cart?
 - a. **Alcohol-based hand rub (ABHR)***
