Stakeholder 2 Comment

Good Morning,

I have experience in both in-patient psychiatric units with a 1:6 ratio and a free standing acute psychiatric hospital where Title 22 states 1 RN is required to be on the premises and units can be overseen by LVN's. Keeping safety as the number one priority I would propose:

Adults 1:10

Adol 1:8

Children 1:4

Keep the inpatient regulation regarding no more than 50% can be LVN's and require the use of an acuity tool for extra staff when needed.
