

Pre- and Post-Training Questions

Module 7 Bathing and Dressing

Facilitator notes: Use the pre- and post-training questions below to gauge knowledge before and after each course. Note that this will add an additional 5-10 minutes before and after each module. You may alternatively use these questions for an optional post-training discussion. Results of these tests can help facilitators determine which infection prevention and control concepts were well-understood during the training session and which need additional time or training. We suggest printing a copy of the pre- and post-training tests for each participant. Answers may be collected anonymously if preferred. Participants should have access to the correct answers after the tests are administered; facilitators may decide to review the questions and answers as a group.

Module 7: Bathing and Dressing Answer Key

Answers are highlighted in yellow.

1. Good body washing practices can keep skin healthy and prevent the spread of infections.
 - a) True
 - b) False
2. Cleaning is the act of removing dirt, grime, and other material like blood or body fluids and is normally accomplished by: (Select all that apply)
 - a) Soap
 - b) Detergent
 - c) Water
 - d) Shaving Cream
3. You are about to give a resident a bath and will need to use the lift/transfer equipment to move the resident. When retrieving the lift/transfer equipment, you are unsure if it was cleaned after the last use. What should you do?
 - a) Find out who used the equipment last and ask if they cleaned it.
 - b) Clean and disinfect the equipment yourself, following the manufacturer's and your facility's guidelines.
 - c) Just use the equipment; it will not harm anyone since it is just used to lift the resident.
 - d) Decide not to use the equipment and give the resident a bed bath instead.
4. Changing a residents' clothing daily will help prevent the spread of disease.
 - a) True
 - b) False
