The following reflects the findings of the California Department of Public Health, during an Emergency Preparedness recertification survey. The findings are in accordance with 42 Code of Federal Regulations (CFR) 483.73, Requirement for Long Term Care (LTC) Facilities.

Representing the California Department of Public Health:
31:201

CFR(a): 483.73(b)(4)

1. How corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice.
   a. Policy and procedure regarding sheltering clients, staff and volunteers was created and implemented into the emergency preparedness binder and plan. 12/15/17

2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken;
   a. Residents who reside at St. Francis Pavilion have the potential to be affected. New policy and procedure regarding the sheltering of clients, staff and volunteers was endorsed through in-service to staff on 12/28/17 during our monthly all staff meeting and presented to the Quality Assurance Performance Improvement Committee on 12/29/17.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey, whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is required to continued program participation.
### Statement of Deficiencies and Plan of Correction

**Provider Name:** St. Francis Convalescent Pavilion  
**Address:** 50 Escuela Drive, Daly City, CA 94015

**Initial Comments:**  
K3 Building: 01  
K6 Plan Approval: 7/18/1973  
K7 Survey Under: 2012 EXISTING  
K12 Structure Type: TWO STORIES with PARTIAL BASEMENT, CONSTRUCTION TYPE III, FULLY SPRINKLERED  
The following reflects the findings of the California Department of Public Health, Office of Statewide Health Planning and Development (OSSHPD), as part of the annual survey of the facility. The findings were reviewed and the provider was given an opportunity to discuss them. The provider was also informed of the right to request an administrative hearing.

**Deficiency:** E 022  
Continued From page 1  
Hospice employees who remain in the hospice. This REQUIREMENT is not met as evidenced by:  
Based on record review and interview, the facility failed to provide policies and procedures for sheltering in place for staff and residents. This was evidenced by no documentation of shelter-in-place policies and procedures. This could result in an increased risk of harm to residents and staff in the event of an emergency that required sheltering-in-place for a given period of time.

**Findings:**  
During document review with the Administrator on 12/14/17, the emergency preparedness plan was reviewed.

1. At 3:15 p.m., the facility's emergency preparedness plan failed to have policy and procedures to address a means to protect their clients, staff, and volunteers when sheltering in place during a disaster. During interview with the Administrator, he stated he was not aware of this requirement of the emergency preparedness plan.

**Correction Plan:**  
A. The facility Administrator will review and update the facility’s emergency preparedness binder monthly to ensure all policies and procedures are current specifically the policy and procedure regarding sheltering of clients, staff, and volunteers.

B. How the facility plans to monitor its performance to make sure that solutions are sustained. The facility must develop a plan for ensuring that correction is achieved and sustained. The plan must be implemented, and the corrective action evaluated for its effectiveness. The POC is integrated into the quality assurance system.

   a. Administrator will report findings at the monthly QAPI meeting for three months and thereafter as determined by QAPI committee.

CALIFORNIA DEPARTMENT OF PUBLIC HEALTH
LICENSE NO: 20-29182

How corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice:

1. The two rolling carts were immediately moved to a new location not obstructing a fire extinguisher by Maintenance staff: 12/14/17
2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
   a. Residents who reside at St. Francis Pavilion have the potential to be affected. All other fire extinguishers in the facility were checked by maintenance staff to ensure they were not obstructed. No other obstructions were found: 12/14/17
   b. Employees were in-serviced to ensure fire extinguishers and all other fire protection system devices are not obstructed: 12/28/17
Continued From page 3

9.7.4.1 Where required by the provisions of another section of this Code, portable fire extinguishers shall be selected, Installed, Inspected, and maintained in accordance with NFPA 10, Standard for Portable Fire Extinguishers.

NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition
6.1.3.3.1 Fire extinguishers shall not be obstructed or obscured from view.

Findings:

During a tour of the facility with staff on 12/14/17, the portable fire extinguishers were observed.

1. At 11:10 a.m., a portable fire extinguisher was obstructed from immediate access by two rolling carts placed in front of the fire extinguisher. The Maintenance Director confirmed the finding.

K 920 SS=E

Electrical Equipment - Power Cords and Extens

Electrical Equipment - Power Cords and Extension Cords
Power strips in a patient care vicinity are only used for components of movable patient-care-related electrical equipment (PCREE) assemblies that have been assembled by qualified personnel and meet the conditions of 10.2.3.6. Power strips in the patient care vicinity may not be used for non-PCREE (e.g., personal electronics), except in long-term care resident rooms that do not use PCREE. Power strips for PCREE meet UL 1369A or UL 60601-1. Power strips for non-PCREE in the patient care rooms

K 920
1. How corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;

a. The identified extension cords and power strips were immediately removed by maintenance staff on 12/14/17.

b. The identified extension cords and power strips were immediately removed by maintenance staff on 12/14/17.

2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken;
**K 920** Continued From page 4

(Outside of vicinity) meet UL 1363. In non-patient care rooms, power strips meet other UL standards. All power strips are used with general precautions. Extension cords are not used as a substitute for fixed wiring of a structure. Extension cords used temporarily are removed immediately upon completion of the purpose for which they were installed and meets the conditions of 10.2.4.

10.2.3.6 (NFPA 99), 10.2.4 (NFPA 99), 400-8 (NFPA 70), 690.3(D) (NFPA 70), TIA 12-5

This REQUIREMENT is not met as evidenced by:

Based on observation and interview, the facility failed to maintain the electrical wiring. This was evidenced by the use of extension cords and power strips. This affected one of two floors and could result in the ignition of an electrical fire.

10.2.3.6 Multiple Outlet Connection. Two or more power receptacles supplied by a flexible cord shall be permitted to be used to supply power to plug-connected components of a movable equipment assembly that is rack-, table-, pedestal-, or cart-mounted, provided that all of the following conditions are met:

1. The receptacles are permanently attached to the equipment assembly.
2. The sum of the amperage of all appliances connected to the outlets does not exceed 75 percent of the amperage of the flexible cord supplying the outlets.
3. The amperage of the flexible cord is in accordance with NFPA 70, National Electrical Code.
4. The electrical and mechanical integrity of the assembly is regularly verified and documented.

**K 920**

- Residents who reside at St. Francis Pavilion have the potential to be affected. Patient rooms were checked to see if there were any other extension cords or power strips. No other extension cords or power strips were found.
- DSD/Designee in-serviced Licensed Nurses, CNA’s and other staff that medical equipment is not plugged into power strips or extension cords and must plug into the wall outlets as per Life Safety Code.
- What measures will be put into place or what systemic changes will the facility make to ensure that the deficient practice does not recur;
- The Maintenance Director or Designee will make daily rounds randomly checking patient rooms for extension cords and power strips.
- How the facility plans to monitor its performance to make sure that solutions are sustained. The facility must develop a plan for ensuring that correction is achieved and sustained. The plan must be implemented, and the corrective action evaluated for its effectiveness. The POC is integrated into the quality assurance system.
- Maintenance Director will report findings to the monthly QAPI meeting for three months and thereafter as determined by QAPI committee.

Findings:

During a tour of the facility and interview with staff on 12/14/17, the electrical wiring in the facility was observed and staff interviewed.

First Floor:

1. At 10:10 a.m., an IV pole and a suction pump machine were plugged into a power strip near Bed A in Room 109. When interviewed, the Maintenance Director stated that there were not enough wall outlets.

2. At 10:40 a.m., an IV pole was plugged into a power strip by Bed C in Room 134.

3. At 10:46 a.m., an oxygen concentrator was plugged into a power strip near Bed C in Room 134.

4. At 10:51 a.m., a C-Pap Machine and a cell phone charger were plugged into a brown extension cord in Room 141. When interviewed, the Maintenance Director was not aware of the brown extension cord in use and stated a family member may have brought it into the facility.
