

Pre- and Post-Training Questions

Module 8 Nail Care and Shaving

Facilitator notes: Use the pre- and post-training questions below to gauge knowledge before and after each course. Note that this will add an additional 5-10 minutes before and after each module. You may alternatively use these questions for an optional post-training discussion. Results of these tests can help facilitators determine which infection prevention and control concepts were well-understood during the training session and which need additional time or training. We suggest printing a copy of the pre- and post-training tests for each participant. Answers may be collected anonymously if preferred. Participants should have access to the correct answers after the tests are administered; facilitators may decide to review the questions and answers as a group.

Module 8 Pre-Training Test: Nail Care and Shaving Answer Key

Answers are highlighted in yellow.

1. CNAs must perform hand hygiene before and after shaving a resident and at every resident encounter.
 - a) True
 - b) False

 - a) Use more aftershave
 - b) Perform hand hygiene using soap and water
 - c) Notify the nurse
 - d) B and C
3. In providing nail care to residents CNAs prevent bacterial and fungal growth under nails that may contribute to the spread of infection.
 - a) True
 - b) False
4. CNAs assisting residents with nail care and shaving help to:
 - a) Promote cleanliness
 - b) Make residents feel good by improving their appearance
 - c) Prevent bacterial and fungal growth under nails
 - d) All the above
5. CNAs should clean and disinfect personal care equipment according to facility policy and manufacturer's guidelines immediately after use.
 - a) True
 - b) False

Module 8 Pre-Training Test: **Nail Care and Shaving**

Name:

1. CNAs must perform hand hygiene before and after shaving a resident and at every resident encounter.
 - a) True
 - b) False

2. If a CNA accidentally cuts a resident's skin while shaving or performing nail care, which step(s) should they follow to minimize the spread of infection?
 - a) Use more aftershave
 - b) Perform hand hygiene using soap and water
 - c) Notify the nurse
 - d) B and C

3. In providing nail care to residents CNAs prevent bacterial and fungal growth under nails that may contribute to the spread of infection.
 - a) True
 - b) False

4. CNAs assisting residents with nail care and shaving help to:
 - a) Promote cleanliness
 - b) Make residents feel good by improving their appearance
 - c) Prevent bacterial and fungal growth under nails
 - d) All the above

5. CNAs should clean and disinfect personal care equipment according to facility policy and manufacturer's guidelines immediately after use.
 - a) True
 - b) False

Module 8 Post-Training Evaluation: **Nail Care and Shaving**

Name:

1. CNAs must perform hand hygiene before and after shaving a resident and at every
 - a) True
 - b) False

2. If a CNA accidentally cuts a resident's skin while shaving or performing nail care, which step(s) should they follow to minimize the spread of infection?
 - a) Use more aftershave
 - b) Perform hand hygiene using soap and water
 - c) Notify the nurse
 - d) B and C

3. In providing nail care to residents CNAs prevent bacterial and fungal growth under nails that may contribute to the spread of infection.
 - a) True
 - b) False

4. CNAs assisting residents with nail care and shaving help to:
 - a) Promote cleanliness
 - b) Make residents feel good by improving their appearance
 - c) Prevent bacterial and fungal growth under nails
 - d) All the above

5. CNAs should clean and disinfect personal care equipment according to facility policy and
 - a) True
 - b) False
