Baseline, Surveillance and Response-driven COVID-19 Testing of SNF Residents and Health Care Personnel (HCP)

**Baseline**
- Any SNF that does not currently have a known positive resident or HCP: conduct baseline testing for all residents and HCP.

**No cases identified on baseline testing**

**Surveillance**
- Any SNF that does not currently have a known positive resident or HCP: conduct weekly testing of 25% of all HCP including staff from multiple shifts and facility locations. The testing plan should ensure that 100% of facility staff are tested each month.

**Response**
- As soon as possible after one (or more) COVID-19 positive individual (resident or HCP) is identified in a facility, serial retesting of all residents who test negative upon initial testing should be performed weekly until no new cases are identified in two sequential rounds of testing.

**Symptomatic**
- Actively screen all residents and HCP for COVID-19 symptoms each day and test any resident or HCP who exhibits symptoms consistent with COVID-19.

**One (or more) positive resident or HCP identified**

**One (or more) positive HCP identified**

**No new cases identified in two sequential rounds of response-driven testing**
