Surveyor: 37135
The following reflects the findings of the California Department of Public Health, during an Emergency Preparedness recertification survey. The findings are in accordance with 42 Code of Federal Regulations (CFR) 483.73, Requirement for Long Term Care (LTC) Facilities.

Representing the California Department of Public Health:
37135

Census: 88

E 039 EP Testing Requirements
CFR(s): 483.73(d)(2)

(2) Testing: The [facility, except for LTC facilities, RHICIs and OPOs] must conduct exercises to test the emergency plan at least annually. The [facility, except for RHICIs and OPOs] must do all of the following:

*For LTC Facilities at §483.73(d): (2) Testing. The LTC facility must conduct exercises to test the emergency plan at least annually, including unannounced staff drills using the emergency procedures. The LTC facility must do all of the following:

(i) Participate in a full-scale exercise that is community-based or when a community-based exercise is not accessible, an individual, facility-based. If the [facility] experiences an actual natural or man-made emergency that requires activation of the emergency plan, the [facility] is exempt from engaging in a community-based or individual, facility-based...

Disclaimer Clause: Preparation and/or execution of this plan of correction does not constitute admission and/or agreement with the facts alleged or conclusions set forth in this statement of deficiencies. This plan of correction is prepared and/or executed solely because it is required by the provision of federal and state law.

Administrator

E 039 Continued From page 2

Drills. This was evidenced by the absence of one of two disaster drills. This affected seven of seven smoke compartments and could result in a delayed response to a during an actual disaster due to lack of training.

Findings:

During document review and interview with the Maintenance Director 2/26/18, records of emergency preparedness training drills were requested.

1. At 10:30 a.m., records provided indicated that the facility completed one facility based drill on 2/6/18. Upon interview, the Maintenance Director confirmed the finding and stated that they did have a power outage on 12/12/17, but did not complete an after action report.

Response to K 161:

The Maintenance Services Department (MSD) sealed the penetrations for Items 1&2 on Feb. 27, 2018.

The MSD director and staff conducted facility inspection to ensure that all penetrations were sealed. Inspection completed with compliance on Feb. 28, 2018.

The MSD and staff were in-serviced on Mar. 6, 2018 re: maintenance of building construction and sealing of penetrations and a log was created to track and demonstrate compliance. The MSD shall submit logs to Administrator upon completion for compliance.

The Administrator or designee shall review audits to ensure sustained compliance. Results of these audits shall be forwarded to the QAPI committee and evaluated re: implementation and effectiveness.

Completion date: March 12, 2018
## Summary of Deficiencies

**Continued From page 5**

Plan of the building as appropriate. This REQUIREMENT is not met as evidenced by:

- **Surveyor:** 37135
- Based on observation and interview, the facility failed to maintain the building construction. This was evidenced by unsealed penetrations in the ceiling. This affected one of seven smoke compartments and could result in the spread of fire and smoke in the event of a fire.

### Findings:

During a tour of the facility and interview with the Maintenance Director on 2/26/18, the walls and ceilings were observed.

1. **At 11:56 a.m., the Business Office was observed.** There was an approximate 1/2 inch diameter penetration with two blue cords and one gray cord going through the ceiling area near the northeast wall. Upon interview, the Maintenance Director confirmed the finding.

2. **At 12:00 p.m., the Phone Panel Room was observed.** There was an approximate 1/2 inch diameter penetration with two blue cords going through the ceiling area near the south wall. Upon interview, the Maintenance Director confirmed the finding.

### Exit Signage

- **K 293**
  - **SS=E**
  - **CFR(s):** NFPA 101

Exit Signage 2012 EXISTING

Exit and directional signs are displayed in accordance with 7.10 with continuous illumination also served by the emergency lighting system.

The Maintenance Services Director (MSD) and staff inspected departmental documentation and initiated testing to ensure compliance. Inspection completed and facility compliance with testing since Dec. 7, 2018.

The MSD department and staff were inserviced on Mar. 6, 2018 to leave all facility documentation intact upon change of employment and to not abscond with facility documentation. The MSD/Administrator shall audit said documentation upon personnel turnover for compliance.

The Administrator or designee shall review audits to ensure compliance. Results of these audits shall be forwarded to the QAPI committee and evaluated re: implementation and effectiveness.

Completion date March 12, 2018.

- Provide in REMARKS information on coverage for any non-required or partial automatic sprinkler system.
- 9.7.5, 9.7.7, 9.7.8, and NFPA 25
- This REQUIREMENT is not met as evidenced by:
  - Surveyor: 37135
  - Based on document review, observation, and interview, the facility failed to maintain the automatic sprinkler system and its components. This was evidenced by a quarterly inspection/test report that were noted with deficiencies, the absence of 10 of 12 monthly inspections, and one sprinkler head that did not have the required 18 inch clearance. This affected seven of seven smoke compartments and could result in the malfunction of the sprinkler system in the event of a fire.
  - 19.3.5.1 Buildings containing nursing homes shall be protected throughout by an approved, supervised automatic sprinkler system in accordance with Section 9.7, unless otherwise permitted by 19.3.5.5.
  - 9.7.1.1* Each automatic sprinkler system required by another section of this Code shall be in accordance with one of the following:
    1. NFPA 13, Standard for the Installation of Sprinkler Systems
    2. NFPA 13D, Standard for the Installation of Sprinkler Systems in One- and Two Family Dwellings and Manufactured Homes
    3. NFPA 13R, Standard for the Installation of Sprinkler Systems in Residential Occupancies up to and Including Four Stories in Height

- The Maintenance Services Director (MSD) and staff were inspected the facility to ensure compliance with maintenance and testing of the sprinkler system. Inspection completed with full compliance on March 9, 2018.

- The MSD department were serviced on March 6-9, 2018 re: completion and compliance with vendor reports, facility obstructions, and maintenance of the sprinkler system. The MSD shall forward completed vendor report audits and facility inspection audits to Administrator for compliance.

- The Administrator or designee shall review audits to ensure sustained compliance. Results of these audits shall be forwarded to the QAPI committee and evaluated re: implementation and effectiveness.

- Completion date: March 12, 2018

- Inspected monthly to ensure that they are in good condition and the normal water supply pressure is being maintained.
- **13.3.2.1.1** Valves secured with locks or supervised in accordance with applicable NFPA standards shall be permitted to be inspected monthly.
- **13.3.2.2** The valve inspection shall verify that the valves are in the following condition:
  1. In the normal open or closed position
  2. Sealed, locked, or supervised
  3. Accessible
  4. Provided with correct wrenches
  5. Free from external leaks
  6. Provided with applicable identification

- **13.4.1.1** Alarm valves and system riser check valves shall be externally inspected monthly and shall verify the following:
  1. The gauges indicate normal supply water pressure is being maintained.
  2. The valve is free of physical damage.
  3. All valves are in the appropriate open or closed position.
  4. The retarding chamber or alarm drains are not leaking.

- **13.6.1.1.1** Valves secured with locks or electrically supervised in accordance with applicable NFPA standards shall be inspected monthly.

**Findings:**

During documentation review, a tour of the facility, and interview with the Maintenance Director on 2/26/18, the sprinkler system was observed and records were requested.
K 353 | Continued From page 14

1. At 10:12 a.m., a document titled, "Inspection, Testing, and Maintenance," was provided. The document indicated that the sprinkler system was inspected/tested on 1/15/18 by Sprinkler System Vendor 1. On page 3 of 3 of the documents, it indicated that the following three deficiencies were found:
   1 - Janitor closet head corroded,
   2 - Keep FDC clear of obstructions, and
   3 - Kitchen wall required clearance from sprinkler head. There was no documentation provided that indicated the repairs were made. Upon interview, the Maintenance Director confirmed the finding and stated they were working with vendor to make repairs.

2. At 11:23 a.m., records indicated that monthly visual inspections for the alarm and system riser check valves and pressure gauge for the following months were not completed: March, April, May, June, July, August, September, October, November, and December of 2017. Upon interview, the Maintenance Director confirmed the finding.

3. At 12:25 p.m., the sprinkler head located in the Gym Closet was observed. There were two leg braces stored at approximately five inches from the deflector. Upon interview, the Maintenance Director confirmed the finding.

Surveyor: 37135

Based on document review, and interview, the facility failed to maintain the automatic sprinkler system and it components. This was evidenced by a quarterly inspection/test report that were noted with deficiencies, and the absence of 10 of 12 monthly inspections. This affected two of two smoke compartments and could result in the malfunction of the sprinkler system in the event of a fire.

two of four AM, PM, and NOC shift drills that were not completed. This affected seven of seven smoke compartments and could result in staff being unprepared in the event of a fire.

19.7.1.6 Drills shall be conducted quarterly on each shift to familiarize facility personnel (nurses, interns, maintenance engineers, and administrative staff) with the signals and emergency action required under varied conditions.
19.7.1.8 Employees of health care occupancies shall be instructed in life safety procedures and devices.

Findings:

During document review and interview with the Maintenance Director on 2/26/18, the quarterly fire drill records were requested.

1. At 10:00 a.m., records provided indicated that the AM, PM, and NOC shift quarterly fire drills for the second and third quarter of 2017 were not completed. Upon interview, the Maintenance Director confirmed the finding and stated they could not locate the drill reports.

K 918 Electrical Systems - Essential Electric System

Response to K 712:
The facility identified the missing documentation issue and referred the item to the QAPI committee. This information and proof of identification of issue was shared and provided to the Life Safety Code evaluator on Feb. 26, 2018.

The Maintenance Services Director (MSD) and staff inspected departmental documentation from 4th quarter 2017 through Feb. 2018 to ensure compliance. Inspection completed with full compliance on Feb. 26, 2018.

The MSD and staff were inserviced on March 6, 2018 to leave all facility documentation intact upon change of employment. The MSD / Administrator shall audit documentation upon personnel turnover for compliance.

The Administrator or designee shall review audits to ensure sustained compliance. Results of these audits shall be forwarded to the QAPI committee and evaluated re: implementation and effectiveness.

Electrical Systems - Essential Electric System Maintenance and Testing

The generator or other alternate power source and associated equipment is capable of supplying service within 10 seconds. If the 10-second criterion is not met during the monthly test, a process shall be provided to annually confirm this.
Response to K 918:
The facility identified the missing documentation and referred the item to our QAPI committee. This information and proof of identification was shared with the evaluator on Feb. 26, 2018.

The Maintenance Service Director (MSD) and staff inspected departmental documentation from 4th quarter 2017-Feb. 2018 to ensure compliance. Inspection completed with full compliance on Feb. 26, 2018. Generator testing records have been in compliance since Dec. 2017.

The MSD department and staff were in-service on March 6, 2018 to leave all facility documentation intact upon change of employment. The MSD / Administrator shall audit documentation upon personnel turnover for compliance.

The Administrator or designee shall review audits to ensure sustained compliance. Results of these audits shall be forwarded to the the QAPI committee and evaluated re: implementation and effectiveness.

**Findings:**

During document review and interview with the Maintenance Director on 2/26/18, the records for the 40 kW diesel generator were requested.

1. At 9:50 a.m., the facility was not able to provide 51 weekly inspection records at the time of survey.

2. At 9:51 a.m., the facility was not able to provide 11 monthly full load test records at the time of survey.

Records provided indicated that the only inspection/test completed in the last 12 months was the annual 90 minute load back test, which was completed on 10/24/17.

Upon interview, the Maintenance Director confirmed the finding and stated that they could not locate the missing records.

**Electrical Equipment - Other**

List in the REMARKS section any NFPA 99 Chapter 10, Electrical Equipment, requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 10 (NFPA 99)
K 919 Continued From page 30

This REQUIREMENT is not met as evidenced by:
Surveyor: 37135

Based on observation and interview, the facility failed to maintain the electrical system and its components. This was evidenced by an obstructed electrical panel. This affected one of seven smoke compartments, and could result in an increased risk of an electrical fire.

19.5.1 Utilities. Utilities shall comply with the provisions of section 9.1
9.1.2 Electrical Systems. Electrical wiring and equipment shall be in accordance with NFPA 70, National Electrical Code, unless such installations are approved existing installations, which shall be permitted to be continued in service.

NFPA 70 National Electrical Code, 2011 edition
110.26 Spaces About Electrical Equipment. Access and working space shall be provided and maintained about all electrical equipment to permit ready and safe operation and maintenance of such equipment.

(A) Working Space. Working space for equipment operating at 600 volts, nominal, or less to ground and likely to require examination, adjustment, servicing, or maintenance while energized shall comply with the dimensions of 110.26(A)(1), (A)(2), and (A)(3) or as required or permitted elsewhere in this Code.

(1) Depth of Working Space. The depth of the working space in the direction of live parts shall not be less than that specified in Table 110.26(A) (1) unless the requirements of 110.26(A)(1)(a), (A)(1)(b), or (A)(1)(c) are met. Distances shall be measured from the exposed live parts or from the enclosure or opening if the live parts are
### Summary Statement of Deficiencies

#### K 919

Continued From page 31

(2) Width of Working Space. The width of the working space in front of the electrical equipment shall be the width of the equipment or 762 mm (30 in.), whichever is greater. In all cases, the work space shall permit at least a 90 degree opening of equipment doors or hinged panels.

#### Findings:

During a tour of the facility and interview with the Maintenance Director on 2/26/18, the electrical system and its components were observed.

1. At 11:50 a.m., the electrical panels in the TV Room were observed. The panel labeled AM was obstructed from access and view by three cardboard boxes that were stored directly in front of it. Upon interview, the Maintenance Director confirmed the finding.

#### Response to K 919:

The obstructions were removed on Feb. 26, 2018.

The Maintenance Services Director (MSD) and staff inspected all electrical panel rooms to ensure non-obstruction. Inspection completed with full compliance on Feb. 27, 2018.

The MSD department and staff were in-serviced on March 6, 2018 re: initiating an electrical panel room log to track and demonstrate compliance. The MSD shall conduct audits as necessary and at least quarterly for compliance.

The Administrator or designee shall review audits to ensure sustained compliance. Results of these audits shall be forwarded to the QAPI committee and evaluated re: implementation and effectiveness.

Completion date: March 12, 2018
