

California Nursing Home and Long-Term Care Facility Infrastructure and Preparedness Project
Request for Applications (RFA)

Award Decisions
Posted March 20, 2023

RFA 22-10924, "California Nursing Home and Long-Term Care Infrastructure and Preparedness," was publicly released on December 23, 2022. Applications were due by February 24, 2023. Thank you to all organizations that submitted an application.

As stated in the RFA, applications were first screened for compliance with the Application Format requirements. Applications for this RFA that did not pass the screening process included those 1) proposing activities involving facilities located in Los Angeles County and 2) failure to include a budget.

Applications that passed the initial screening were evaluated and scored according to published scoring criteria by a review committee comprised of subject matter experts from CDPH and representatives from other state agencies. To be eligible for funding, an application had to receive a score of 70 points or more. Following is the list of applicants recommended for funding by the review committee. Each will be contacted in the next few weeks with additional information and next steps. Congratulations to all the awardees!
