## Local Rabies Control Activities 2016 Annual Report

Every year since 1987, the Director of the California Department of Public Health (CDPH) has declared all 58 counties in California as endemic for rabies, requiring each county to maintain a rabies control program per the California Health & Safety Code (§121690(e)). In 2016, approximately 300 city and county agencies in California conducted mandated rabies control activities, including issuing licenses to domestic dogs, providing “actual cost” public rabies vaccination clinics, and enforcing quarantine of animals following a reported bite incident. This report summarizes local rabies control activity data reported to CDPH for the year 2016.

Note: Data in this report are reproduced from collated reports submitted to CDPH from each California county and may not exhaustively reflect all rabies control activities conducted by all local agencies. Interpretation of reported data, including comparisons across jurisdictions and between years, should be conducted with caution.

**Appendix**  
**Definition of Terms for Part V.**

**10-day Quarantine, Biting Dogs and Cats:** The *California Compendium of Rabies Prevention and Control* indicates that “Domestic dogs and cats that bite or otherwise expose humans must be isolated in strict confinement and in compliance with the local health officer's isolation order. The biting dog or cat must be...observed daily for signs of rabies for ten (10) days following the exposure date, regardless of the animal's vaccination status”.

**30-Day Quarantine, Vaccinated Dogs and Cats:** The *California Compendium of Rabies Prevention and Control* indicates that “Any animal bitten by, scratched by, or having direct contact with a wild mammal (especially bats and skunks) that is not available for rabies testing should be regarded as having been exposed to rabies...Dogs, cats, and ferrets that are currently vaccinated should be revaccinated immediately and placed in strict isolation for 30 days.”

**180-Day Quarantine, Unvaccinated Dogs and Cats:** The *California Compendium of Rabies Prevention and Control* indicates that “Unvaccinated dogs, cats, and ferrets exposed to a rabid or suspect rabid animal should be euthanized immediately. An alternative to euthanasia is immediate vaccination of the animal and placement in strict isolation for six months (180 days)”.

**180-Day Quarantine, Domestic Livestock:** The *California Compendium of Rabies Prevention and Control* indicates that “Unvaccinated livestock bitten by or exposed to a rabid or suspect rabid animal should be euthanized...An alternative to euthanizing exposed livestock is to vaccinate the animal immediately with an approved vaccine and to place it in strict isolation for six months”.
