

# VARIANCE TO STAGE 2 OF CALIFORNIA'S ROADMAP TO MODIFY THE STAY-AT-HOME ORDER

COVID-19 VARIANCE ATTESTATION FORM

---

FOR County of Alameda

---

May 18, 2020

## Background

On March 4, 2020, Governor Newsom proclaimed a State of Emergency because of the threat of COVID-19, and on March 12, 2020, through Executive Order N-25-20, he directed all residents to heed any orders and guidance of state and local public health officials. Subsequently, on March 19, 2020, Governor Newsom issued Executive Order N-33-20 directing all residents to heed the State Public Health Officer's Stay-at-Home order which requires all residents to stay at home except for work in critical infrastructure sectors or otherwise to facilitate authorized necessary activities. On April 14<sup>th</sup>, the State presented the Pandemic Roadmap, a four-stage plan for modifying the Stay-at-Home order, and, on May 4<sup>th</sup>, announced that entry into Stage 2 of the plan would be imminent.

Given the size and diversity of California, it is not surprising that the impact and level of county readiness for COVID-19 has differed across the state. On May 7<sup>th</sup>, as directed by the Governor in Executive Order N-60-20, the State Public Health Officer issued a local variance opportunity through a process of county self-attestation to meet a set of criteria related to county disease prevalence and preparedness. This variance allowed for counties to adopt aspects of Stage 2 at a rate and in an order determined by the County Local Health Officer. Note that counties desiring to be stricter or move at a pace less rapid than the state did not need a variance.

In order to protect the public health of the state, and in light of the state's level of preparedness at the time, more rapid movement through Stage 2 as compared to the state needed to be limited to those counties which were at the very lowest levels of risk. Thus, the first variance had very tight criteria related to disease prevalence and deaths as a result of COVID-19.

Now, 11 days after the first variance opportunity announcement, the state has further built up capacity in testing, contact tracing and the availability of PPE. Hospital surge capacity remains strong overall. California has maintained a position of stability with respect to hospitalizations. These data show that the state is now at a higher level of preparedness, and many counties across the state, including those that did not meet the first variance criteria are expected to be, too. For these reasons, the state is issuing a second variance opportunity for certain counties that did not meet the criteria of the first variance attestation. This next round of variance is for counties that can attest to meeting specific criteria indicating local stability of COVID-19 spread and specific levels of county preparedness. The criteria and procedures that counties will need to meet in order to attest to this second variance opportunity are outlined below. It is recommended that counties consult with

cities, tribes and stakeholders, as well as other counties in their region, as they consider moving through Stage 2

## Local Variance

A county that has met the criteria in containing COVID-19, as defined in this guidance or in the guidance for the first variance, may consider modifying how the county advances through Stage 2, either to move more quickly or in a different order, of California's roadmap to modify the Stay-at-Home order. Counties that attest to meeting criteria can only open a sector for which the state has posted sector guidance (see [Statewide industry guidance to reduce risk](#)). Counties are encouraged to first review this document in full to consider if a variance from the state's roadmap is appropriate for the county's specific circumstances. If a county decides to pursue a variance, the local health officer must:

1. Notify the California Department of Public Health (CDPH), and if requested, engage in a phone consultation regarding the county's intent to seek a variance.
2. Certify through submission of a written attestation to CDPH that the county has met the readiness criteria (outlined below) designed to mitigate the spread of COVID-19. Attestations should be submitted by the local health officer, and accompanied by a letter of support from the County Board of Supervisors, as well as a letter of support from the health care coalition or health care systems in said county.<sup>1</sup> In the event that the county does not have a health care coalition or health care system within its jurisdiction, a letter of support from the relevant regional health system(s) is also acceptable. The full submission must be signed by the local health officer.

All county attestations, and submitted plans as outlined below, will be posted publicly on CDPH's website.

CDPH is available to provide consultation to counties as they develop their attestations and COVID-19 containment plans. Please email Jake Hanson at [Jake.Hanson@cdph.ca.gov](mailto:Jake.Hanson@cdph.ca.gov) to notify him of your intent to seek a variance and if needed, request a consultation.

County Name: County of Alameda

County Contact: Nicholas Moss, MD, MPH

Public Phone Number: 510 268-7635

## Readiness for Variance

The county's documentation of its readiness to modify how the county advances through Stage 2, either to move more quickly or in a different order, than the California's roadmap to modify the Stay-at-Home order, must clearly indicate its preparedness according to the criteria below. This will ensure that individuals who are at heightened risk, including, for example, the elderly and those with specific co-morbidities, and those residing in long-term

---

<sup>1</sup> If a county previously sought a variance and submitted a letter of support from the health care coalition or health care systems but did not qualify for the variance at that time, it may use the previous version of that letter. In contrast, the County Board of Supervisors must provide a renewed letter of support for an attestation of the second variance.

care and locally controlled custody facilities and other congregate settings, continue to be protected as a county progresses through California’s roadmap to modify the Stay-at-Home order, and that risk is minimized for the population at large.

As part of the attestation, counties must provide specifics regarding their movement through Stage 2 (e.g., which sectors, in what sequence, at what pace), as well as clearly indicate how their plans differ from the state’s order.

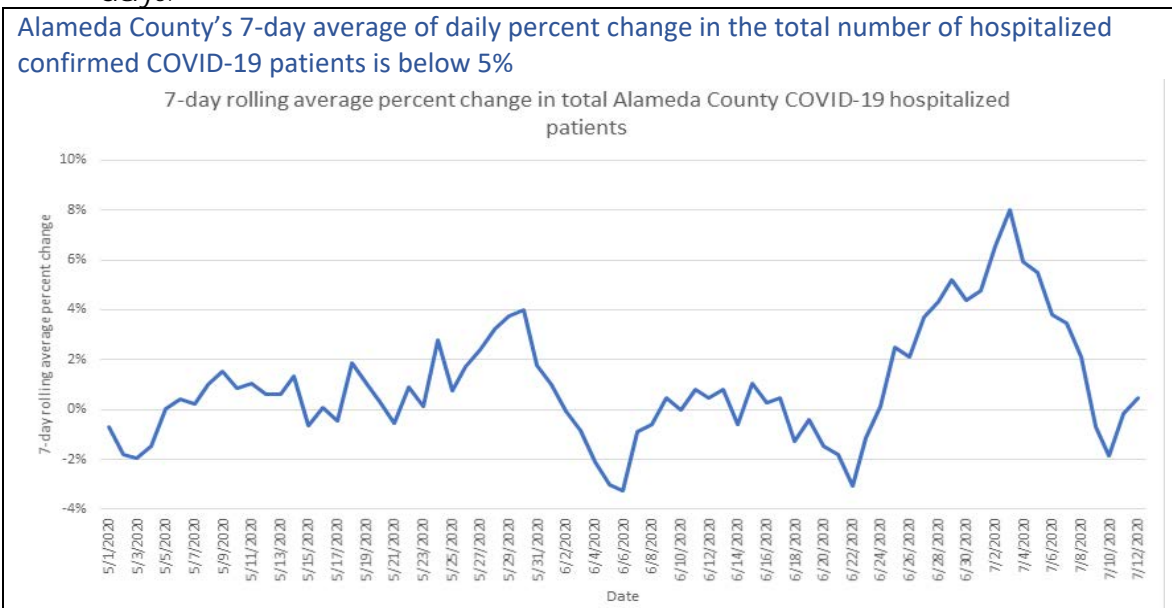

As a best practice, if not already created, counties will also attest to plan to develop a county COVID-19 containment strategy by the local health officer in conjunction with the hospitals and health systems in the jurisdiction, as well as input from a broad range of county stakeholders, including the County Board of Supervisors.

It is critical that any county that submits an attestation continue to collect and monitor data to demonstrate that the variances are not having a negative impact on individuals or healthcare systems. Counties must also attest that they have identified triggers and have a clear plan and approach if conditions worsen to reinstitute restrictions in advance of any state action.

**Readiness Criteria**

To establish readiness for a modification in the pace or order through Stage 2 of California’s roadmap to modify the Stay-at-Home order, a county must attest to the following readiness criteria and provide the requested information as outlined below:

- **Epidemiologic stability of COVID-19.** A determination must be made by the county that the prevalence of COVID-19 cases is low enough to be swiftly contained by reintroducing features of the stay at home order and using capacity within the health care delivery system to provide care to the sick. Given the anticipated increase in cases as a result of modifying the current Stay-At-Home order, this is a foundational parameter that must be met to safely increase the county’s progression through Stage 2. The county must attest to:
  - Demonstrated stable/decreasing number of patients hospitalized for COVID-19 by a 7-day average of daily percent change in the total number of hospitalized confirmed COVID-19 patients of <+5% **-OR-** no more than 20 total confirmed COVID-19 patients hospitalized on any single day over the past 14 days.

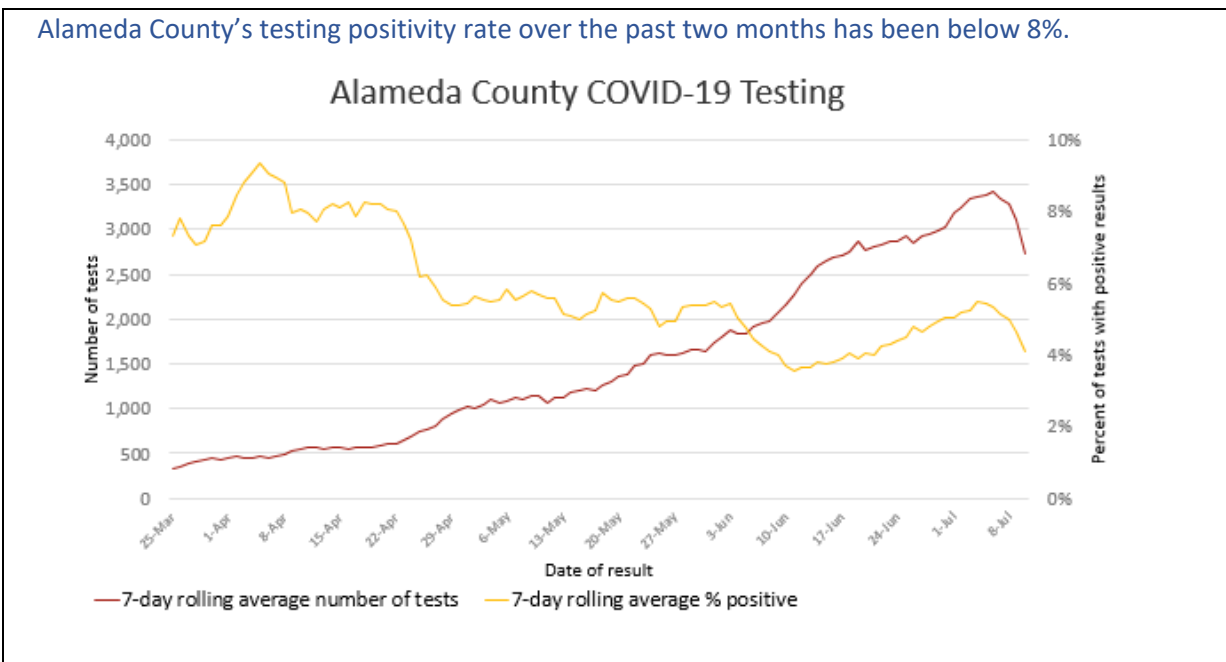

Daily % Change in COVID-19 Patients Hospitalized	
Date	% change
6-Jul	-2.7%
7-Jul	2.1%
8-Jul	-3.4%
9-Jul	-5.0%
10-Jul	3.0%
11-Jul	5.1%
12-Jul	4.2%
<b>7 day avg</b>	<b>0.5%</b>

- o 14-day cumulative COVID-19 positive incidence of <25 per 100,000 -OR- testing positivity over the past 7 days of <8%.

NOTE: State and Federal prison inmate COVID+ cases can be excluded from calculations of case rate in determining qualification for variance. Staff in State and Federal prison facilities are counted in case numbers. Inmates, detainees, and staff in county facilities, such as county jails, must continue to be included in the calculations.

Facility staff of jails and prisons, regardless of whether they are run by local, state or federal government, generally reside in the counties in which they work. So, the incidence of COVID-19 positivity is relevant to the variance determination. In contrast, upon release, inmates of State and Federal prisons generally do not return to the counties in which they are incarcerated, so the incidence of their COVID-19 positivity is not relevant to the variance determination. While inmates in state and federal prisons may be removed from calculation for this specific criteria, working to protect inmates in these facilities from COVID-19 is of the highest priority for the State.

- o Counties using this exception are required to submit case rate details for inmates and the remainder of the community separately.

Testing Positivity		
Date	% positive	#of tests
6-Jul	5.3%	3048
7-Jul	4.7%	3086
8-Jul	6.5%	4011
9-Jul	5.2%	3569
10-Jul	5.5%	4089
11-Jul	3.4%	2663
12-Jul	2.8%	2176
<b>7 day avg</b>	<b>5.0%</b>	<b>3235</b>

- **Protection of Stage 1 essential workers.** A determination must be made by the county that there is clear guidance and the necessary resources to ensure the safety of Stage 1 essential critical infrastructure workers. The county must attest to:
  - Guidance for employers and essential critical infrastructure workplaces on how to structure the physical environment to protect essential workers. Please provide, as a separate attachment, copies of the guidance(s).

Per [Health Office Order 20-04](#), Alameda County required all essential businesses to prepare and post by April 2, 2020 a Social Distancing Plan to include provisions for:

- i. Limiting the number of people who can enter into the facility at any one time to ensure that people in the facility can easily maintain a minimum six-foot distance from one another at all times, except as required to complete the Essential Business activity;
- ii. Where lines may form at a facility, marking six-foot increments at a minimum, establishing where individuals should stand to maintain adequate social distancing;
- iii. Providing hand sanitizer, soap and water, or effective disinfectant at or near the entrance of the facility and in other appropriate areas for use by the public and employees, and in locations where there is high-frequency employee interaction with members of the public (e.g. cashiers);
- iv. Providing for contactless payment systems or, if not feasible to do so, the providing for disinfecting all payment portals, pens, and styluses after each use;
- v. Regularly disinfecting other high-touch surfaces; and
- vi. Posting a sign at the entrance of the facility informing all employees and customers that they should: avoid entering the facility if they have a cough or fever; maintain a minimum six-foot distance from one another; sneeze and cough into one’s elbow; not shake hands or engage in any unnecessary physical contact.
- vii. Any additional social distancing measures being implemented see the Centers for Disease Control and Prevention’s [guidance](#)

We created a COVID Recovery team to offer guidance and technical assistance for safe reopening as we opened up more sectors of the economy. All businesses operating in Alameda County are required to have in place a [Site Specific Protection Plan](#), which includes employer attestation that they are familiar with our Shelter in Place and Face Covering orders and have in place the following to prevent and reduce the spread of COVID-19 in their workplace:

- Individual control measures and screenings
- Cleaning and disinfection protocols
- Schedule for disinfecting high traffic areas and commonly used surfaces
- Physical distancing guidelines
- Notification of COVID-19 positive cases at the worksite

- Training for employees

We also have specific guidance for food facilities and construction sites.

We maintain an updated list of [FAQs](#) for Health Officer orders to help inform the public about activities permitted or restricted per the orders.

A list of guidance and resources to ensure safe reopening and facilitate safe workplaces is available as Appendix A.

- Availability of supplies (disinfectant, essential protective gear) to protect essential workers. Please describe how this availability is assessed.

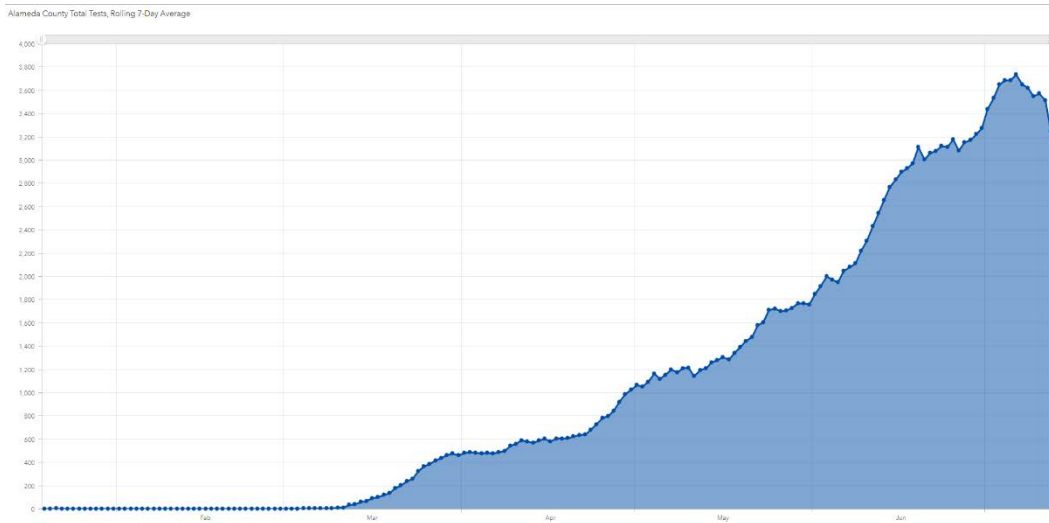

The Medical Health Branch at the EOC manages all requests for PPE including masks, gown, face shields, gloves and other items such as hand sanitizer, thermometers, sanitizing wipes. The PPE Prioritization Matrix below was developed based on facilities/professions with the highest need for infection control and/or high-risk exposures to COVID.

<b>Alameda County PPE Prioritization Matrix (June 2020)</b>	
Tier 1	Emergency/ Receiving Hospitals Medical First Responders (FIRE/EMS) Skilled Nursing Facilities (SNF) Long Term Care Centers (LTC) Home Health Care Clinics, Urgent Care Boarding/Home Health Care Facilities Covid-19 test site working directly with ALCO PH Outreach workers who are directly working with high risk populations
Tier 2	Other hospitals Non-Medical First Responders Hospice Dialysis Centers Surgery Centers Support Services for Tier I and II (Cleaning/disinfecting, drivers, deliveries) Jail
Tier 3	Standard transportation workers CBOs Dental Utilities (Power, Water, Waste management) Workers in public (Dock/ Port of Oakland, airport, construction)

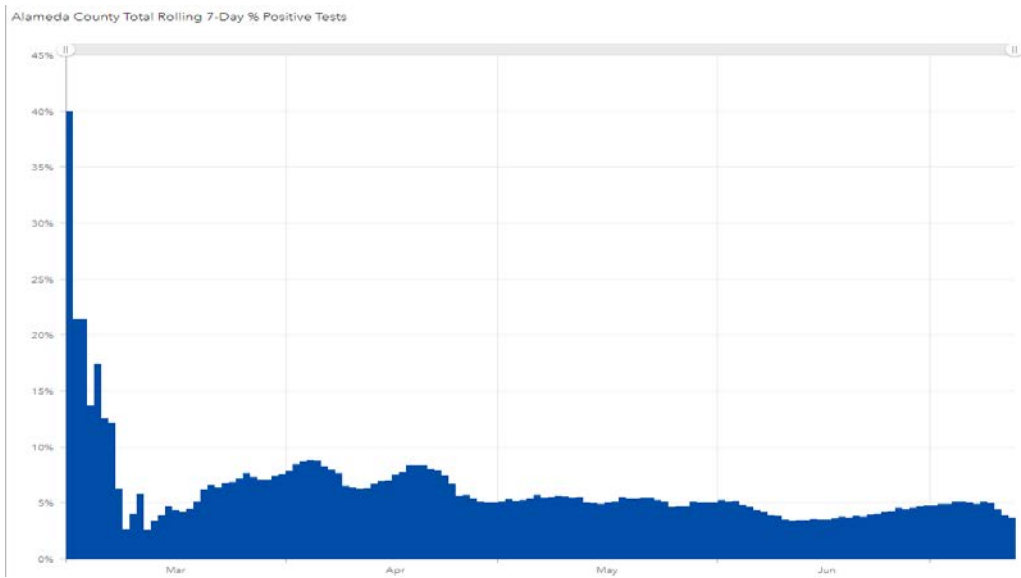

- **Testing capacity.** A determination must be made by the county that there is testing capacity to detect active infection that meets the state’s most current [testing criteria](#), (available on CDPH [website](#)). The county must attest to:

- o Minimum daily testing capacity to test 1.5 per 1,000 residents, which can be met through a combination of testing of symptomatic individuals and targeted surveillance. Provide the number of tests conducted in the past week. A county must also provide a plan to reach the level of testing that is required to meet the testing capacity levels, if the county has not already reached the required levels.

Alameda County currently has a minimum daily testing capacity of 2.0 per 1,000 residents, as we are exceeding our goal of 3,100 tests per day.

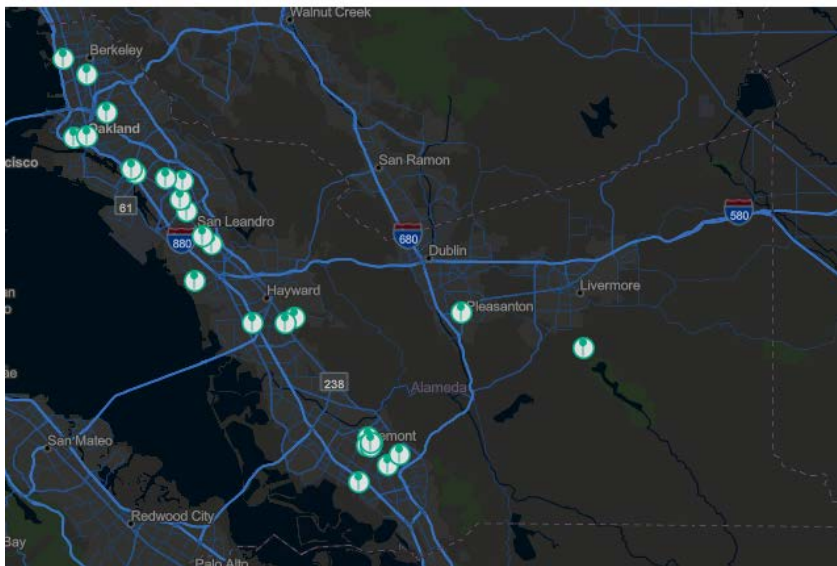

Our 7-day rolling average for testing positivity is has remained below 8% for the past two months.

Testing Capacity (pop: 1,561,333)		
Date	# of tests	tests/1000
6-Jul	3048	1.95
7-Jul	3086	1.98
8-Jul	4011	2.57
9-Jul	3569	2.29
10-Jul	4089	2.62
11-Jul	2663	1.71
12-Jul	2176	1.39
<b>7 day avg</b>	<b>3235</b>	<b>2.07</b>

- o Testing availability for at least 75% of residents, as measured by the presence of a specimen collection site (including established health care providers) within 30 minutes driving time in urban areas, and 60 minutes in rural areas. Please provide a listing of all specimen collection sites in the county and indicate if there are any geographic areas that do not meet the criteria and plans for filling these gaps if they exist. If the county depends on sites in adjacent counties, please list these sites as well.

At least 75% of our residents live within a 30 minute drive to a specimen collection site. We prioritized geographic equity alongside efforts to increase access to testing in communities with the high disease burden and transmission. The map below shows pins where testing is available.

A list of free community sites and urgent care sites is available as Appendix B.

- o Please provide a COVID-19 Surveillance plan, or a summary of your proposed plan, which should include at least how many tests will be done, at what frequency and how it will be reported to the state, as well as a timeline for rolling out the plan. The surveillance plan will provide the ability for the county to understand the movement of the virus that causes COVID19 in the community through testing. [CDPH has a community sentinel surveillance system that is being implemented in several counties. Counties are welcome to use this protocol and

contact [covCommunitySurveillance@cdph.ca.gov](mailto:covCommunitySurveillance@cdph.ca.gov) for any guidance in setting up such systems in their county.]

We support ten community testing sites across the county which are free of cost and open to anyone regardless of symptoms, immigration status, or insurance status. These sites have helped us surpass our goal of 2.0 tests per 1000 residents. Our Public Health Lab is also available to conduct testing as needed for outbreaks or other situations. We issued a \$20 M continuous RFP to expand mobile testing alongside increasing testing capacity in our community clinics and hospitals.

Screening Eligibility Criteria: Test all residents with focus on high risk individuals such as:

- All essential workers defined as those who can't work from home and must interact with public, all frontline workers (Fire, EMT's, Security, Police), all healthcare workers
- Anyone over the age of 65
- Anyone with chronic medical problems that impact the immune system
- Anyone with Covid19 symptoms

<b>Population</b>	<b>Community</b>	<b>Long Term Care:</b>	<b>Hospitals and Outpatient Sites:</b>
	30 testing sites/ 10 free community sites	a) *Licensed SNF Test staff monthly and residents (baseline and as needed) b) Assisted Living c) Other Congregate Settings	12 receiving hospitals 20+ clinics
Testing Goal	1500/day	*750/day	750 /day

\*Table does not include additional testing that occurs at homeless encampments, shelters, etc. Santa Rita Jail

- **Containment capacity.** A determination must be made by the county that it has adequate infrastructure, processes, and workforce to reliably detect and safely isolate new cases, as well as follow up with individuals who have been in contact with positive cases. The county must attest to:
  - o Enough contact tracing. There should be at least 15 staff per 100,000 county population trained and available for contact tracing. Please describe the county's contact tracing plan, including workforce capacity, and why it is sufficient to meet anticipated surge. Indicate which data management platform you will be using for contact tracing (reminder that the State has in place a platform that can be used free-of-charge by any county).

We have a team of 93 people working on case investigations and contact tracing (CI/CT), with another 40 people in the training pipeline, which equals 8.5 staff per 100,000. Our goal is to reach 300 CI/CT staff by October, which will be 19 staff per 100,000 residents.

We joined CalConnect in May and have almost completed our transition from paper-based CI/CT to the CalConnect data management platform. We are partnering with community-based organizations in a two-phase plan to expand staffing capacity and ensure cultural and racial sensitivity in our work. The first phase, launched in late June, includes emergency contracts with four clinical providers serving areas and communities experiencing high case rates. For the second phase, to be launched in August, we will issue an RFP for interested community partners who would either hire people or leverage their existing workforce to integrate with our case investigation and contact tracing program.

We're also transitioning to a modular team-based model for our CI/CT program. Each team includes a Team Lead, a Disease Containment Clinical Advisor, five full-time combination Case Investigator/Contact Tracers, and a Case Manager. The Team Lead and Case Manager support two teams, and the Clinical Advisor supports four teams. All members of each team are trained in contact

tracing, health coaching, health equity, and accessing social resources. All CI/CT staff are able to provide straight forward linkage to available resources.

Two teams are paired together, supported by the same Team Lead and Case Manager, so that they can easily share information, best practices, and provide backup in the event of staff absences. This flexible, modular structure allows us to scale up or scale down efforts as local conditions change.

- **County Teams:** Some teams will be staffed entirely by employees of the County who can be reassigned as Disaster Service Workers. This allows rapid scale up and deployment.
- **Community-Based Partner Teams:** We intend to utilize mixed teams with County Team Leads and staff from community medical partners and community-based organizations.

We will also continue to deploy **Specialized Teams** for specific populations and facilities, with a focus on containing outbreaks in congregate settings. These include teams serving the unsheltered population, congregate living facilities (both licensed and unlicensed), Santa Rita Jail, Board and Care facilities, workplaces, school & childcare settings, travel-related outbreaks, as well as other situations that warrant field investigations.

- Availability of temporary housing units to shelter at least 15% of county residents experiencing homelessness in case of an outbreak among this population requiring isolation and quarantine of affected individuals. Please describe the county's plans to support individuals, including those experiencing homelessness, who are not able to properly isolate in a home setting by providing them with temporary housing (including access to a separate bathroom, or a process in place that provides the ability to sanitize a shared bathroom between uses), for the duration of the necessary isolation or quarantine period. Rooms acquired as part of Project Roomkey should be utilized.

Alameda County launched its COVID homelessness response early and in collaboration with Governor Newsom's Project Roomkey initiative with FEMA pre-approval. The State leased two hotel sites in mid-March and the County collaborated with a local provider to operate the sites. As of August 1, those sites will be leased by the County, along with 6 additional sites the County has leased over the last four months. All hotels are served by local homeless services providers, with essential behavioral health and health care services are provided by the Health Care Services Agency. Benefits enrollment and housekeeping support are provided by the Social Services Agency.

Within Project Roomkey, we have Operation Comfort and Operation Safer Ground:

- Operation Comfort serves people who are homeless and 1) tested positive for COVID-19, or 2) Investigation (PUIs), or 3) experiencing symptoms of COVID-19, and/or 4) have been exposed to COVID-19.
  - Through a separate funding source, a limited number of Operation Comfort style rooms are also available for individuals who have tested positive for COVID-19 and live in highly dense environments where they are unable to isolate safely.
- Operation Safer Ground serves people who are homeless and over 65 or otherwise at high risk (medically fragile), or both.

Our operating goal is 1,203 units which equals 15% of the 2019 Point In Time (PIT) Count:

- 810 units are currently in operation, including:
  - Comfort hotels (198 rooms),
  - Safer Ground hotels (454), and
  - Trailer slots (158).

The following expansions are anticipated to bring our total capacity to 1,246 in the near future, exceeding our 15% goal:

- Additional 210 hotel rooms in the next two weeks;
- A recently approved scattered site program for Safer Ground with up to 100 rooms launching this month; and
- 126 rooms under negotiation.

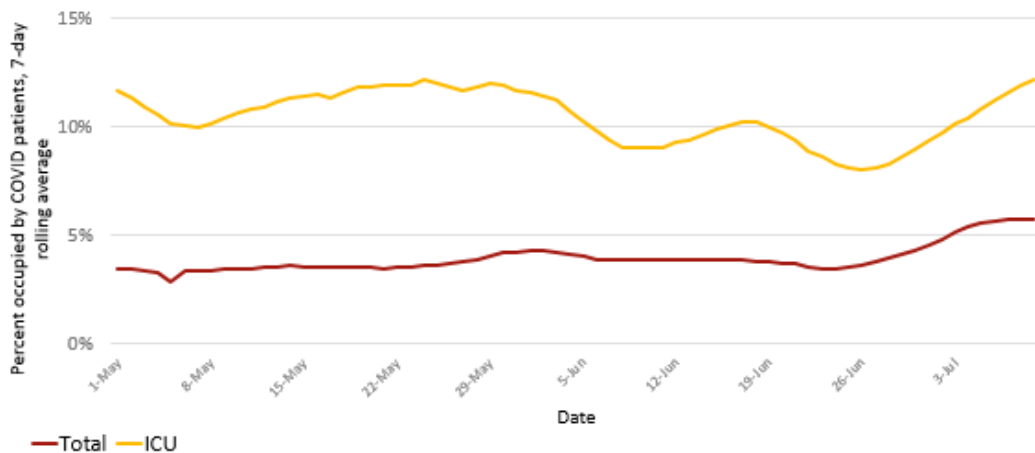

Alameda County is one of four counties selected to participate in the Governor’s 100 Day Challenge and will be housing 400 people participating in Project Roomkey, using ESG-CV and local funds to assist guests in accessing permanent housing on exit.

- **Hospital capacity.** A determination must be made by the county that hospital capacity, including ICU beds and ventilators, and adequate PPE is available to handle standard health care capacity, current COVID-19 cases, as well as a potential surge due to COVID-19. If the county does not have a hospital within its jurisdiction, the county will need to address how regional hospital and health care systems may be impacted by this request and demonstrate that adequate hospital capacity exists in those systems. The county must attest to:
  - o County (or regional) hospital capacity to accommodate COVID-19 positive patients at a volume of at a minimum surge of 35% of their baseline average daily census across all acute care hospitals in a county. This can be accomplished either through adding additional bed capacity or decreasing hospital census by reducing bed demand from non-COVID-19 related hospitalizations (i.e., cancelling elective surgeries). Please describe how this surge would be accomplished, including surge census by hospital, addressing both physical and workforce capacity.

Alameda County has 2,609 total hospital beds available, with 46% of beds available as of July 12, 2020. We have 868 surge beds identified, 100% of which are available and all of our hospitals have capacity to meet a 35% surge above baseline.

COVID-19 positive patients occupied 5.5% of total hospital beds over the past seven days (7/6-7/12) and 12.5% of ICU beds over the past seven days (7/6 – 7/12).

Percent hospital beds occupied by COVID-19 patients, Alameda County, 2020  
7-day rolling average

Alameda County maintains health care system readiness through the Disaster Preparedness Health Coalition comprised of four core partners including EMS, Public Health, Emergency Management and Hospitals. We maintain direct and continuous communication and collaboration with our Skilled Nursing Facilities, Clinics, Dialysis, Home Health, Hospice and other healthcare partners, County agencies, city partners and other organizations.

The healthcare system includes provider networks of hospital, ambulatory care, in-home services, long-term care, behavioral health and ancillary care services. There are 13 acute care receiving facilities in Alameda County that provide a wide range of services to care for the health needs of residents and visitors of Alameda County and feature specialized care programs including trauma, stroke, pediatric, psychiatric and cardiac services.

Healthcare system polls are conducted primarily via ReddiNet but may come through other survey platforms as needed. Polling is initiated immediately following a significant medical surge event but may be launched preemptively if possible. Alameda County EMS maintains the ReddiNet Utilization Policy to provide guideline for user for the purpose of communication and coordination of hospital diversion status, multi-casualty incidents (MCI) including patient tracking, disaster assessment polls, messages and HAvBED/Census reporting activities and health care partner coordination.

ReddiNet provides on-going reports. The OA EOC M/HB reviews the data in “real time” and shares report with the Emergency Operations Center. The weekly cumulative reports are available as needed for situation awareness within ReddiNet.

System Name	Hospital Name	Licensed Beds	Licensed ICU Beds	State 40% Surge Objective	*Ventilators	Ability to Meet Capacity
Alameda Health System	Alameda Hospital	66	0	26	16	Yes
	Highland Hospital	169	32	68	26	Yes

**Sources:** CDPH Reports, Medical Health Branch interviews with hospitals. \*Last Reported 6/26/20

- o County (or regional) hospital facilities have a robust plan to protect the hospital workforce, both clinical and nonclinical, with PPE. Please describe the process by which this is assessed.

The Medical Health Branch at the EOC manages all requests for PPE including masks, gown, face shields, gloves and other items such as hand sanitizer, thermometers, and sanitizing wipes. The PPE Prioritization Matrix was develop based on facilities/professions with the highest need for infection control and/or high-risk exposures to COVID. Health care facilities are in the top/highest priority tier of our PPE Prioritization matrix.

Alameda County PPE Prioritization Matrix (June 2020)	
Tier 1	Emergency/ Receiving Hospitals Medical First Responders (FIRE/EMS) Skilled Nursing Facilities (SNF) Long Term Care Centers (LTC) Home Health Care Clinics, Urgent Care Boarding/Home Health Care Facilities Covid-19 test site working directly with ALCO PH Outreach workers who are directly working with high risk populations
Tier 2	Other hospitals Non-Medical First Responders Hospice Dialysis Centers Surgery Centers Support Services for Tier I and II (Cleaning/disinfecting, drivers, deliveries) Jail
Tier 3	Standard transportation workers CBOs Dental Utilities (Power, Water, Waste management) Workers in public (Dock/ Port of Oakland, airport, construction)

- **Vulnerable populations.** A determination must be made by the county that the proposed variance maintains protections for vulnerable populations, particularly those in long-term care settings. The county must attest to ongoing work with Skilled Nursing Facilities within their jurisdiction and describe their plans to work closely with facilities to prevent and mitigate outbreaks and ensure access to PPE:
  - o Describe your plan to prevent and mitigate COVID-19 infections in skilled nursing facilities through regular consultation with CDPH district offices and with leadership from each facility on the following: targeted testing and patient cohorting plans; infection control precautions; access to PPE; staffing shortage contingency plans; and facility communication plans. This plan shall describe how the county will (1) engage with each skilled nursing facility on a weekly basis, (2) share best practices, and (3) address urgent matters at skilled nursing facilities in its boundaries.

We created a Long-Term Care Facility Task Force under the direction of the Epidemiology and Surveillance Branch of the Operations Section. The Group consists of an outbreak team of public health nurses and public health outbreak investigators that conduct facility case investigations, assist in managing infection control and mitigating additional cases.

Primary activities include on site facility investigation to review protocols and procedures, work with staff to manage and control the current outbreak and focus on staffing issues related to continuity of resident care, coordination with the Medical Health Branch at the EOC regarding priority outbreaks to prioritize requests for PPE, staffing and other needed resources, review of current recommendations with facility staff, line lists, provision of recommendations, and coordinated sharing of facility information.

Our nurses work with CDPH HAI as needed and use of current recommendations from the HAI/ACPHD Team to share with other facilities such as recommendations on symptomatic/asymptomatic staff working with patients.

Staff at facilities with cases, exposed contacts, suspect cases, contacts from facilities with known cases are carefully provided guidance about implementing recommendations and guidance on using face masks and facilitate resource requests for additional PPE. We identify priority facilities for site visits based on facility case investigations.

Our Outreach Team is activated as needed using Disease Containment staff and our Medical Reserve Corps members call all facilities to confirm and share guidance with facility staff on our contact list. Weekly conference calls are conducted with LTCF providers to provide information and guidance using AFLs, CDC, state and local guidance.

Our Clinical Guidance Team provides specific clinical guidance and recommendations for policy and provides literature and CDC guidance updates.

We have a Long Term Cared Facility Task Force Partnership (HCSA/ACCMA Group Medical Director Liaison Team) that conduct outreach with Medical Directors of LTCFs to provide information and guidance, identify and share best practices and liaise with the LTCF Group Leader to ensure sharing the current guidance and information and up to date talking points. This group provides ongoing coordination and collaboration with hospital partners to share facility needs and activities, coordinate training for coronavirus testing and PPE fit testing and coordinate site visits to assist facilities with implementing mitigation strategies.

The Infection Control Team conducts on-site facility visits, review protocols, procedures, provide PPE training, review IC procedures, review facility layout, observe/review patient movement, resident placement, cohorting isolation, etc. in an effort to prevent/control outbreaks.

Field testing is coordinated with the Medical Reserve Corps or other County testing resources for on-site testing and to train staff to conduct their own to a testing. Testing for LTCF residents and staff is prioritized through the LTCF Group Coordinator via a resource request.

- o Skilled nursing facilities (SNF) have >14-day supply of PPE on hand for staff, with established process for ongoing procurement from non-state supply chains. Please list the names and contacts of all SNFs in the county along with a description of the system the county must track PPE availability across SNFs.

SNFs can make PPE and staffing requests through our Medical Health Branch at the Emergency Operations Center, and are in the top/highest priority tier of our PPE priority matrix. We track the quantities and types of PPE requests made by SNFs and have encouraged the SNFs to measure their supply levels and understand their burn rates and thresholds for ordering more supplies. We use the State’s (CHCQ) daily surveys to track PPE. At this time all of our SNFs have a minimum 14-day supply of PPE.

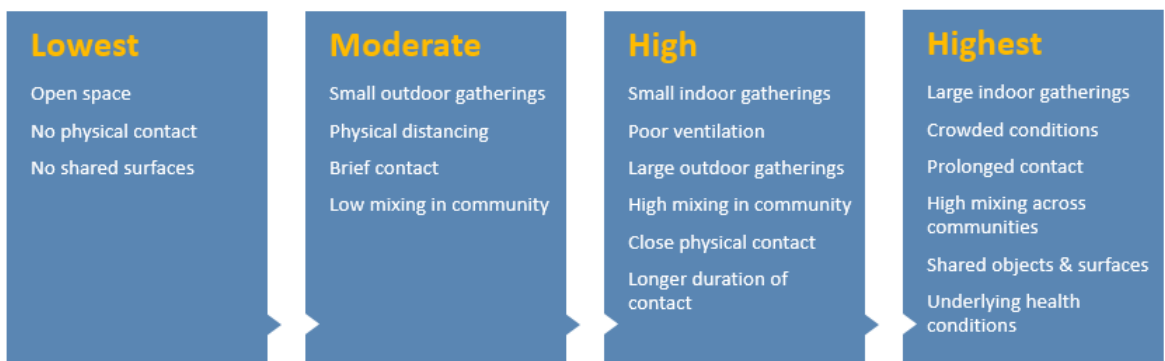

A list of all SNFs in Alameda County, with contact information, is included as Appendix D.

- Sectors and timelines.** Please provide details on the county’s plan to move through Stage 2. These details should include which sectors and spaces will be opened, in what sequence, on what timeline. Please specifically indicate where the plan differs from the state’s order. Any sector that is reflective of Stage 3 should not be included in this variance because it is not allowed until the State proceeds into Stage 3. For additional details on sectors and spaces included in Stage 2, please see <https://covid19.ca.gov/industry-guidance/> for sectors open statewide and <https://covid19.ca.gov/roadmap-counties/> for sectors available to counties with a variance.

Alameda County was among the first counties in the State to issue Shelter in Place orders and has taken a measured and cautious approach to reopening. In making reopening decisions we rely on the five Bay Area indicators: flat or decreasing case and hospitalization rates, sufficient hospital bed and surge capacity, sufficient testing, sufficient disease containment, and sufficient PPE. We opened sectors in 2-4 week increments and recently hit pause on further reopening due to increases in cases and hospitalizations. Per a risk-based approach, we favor opening outdoor, low-touch activities over high-touch, indoor activities.

While we are applying for variance attestation, our plan is to hold on reopenings except those posing low transmission risk because they occur in controlled, outdoor settings, and to improve messaging regarding use of face coverings, physical distancing, hand washing, staying home when sick, and the risks of gatherings, particularly indoors. We do not plan to move faster than the State.

### COVID-19 Risk

- Triggers for adjusting modifications.** Please share the county metrics that would serve as triggers for either slowing the pace through Stage 2 or tightening modifications, including the frequency of measurement and the specific actions triggered by metric

changes. Please include your plan, or a summary of your plan, for how the county will inform the state of emerging concerns and how it will implement early containment measures.

Opening and closing actions are considered based on a combination of metrics and other factors, including progress on Alameda County indicators and potential risk for COVID-19 transmission. The following metrics are key indicators of the impact of the COVID-19 epidemic that guide such decisions in Alameda County.

1. Case rates
  - a. Metric: case rate per 100,000 population averaged over 14 days (3-day lag)
  - b. Frequency of measurement: daily
  - c. Criteria for opening: flat or decreasing case rate sustained over 14 days
  - d. Threshold for closure: case rate of >200 per 100,000 per day sustained over 7 days
2. COVID-19 hospital census
  - a. Metric: daily COVID hospital census as reported to CDPH in California Hospital Association survey
  - b. Frequency of measurement: daily
  - c. Criteria for opening: flat or decreasing daily COVID hospital census for 14 days
3. Change in COVID-19 hospitalizations
  - a. Metric: percent change in the 3-day average daily number of confirmed COVID-19 patients currently hospitalized over the prior 3-day interval
  - b. Frequency of measurement: daily
  - c. Threshold for closure: 10% or greater increase sustained over 7 consecutive days
4. ICU bed availability
  - a. Metric: percent of ICU beds currently available
  - b. Frequency of measurement: daily
  - c. Threshold for closure: <20%

Closures of sectors and activities would be considered to protect our health care system from becoming overwhelmed and we would slowly scale back activities from highest to lowest risk, to reduce overall risk of COVID-19 transmission. Initial considerations for restrictions could include:

- Social bubbles
- Indoor activities
- Elective procedures at hospitals
- Urgent and non-emergent clinical services

Should initial restrictions fail to improve performance on indicators, additional sectors would be considered for closure. Given the challenges of sector by sector closure, Alameda County may consider, as appropriate and in consultation with regional jurisdictions and the State, a possible return to restrictive shelter in place measures should the above mitigation measures fail to reduce the spread of COVID-19, and if the metrics indicate an accelerating spread beyond what the above measures could be expected to address.

- **COVID-19 Containment Plan**

Please provide your county COVID-19 containment plan or describe your strategy to create a COVID-19 containment plan with a timeline.

Please see attached for our COVID-19 Containment Plan. This plan was developed over the course of the past several months and reflects input from our agency’s four departments, community partners, Board of Supervisors, our Department Operations Center, the County’s Emergency Operations Center, and cities, businesses and organizations. Due to the evolving nature of the pandemic, we anticipate that this document will be updated regularly to reflect shifts in the pandemic and our response plans.

While not exhaustive, the following areas and questions are important to address in any containment plan and may be used for guidance in the plan’s development. This containment plan should be developed by the local health officer in conjunction with the hospitals and health systems in the jurisdiction, as well as input from a broad range of county stakeholders, including the County Board of Supervisors. Under each of the areas below, please indicate how your plan addresses the relevant area. If your plan has not yet been developed or does not include details on the areas below, please describe how you will develop that plan and your timeline for completing it.

Testing

- Is there a plan to increase testing to the recommended daily capacity of 2 per 1000 residents?
- Is the average percentage of positive tests over the past 7 days <8% and stable or declining?
- Have specimen collection locations been identified that ensure access for all residents?
- Have contracts/relationships been established with specimen processing labs?
- Is there a plan for community surveillance?

We have established 10 free community testing sites around the county through partnerships with cities, community clinics, faith-based organizations and third-party vendors. While sites and providers are encouraged to ensure access for health care workers, first responders, and essential and frontline workers, these sites are available to anyone, regardless of symptoms, immigration or insurance status. We also facilitate testing for long term care facilities through training for facilities that have clinical staff, and connection to testing vendors for those that do not. To further strengthen the system, we’ve issued a \$20M continuous RFP that is intended to increase mobile testing, alongside increase capacity among our community clinics and hospitals.

Please see Objective 2.1 of attached containment plan.

Contact Tracing

- How many staff are currently trained and available to do contact tracing?
- Are these staff reflective of community racial, ethnic and linguistic diversity?
- Is there a plan to expand contact tracing staff to the recommended levels to accommodate a three-fold increase in COVID-19 cases, presuming that each case has ten close contacts?

- Is there a plan for supportive isolation for low income individuals who may not have a safe way to isolate or who may have significant economic challenges as a result of isolation?

We currently have a team of 93 staff trained and deployed in a team-based model to perform case investigations and contact tracing, as described above, on page 9. The staff reflect ethnic, racial, and linguistic diversity, and our plan to work with community partners to expand our team will enhance this capacity. We have an additional 40 people in the training pipeline and plan to expand to 300 over the course of the next few months.

People who face safety or economic barriers to appropriate isolation and quarantine are supported through collaboration across the Health Department, the Social Services Agency, All-In (the County's anti-poverty initiative), and community partners. We offer resources such as food, hotel rooms, and links to other resources including social services, behavioral health, and resources for workers and renters.

Please see Objectives 1.2, 2.2, 2.3, and 3.2 of attached containment plan.

#### Living and Working in Congregate Settings

- How many congregate care facilities, of what types, are in the county?
- How many correctional facilities, of what size, are in the county?
- How many homelessness shelters are in the county and what is their capacity?
- What is the COVID-19 case rate at each of these facilities?
- Is there a plan to track and notify local public health of COVID-19 case rate within local correctional facilities, and to notify any receiving facilities upon the transfer of individuals?
- Do facilities have the ability to adequately and safely isolate COVID-19 positive individuals?
- Do facilities have the ability to safely quarantine individuals who have been exposed?
- Is there sufficient testing capacity to conduct a thorough outbreak investigation at each of these facilities?
- Do long-term care facilities have sufficient PPE for staff, and do these facilities have access to suppliers for ongoing PPE needs?
- Do facilities have policies and protocols to appropriately train the workforce in infection prevention and control procedures?
- Does the workforce have access to locations to safely isolate?
- Do these facilities (particularly skilled nursing facilities) have access to staffing agencies if and when staff shortages related to COVID-19 occur?

We have 1,958 known congregate living facilities in Alameda County and are working to determine total capacity and cases. We have issued guidance for congregate living settings including an order for skilled nursing facilities, guidance for behavioral health care residential facilities, and ongoing technical support for shelter providers. We have several Specialized Teams dedicated to preventing and mitigating outbreaks in congregate settings, including a Long-Term Care Facilities Task Force, a Correctional Facilities Team, a Food Facilities Team, a workplace team, and a homelessness team.

As we anticipate an increase in cases in congregate settings, we are working on expanding our outbreak teams and capacity as well as our outbreak definitions based on facility type. Our case investigations teams monitor and track outbreaks as they occur. We are in the process of assessing the ability for our various congregate settings to safely isolate and quarantine positive individuals as we expand specialized outbreak teams alongside expanded case and contact investigations.

We use an established referral process to identify individuals who cannot safely isolate or quarantine to isolation and quarantine hotels in Alameda County. We currently operate 810 isolation/quarantine rooms and are making progress on additional capacity.

We have a resource request process in place through the County Emergency Operations Center to request clinical staff when needed, using the California Health Corps Registry of over 1500 individuals to identify those qualified.

Please see Objective 1.2 of attached containment plan.

### Protecting the Vulnerable

- Do resources and interventions intentionally address inequities within these populations being prioritized (i.e. deployment of PPE, testing, etc.)?
- Are older Californians, people with disabilities, and people with underlying health conditions at greater risk of serious illness, who are living in their own homes, supported so they can continue appropriate physical distancing and maintain wellbeing (i.e. food supports, telehealth, social connections, in home services, etc.)?

Our Long-Term Care Facility (LTCF) Task Force is a dedicated team with Outbreak Response Nurses assigned to each of our 73 SNFs. Nurses communicate with facilities frequently providing clinical consultation, expertise and guidance. Through close coordination with facilities, Outbreak Response Nurses maintain awareness of: number of COVID+ patients or staff, number of PUIs, and the ability to isolate and cohort patients. The team provides guidance on infection control precautions and measures to prevent and mitigate risk of COVID transmission.

The LTCF Task Force and our Testing Team have facilitated baseline surveillance testing at SNFs as required by CDPH, and we've issued Health Officer Order to promote strategies for SNFs to protect their residents and staff. Through our Medical Health branch, we have and can support SNFs experiencing severe staffing shortages, and SNFs can make PPE requests through the Medical Health branch of our Emergency Operations Center, and have been prioritized to receive PPE.

Please see Objective 1.2 of attached containment plan.

### Acute Care Surge

- Is there daily tracking of hospital capacity including COVID-19 cases, hospital census, ICU census, ventilator availability, staffing and surge capacity?
- Are hospitals relying on county MHOAC for PPE, or are supply chains sufficient?
- Are hospitals testing all patients prior to admission to the hospital?
- Do hospitals have a plan for tracking and addressing occupational exposure?

Hospital capacity including COVID-19 cases, hospital census, ICU census, ventilator availability and surge capacity are all tracked daily by our EMS team. At this time, we are continuing to receive PPE requests through the MHOAC, with a recent uptick in requests related to increases in cases and hospitalizations. All Alameda County hospitals have plans in place to track and address occupational exposure and are testing patients prior to admission to hospital.

Please see Objective 3.1 of attached containment plan.

### Essential Workers

- How many essential workplaces are in the county?
- What guidance have you provided to your essential workplaces to ensure employees and customers are safe in accordance with state/county guidance for modifications?
- Do essential workplaces have access to key supplies like hand sanitizer, disinfectant and cleaning supplies, as well as relevant protective equipment?
- Is there a testing plan for essential workers who are sick or symptomatic?  
Is there a plan for supportive quarantine/isolation for essential workers?

Alameda County has more than 235,000 frontline and essential workers across 11 industry categories. Women and people of color are disproportionately overrepresented these industries.

Businesses and organizations can make resource requests through their city Emergency Operations Centers, which forward requests they cannot fulfill to the County. Our ten free community testing sites prioritize essential and frontline workers and we have referred eligible healthcare workers and first responders to State-sponsored hotels while others are referred through our County's isolation/quarantine units as needed.

Please see Objectives 1.1 & 1.2 of attached containment plan.

### Special Considerations

- Are there industries in the county that deserve special consideration in terms of mitigating the risk of COVID-19 transmission, e.g. agriculture or manufacturing?
- Are there industries in the county that make it more feasible for the county to increase the pace through Stage 2, e.g. technology companies or other companies that have a high percentage of workers who can telework?

Alameda County is geographically diverse, with urban, suburban, and rural areas. We have industry representation from small and large manufacturing, agriculture, construction, technology, and retail and hospitality businesses. Our Health Officer orders and Site Specific Protection Plan identify basic protective measures to be implemented across industries, and our industry-specific guidance considers specific challenges associated with particular industries and promotes best practices for that industry.

Please see Objectives 1.1 & 1.2 of attached containment plan.

### Community Engagement

- Has the county engaged with its cities?
- Which key county stakeholders should be a part of formulating and implementing the proposed variance plan?
- Have virtual community forums been held to solicit input into the variance plan?
- Is community engagement reflective of the racial, ethnic, and linguistic diversity of the community?

The Health Care Services Agency has engaged community members, elected officials, and community serving organizations throughout the response.

Please see Objective 4.3 of attached containment plan.

### Relationship to Surrounding Counties

- Are surrounding counties experiencing increasing, decreasing or stable case rates?
- Are surrounding counties also planning to increase the pace through Stage 2 of California’s roadmap to modify the Stay-at-Home order, and if so, on what timeline? How are you coordinating with these counties?
- What systems or plans are in place to coordinate with surrounding counties (e.g. health care coalitions, shared EOCs, other communication, etc.) to share situational awareness and other emergent issues.
- How will increased regional and state travel impact the county’s ability to test, isolate, and contact trace?

Most Bay Area and greater Bay Area counties are experiencing increasing case rates and/or increasing hospitalizations. At this time Bay Area Counties are either pausing or scaling back later Stage 2 activities, and scheduled openings have been placed on hold. Alameda County is an active participant in the Association of Bay Area Health Officers Association (ABAHO), which includes the City of Berkeley, which is within Alameda County borders.

The ABAHO jurisdictions have a long history of exchanging case and contact information across jurisdictional boundaries. This is a fundamental aspect of our normal disease control activities that has continued during the COVID pandemic, limited only by the sheer volume of cases and workload that each county's staff must handle. Alameda County has endorsed sharing of data in CalREDIE across jurisdictional lines to facilitate case investigations. For these reasons, although increased travel around the state along with varying speed of reopening across jurisdictions have directly contributed to increasing transmission, they do not generally interfere with testing, case investigations, and contact tracing.

Please see objectives 1.1 and 4.2 of attached containment plan.

In addition to your county’s COVID-19 VARIANCE ATTESTATION FORM, please include:

- Letter of support from the County Board of Supervisors
- Letter of support from the local hospitals or health care systems. In the event that the county does not have a hospital or health care system within its jurisdiction, a letter of support from the relevant regional health system(s) is also acceptable.
- County Plan for moving through Stage 2

All documents should be emailed to Jake Hanson at [Jake.Hanson@cdph.ca.gov](mailto:Jake.Hanson@cdph.ca.gov).

I Nicholas Moss, hereby attest that I am duly authorized to sign and act on behalf of the County of Alameda. I certify that the Alameda County Department of Public Health has met the readiness criteria outlined by CDPH designed to mitigate the spread of COVID-19 and that the information provided is true, accurate and complete to the best of my knowledge. If a local COVID-19 Containment Plan is submitted for the County of Alameda, I certify that it was developed with input from the County Board of Supervisors/City Council, hospitals, health systems, and a broad range of stakeholders in the jurisdiction. I acknowledge that I remain responsible for implementing the local COVID-19 Containment Plan and that CDPH, by providing technical guidance, is in no way assuming liability for its contents.

I understand and consent that the California Department of Public Health (CDPH) will post this information on the CDPH website and is public record.

# COVID-19 STRATEGY

This strategy highlights key components of HCSA’s COVID-19 response framework. **Community engagement** and **equity** considerations are infused throughout HCSA’s work to reduce near and long-term impacts of the pandemic on disproportionately affected communities.

GOALS	 Prevent & control the spread of COVID-19	 Find, test, & isolate cases and their contacts to prevent further spread	 Support care of COVID-19 patients	 Coordinate an Effective Response
OBJECTIVES	Minimize community transmission  Protect high-risk populations	Test widely  Investigate cases and trace contacts  Isolate infected people and quarantine their contacts	Ensure availability of critical care capacity  Provide high-risk populations with needed support through their illness and recovery  Distribute available treatment and vaccines	Establish a functional incident management system  Use data to drive decisions  Engage communities and the organizations that serve them  Clearly communicate through multiple means

## GOAL 1: Prevent & Control the Spread of COVID-19

### *OBJECTIVE 1.1: Minimize community transmission*

Alameda County was among the first counties in the nation to issue stay at home orders in mid-March, and has subsequently issued modified and extended those orders several times. Our county is culturally and geographically diverse, with urban, suburban, and rural areas; and we have industry representation from small and large manufacturing, agriculture, construction, technology, and retail and hospitality businesses. We have taken a measured and incremental approach to reopening, and throughout the pandemic, have issued guidance to protect community members at high risk, to promote workplace safety, and messaged the importance of preventive measures such as face coverings, physical distancing, and frequent hand washing. Opening and closing actions are considered based on a combination of metrics and other factors, including case rates, COVID-19 hospital census, ICU availability, change in hospitalizations, and disease containment capacity.

Strategy	Tactics
<p>Implement and adapt population-level protective measures to reduce exposure</p>	<ul style="list-style-type: none"> <li>▪ Issue <a href="#">Health Officer orders</a> to require sheltering in place, universal face coverings, physical distancing, blanket isolation &amp; quarantine.</li> <li>▪ Require all businesses operating in Alameda County to prepare and implement site specific safety plans that include plans to accommodate administrative controls, physical distancing, face coverings, employee training on COVID-19 symptoms monitoring and transmission prevention, and enhanced cleaning protocols.</li> <li>▪ Issue <a href="#">guidance to workplaces</a>, including essential workplaces, to ensure employees and customers are adequately protected.</li> <li>▪ Issue guidance for <a href="#">schools, colleges and childcare</a> centers</li> <li>▪ <a href="#">Establish and monitor metrics</a> to measure progress against COVID-19</li> <li>▪ Use metrics to guide forward and backward movement through a <a href="#">reopening plan</a>.</li> </ul>
<p>Provide guidance to individuals, organizations, and businesses on how to minimize risk in various settings</p>	<ul style="list-style-type: none"> <li>▪ Issue <a href="#">Health Officer orders</a> to require Site Specific Protection Plans that identify basic protective measures to be implemented across industries.</li> <li>▪ Issue <a href="#">industry-specific guidance</a> that considers specific challenges associated with particular industries and promotes best practices for that industry.</li> <li>▪ Share resources for <a href="#">worker protection</a></li> </ul>

*OBJECTIVE 1.2: Protect high-risk populations*

Certain populations are at higher risk of transmission or complications resulting from COVID-19 infection, including frontline workers and people in congregate living situations. According to the Center for Economic and Policy Research, which relies on 2014-2018 data from the American Community Survey, **Alameda County has more than 235,000 frontline and essential workers across 11 industry categories.** Women and people of color are disproportionately overrepresented these industries. To promote employee rights and flexibility in caring for themselves and their loved ones, we encourage all employers to comply with local, state, and federal laws about sick leave, retaliation and workplace safety. Our COVID Recovery team provides technical assistance to organizations seeking help with their site specific plans.

**There are currently 1,958 known congregate living settings in Alameda County,** which include skilled nursing facilities, residential care facilities, shelters, residential treatment programs, homeless encampments, and jail. Alameda County has several Specialized Teams dedicated to preventing and mitigating outbreaks in congregate settings, including a Long-Term Care Facilities Task Force, a Correctional Facilities Team, a Food Facilities Team, a Workplace Team, and an Unsheltered Team. We have issued guidance for congregate living settings, including an [order for licensed facilities](#), guidance for [behavioral health residential facilities](#), and provide ongoing technical [support for homeless services providers](#).

As we anticipate an increase in cases in congregate settings, we are working on expanding our outbreak teams and capacity as well as our outbreak definitions based on facility type. Our case investigations teams monitor and track outbreaks as they occur, and we are in the process of assessing the ability for our various congregate settings to safely isolate and quarantine positive individuals. We use an established referral process to identify individuals who cannot safely isolate or quarantine to isolation and quarantine hotels in Alameda County.

Strategy	Tactics
Work with operators of congregate living facilities to reduce transmission in these facilities and to protect vulnerable residents and staff.	<ul style="list-style-type: none"><li>▪ Long Term Care Facility Task Force comprising an outbreak team of public health nurses and public health outbreak investigators conducts facility case investigations, assists in managing infection control, and mitigation of additional cases. Team responsibilities:<ul style="list-style-type: none"><li>○ Proactively reach out to facilities with cases, contacts, suspect cases, contacts from facilities with known cases;</li><li>○ Conduct on-site facility investigation to review protocols and procedures, work with staff to manage and control the current outbreak and focus on staffing issues related to continuity of resident care;</li><li>○ Review current recommendations with facility staff, review of line lists, provision of recommendations, and coordinated sharing of facility information;</li><li>○ Provide subject matter expertise for infection control to prevent/control outbreaks, including PPE training, review of infection control procedures, review of facility layout, and observation and review of patient movement, resident placement, cohorting isolation.</li></ul></li></ul>

Strategy	Tactics
	<ul style="list-style-type: none"> <li>○ Coordinate with the Medical Health Branch at the EOC regarding priority outbreaks to prioritize requests for staffing, PPE, and other resources, as needed;</li> <li>○ Conduct testing for long-term care facility residents and staff and trains long-term care facility staff to conduct their own testing.</li> <li>○ Conduct weekly conference calls with long-term care facility providers to provide information and guidance using All Facility Letters, CDC, state and local guidance;</li> <li>○ Work in coordination with the Alameda-Contra Costa Medical Association to conduct outreach with Medical Directors of long-term care facilities to provide information and guidance, identify and share best practices.</li> </ul> <ul style="list-style-type: none"> <li>▪ Work in collaboration with the Alameda County Sheriff’s Office and Wellpath, the healthcare provider responsible for the provision of medical services at Santa Rita Jail to prevent transmission, infection, and death associated with COVID-19, including to: <ul style="list-style-type: none"> <li>○ Apply a pre-screening process to provide an initial classification regarding a detainee’s risk for COVID-19, classifying detainees based on symptoms and exposure</li> <li>○ Implement a comprehensive plan for testing detainees for COVID-19</li> <li>○ Designate detainee housing based on their exposure to or risk for COVID-19,</li> <li>○ Implement temperature checks of all visitors and staff prior to entry into Santa Rita Jail</li> <li>○ Report daily on any new positive cases or suspected cases among detainees; intake and release testing of detainees; and contacts.</li> <li>○ Report publicly on all COVID-19 cases at Santa Rita Jail on the County’s COVID-19 data dashboard;</li> <li>○ Conduct site inspection of Santa Rita Jail to assess: 1) screening, isolation, quarantine, and social distancing measures for detainees; 2) use and access to facemasks, PPE, and hand hygiene among detainees and staff; 3) COVID-19 care and testing procedures among detainees; and 4) communication and coordination between ACPHD, Wellpath, and ACSO regarding cases and contacts among detainees and staff.</li> </ul> </li> <li>▪ Establish a tiered PPE Prioritization Matrix based on facilities/professions with the highest need for infection control and/or high-risk exposures to COVID-19, with emergency/receiving hospitals, medical first responders (fire/EMS), skilled nursing facilities (SNF), long term care centers (LTC), home health care, clinics, urgent care, boarding/home health care facilities, COVID-19 test sites working directly with the County’s Public Health Department, and outreach workers who are directly working with high-risk populations in Tier 1.</li> </ul>

Strategy	Tactics
	<ul style="list-style-type: none"> <li>▪ Conduct a <a href="#">procurement solicitation</a> to identify testing partners, including hospitals seeking to partner to provide testing of long-term care facility residents and staff, and mobile testing vendors that can be dispatched to provide on-site testing at long-term care facilities, homeless shelters, homeless encampments, and other high-risk settings.</li> <li>▪ Maintain a resource request process through the County Emergency Operations Center to request clinical staff when needed, using the California Health Corps Registry of over 1500 individuals.</li> </ul>
<p>Focus intensive infection prevention efforts on people who are experiencing homelessness.</p>	<ul style="list-style-type: none"> <li>▪ Increase shelter and encampment support and multi-jurisdictional coordination (e.g., portable latrines, hand wash stations, hygiene supplies, visiting nurses/outreach teams, daily assessment.)</li> <li>▪ Support homeless service providers with <a href="#">information and guidance</a> on COVID-19 related shelter health protocols, safe outreach and engagement, outbreak response, and COVID-19 testing.</li> <li>▪ Decompress shelters to allow for physical distancing.</li> <li>▪ Secure and support <a href="#">isolation/quarantine hotels</a> for homeless individuals who are COVID+, COVID-exposed, or at high risk for severe illness related to COVID-19.</li> </ul>
<p>Provide guidance and support to reduce transmission among health care workers, pre-hospital transport providers, and other front-line service personnel.</p>	<ul style="list-style-type: none"> <li>▪ Issue Health Officer orders as needed to contain disease and protect the public’s health</li> <li>▪ Issue a Face Covering order, requiring face coverings to be worn in all essential businesses.</li> <li>▪ Require all businesses operating in Alameda County to prepare and implement site specific safety plans that include plans to accommodate administrative controls, physical distancing, face coverings, employee training on COVID-19 symptoms monitoring and transmission prevention, and enhanced cleaning protocols.</li> <li>▪ Issue <a href="#">guidance to workplaces</a>, including essential workplaces, to ensure employees and customers are adequately protected.</li> <li>▪ Issue guidance and support free testing for all health care workers, essential frontline workers, and first responders.</li> <li>▪ Post information on worker protection and employer obligations for safe work environments on our <a href="#">Worker Resources page</a>.</li> <li>▪ Establish a tiered PPE Prioritization Matrix based on facilities/professions with the highest need for infection control and/or high-risk exposures to COVID-19, with emergency/receiving hospitals, medical first responders (fire/EMS), skilled nursing facilities (SNF), long term care centers (LTC), home health care, clinics, urgent care, boarding/home health care facilities, COVID-19 test sites working directly with the</li> </ul>

Strategy	Tactics
	<p>County’s Public Health Department, and outreach workers who are directly working with high-risk populations in Tier 1.</p> <ul style="list-style-type: none"> <li>▪ Encourage all employers to comply with local, state, and federal laws about sick leave, retaliation and workplace safety to promote employee rights and flexibility in caring for themselves and their loved ones.</li> <li>▪ Provide technical assistance to organizations seeking help with their site specific plans through our COVID Recovery Team.</li> <li>▪ Facilitate resource requests from front-line businesses and organizations for supplies and equipment when private supply chains are insufficient.</li> <li>▪ Prioritize essential and frontline workers, healthcare workers, and first responders at free community-based testing sites.</li> </ul>
<p>Require accurate collection and reporting of data on race, ethnicity, language and other sociodemographic factors at all stages of COVID-19 including testing and treatment, hospitalizations and deaths to fully understand the profile of disparities.</p>	<ul style="list-style-type: none"> <li>▪ Issue <a href="#">Health Officer order</a> to require laboratory reporting of key demographic information on all tests with positive, negative, or inconclusive results.</li> <li>▪ Regularly remind providers and testing sites to report complete and accurate information</li> <li>▪ Develop mechanisms to collect data in ways that are significant and meaningful to community members while feasible for medical providers and labs.</li> </ul>

## GOAL 2: Find, Test & Isolate Cases and Contacts

### OBJECTIVE 2.1: Test Widely

Increasing COVID-19 testing and lab processing services in the County is key to addressing health disparities resulting from the pandemic as well as implementing a safe reopening plan. A critical aspect of reopening is the availability of COVID-19 testing that is sufficient to monitor community transmission leading to outbreaks. Alameda County is creating equitable access to testing for all residents with a focus on those most impacted by COVID-19. **At the end of June 2020, we reached our goal of 2 tests per 1,000 residents or 3,100 tests per day and have consistently exceeded it since then. As of July 14, 2020, there were 26 testing sites in the County, 10 of which are community testing sites offering no-cost testing.** While sites and providers are encouraged to ensure access for health care workers, first responders, and essential and frontline workers, these sites are available to anyone, regardless of symptoms, immigration or insurance status. The County’s [Testing webpage](#) offers information and guidance.

Strategy	Tactics
<p>Ensure that no-cost testing is available countywide, with a focus on low-income and ethnically diverse neighborhoods, vulnerable populations, and symptomatic individuals.</p>	<ul style="list-style-type: none"> <li>▪ Create and post <a href="#">testing information and guidance</a> for residents and providers.</li> <li>▪ Established no-cost community testing sites with a focus on testing in geographies and among populations with highest health disparities who are at high risk for transmission and severe illness due to COVID-19.</li> <li>▪ Conduct a <a href="#">procurement</a> to identify testing partners in four key areas:               <ul style="list-style-type: none"> <li>○ Covid-19 Testing Vendors (i.e., testing registration, point of service, and lab processing vendors, or the partnership of primary vendor and subcontractor(s) who can provide the full set of services). These vendors may apply to provide services at stationary community testing sites and mobile testing sites, including testing in Long Term Care Facilities (LTCFs);</li> <li>○ Community Health Centers and Primary Care Medical Clinics who serve the Medi-Cal, HealthPAC, and/or uninsured populations and are looking to expand testing for their population and the general public;</li> <li>○ Hospitals seeking to partner with the County to provide testing in Long Term Care Facilities and other congregate settings; and</li> <li>○ Labs who are able to provide COVID-19 lab processing to expand the capacity of the County Public Health Lab.</li> </ul> </li> <li>▪ Create a <a href="#">County-City COVID-19 Testing Partnership Framework</a> to guide testing collaborations with cities.</li> </ul>

*OBJECTIVE 2.2: Contact Cases and Trace Contacts*

Prior to COVID-19, Alameda County had a team of 7 case investigation/contact tracing (CI/CT) staff for more than 80 reportable diseases. **As of July 14<sup>th</sup>, we have 93 staff trained and deployed in a team-based model to perform case investigations and contact tracing. The staff reflect ethnic, racial, and linguistic diversity. We have an additional 40 people are in the training pipeline and are working toward a CI/CT workforce of 300 to meet surge needs.** We are partnering with community-based organizations in a two-phase plan to expand staffing capacity and ensure cultural and racial sensitivity in our work. The first phase, launched in late June, includes emergency contracts with four clinical providers serving areas and communities experiencing high case rates. For the second phase, to be launched in August, we will issue an RFP for interested community partners who would either hire people or leverage their existing workforce to integrate with our case investigation and contact tracing program.

Strategy	Tactics
Expand case investigation and contact tracing operations.	<ul style="list-style-type: none"> <li>▪ Convert from a function-based case investigation/contact tracing operation to a scalable team-based staffing model with the goal of 300 case investigation/contact tracing staff.</li> <li>▪ Contract with community-based organizations to do contact tracing, informing and outreach work</li> </ul>
Employ technology to improve reach and efficiency of case investigation and contact tracing efforts.	<ul style="list-style-type: none"> <li>▪ Join State data platform, CalConnect, to support case investigation/contact tracing efforts</li> <li>▪ Supply sufficient data and tech support across the contact investigation/contact tracing workforce, providing access to laptops, headsets, and other technological supports, with 7 day a week and evening tech support</li> </ul>
Ensure the contact tracing workforce is culturally and linguistically appropriate and trauma-informed.	<ul style="list-style-type: none"> <li>▪ Contract with trusted partners with strong relationships and cultural and linguistic ties to the community.</li> <li>▪ Recruit individuals from directly impacted communities who have a long-term commitment to underserved and unserved communities.</li> <li>▪ Supplement State Contact Tracing Academy, with additional training in local community needs, operating procedures, and working with diverse populations.</li> </ul>

*OBJECTIVE 2.3: Isolate infected people and quarantine their contacts*

People who face safety or economic barriers to appropriate isolation and quarantine are supported through collaboration across the Alameda County Health Care Services Agency, the Alameda County Social Services Agency, All-In (the County’s anti-poverty initiative), and community partners. Resources such as food, hotel rooms, and links to other resources including social services, behavioral health, and resources for workers and renters are available to ensure that people can safely isolate and quarantine. We are applying an extra focus to coordinating community

resources in five hot spot areas that have high rates of COVID-19 and high health disparities. **We currently operate 810 Project Roomkey isolation/quarantine units and are on our way to surpassing our goal of 1,203 units.**

Strategy	Tactics
<p>Provide culturally and linguistically appropriate, person-centered wrap-around services to ensure vulnerable populations can remain in isolation or quarantine without hardship.</p>	<ul style="list-style-type: none"> <li>▪ Establish a Community Resources team to identify and/or create community resources needed for appropriate isolation and quarantine (deliveries of food and medicines, isolation supplies, access to alternative living arrangements when isolation in the home is not feasible, etc.).</li> <li>▪ Provide dedicated social workers/case managers as part of the case investigation/contact tracing teams to assist the most vulnerable individuals and families in developing plans and linking to needed resources.</li> <li>▪ Ensure half of the dedicated social workers are bilingual in the primary languages other than English seen in our caseload.</li> </ul>
<p>Identify alternate isolation and quarantine locations for people who cannot safely isolate at home.</p>	<ul style="list-style-type: none"> <li>▪ Procure hotel rooms to provide a safe isolation and quarantine option for people who cannot safely isolate at home.</li> <li>▪ Establish referral process to identify individuals who cannot safely isolate or quarantine to isolation and quarantine hotels in Alameda County.</li> </ul>

## GOAL 3: Support Care of COVID-19 Patients

### *OBJECTIVE 3.1: Ensure availability of critical care capacity*

During a catastrophic emergency, the movement from individual-based care to population-based outcomes challenges the professional, regulatory and ethical paradigms of the healthcare delivery system. Surge capacity refers to the ability of hospitals and healthcare providers to evaluate and care for a markedly increased volume of patients that challenge or exceed the normal capacity of a hospital or healthcare system. Very large incidents may affect local, regional, and state resources so a coordinated response in addition to forecasting for a future surge response plan is critical.

**Alameda County maintains health care system readiness through the Disaster Preparedness Health Coalition comprised of four core partners including EMS, Public Health, Emergency Management and Hospitals. We maintain direct and continuous communication and collaboration with our skilled nursing facilities, clinics, dialysis, home health, hospice and other healthcare partners, county agencies, city partners and other organizations.** The healthcare system includes provider networks of hospital, ambulatory care, in-home services, long-term care, behavioral health and ancillary care services. There are 13 acute care receiving facilities in Alameda County that provide a wide range of services to care for the health needs of residents and visitors of Alameda County and feature specialized care programs including trauma, stroke, pediatric, psychiatric and cardiac services. All Alameda County hospitals have plans in place to track and address occupational exposure and are testing patients prior to admission to hospital.

Strategy	Tactics
<p>Plan with healthcare providers to ensure they can safely surge their capacity to meet the critical care needs of current and projected cases.</p>	<ul style="list-style-type: none"> <li>▪ Track hospital capacity, including COVID-19 cases, hospital census, ICU census, ventilator availability on a daily basis.</li> <li>▪ Hold weekly calls with health facilities in the County for ongoing healthcare systems planning.</li> <li>▪ In partnership with health care partners, developed the Alameda County COVID-19 Surge Plan, which documents and quantifies the activities and discussions to date, provides projections of anticipated surge scenarios, provides an inventory of expected surge resources, and coordinates the optimal utilization of those resources during crisis conditions.</li> <li>▪ Conduct regular health care system polls via ReddiNet.</li> </ul>
<p>Equip and protect healthcare providers with appropriate controls and supplies.</p>	<ul style="list-style-type: none"> <li>▪ Manage all requests for PPE and supplies (including masks, gown, face shields, gloves and other items such as hand sanitizer, thermometers, sanitizing wipes and other items) through the Medical Health branch of the Emergency Operations Center.</li> <li>▪ Establish a PPE Prioritization Matrix based on facilities/professions with the highest need for infection control and/or high-risk exposures to COVID-19:</li> </ul>

Strategy	Tactics
	<ul style="list-style-type: none"> <li>○ Tier 1: emergency/ receiving hospitals medical first responders (fire/EMS); skilled nursing facilities (SNF); long term care centers (LTC); home health care; clinics; urgent care; boarding/home health care facilities; covid-19 test sites working directly with the County’s Public Health Department; outreach workers who are directly working with high-risk populations</li> <li>○ Tier 2: other hospitals; non-medical first responders; hospice; dialysis centers; surgery centers; support services for tier 1 and 2 (cleaning/disinfecting, drivers, deliveries); jail</li> <li>○ Tier 3: standard transportation workers; community-based organizations; dental providers; utilities (power, water, waste management); workers in public (dock/Port of Oakland, airport, construction)</li> <li>▪ Require weekly certification of PPE supplies from each hospital.</li> </ul>

*OBJECTIVE 3.2: Provide vulnerable populations with needed support through their illness and recovery*

Approximately 25,000 low-income uninsured Alameda County residents have access to a regular source of health care through the HealthPAC program. HealthPAC provides coordinated health services through a network of primary care medical homes and acute care providers. Non-medical needs are met through the same Community Resources Team infrastructure, providing resources such as food, hotel rooms, and links to other resources including social services, behavioral health, and resources for workers and renters are available to ensure that people can safely isolate and quarantine.

Strategy	Tactics
<p>Ensure uninsured individuals have access to the care and treatment they need.</p>	<ul style="list-style-type: none"> <li>▪ Ensure uninsured Alameda County residents enrolled in the HealthPAC program have access to COVID-19 care and treatment through the HealthPAC provider network.</li> <li>▪ Support cost-free community testing sites available to all residents of the county, regardless of insurance or immigration status</li> </ul>
<p>Provide culturally and linguistically appropriate, person-centered wrap-around services to support vulnerable patients.</p>	<ul style="list-style-type: none"> <li>▪ Establish a Community Resources Team to identify and/or create community resources needed for appropriate isolation and quarantine (deliveries of food and medicines, isolation supplies, access to alternative living arrangements when isolation in the home is not feasible, etc.).</li> <li>▪ Provide dedicated social workers/case managers as part of the case investigation/contact tracing teams to assist the most vulnerable individuals and families in developing plans and linking to needed resources.</li> <li>▪ Ensure half of the dedicated social workers are bilingual in the primary languages other than English seen in our caseload.</li> </ul>

*OBJECTIVE 3.3: Distribute available treatment and vaccines*

While COVID-19 treatment options are limited at this time, Remdesivir has been approved by the FDA and made available to counties in small quantities. The Health Care Services Agency leveraged its provider readiness network and surge planning efforts to develop an equitable process for the distribution of Remdesivir across hospitals in the county. Our collaborative clinical planning group identified an effective workflow and allocation process. This experience will be useful in the future, when introduction of new treatments and vaccines will require continued thoughtful prioritization and allocation planning. We also plan to leverage our Immunization Team’s infrastructure and experience during flu season as practice for future COVID-19 vaccine distribution plans.

Strategy	Tactics
Ensure equitable and ethical access to medication and therapies.	<ul style="list-style-type: none"><li>▪ Develop a methodology for distribution of therapies, such as Remdesivir</li><li>▪ Develop a vaccine deployment plan</li><li>▪ Use Fall 2020 flu season as preparation and practice for future vaccine deployment</li></ul>

## GOAL 4: Coordinate an Effective Response

### *OBJECTIVE 4.1: Establish a functional incident management system*

The Alameda County Health Care Services Agency (HCSA) includes the departments of Public Health, Behavioral Health, and Environmental Health, as well as multiple cross-agency programs, including a Whole Person Care pilot, indigent care programs, and an Office of Homelessness Care and Coordination. Hundreds of staff across the agency are deployed to the COVID-19 response within HCSA’s Department Operations Center while others are deployed to the County’s Emergency Operations Center, managed by the Alameda County Sheriff’s Office. The magnitude and duration of the pandemic will test and strain our traditional emergency response structures and requires attention to immediate needs as well as parallel planning for sustainability and the potential for overlapping emergency events, such as fire and flu seasons.

Strategy	Tactic
Support the Department Operations Center (DOC) to effectively coordinate HCSA’s response.	<ul style="list-style-type: none"> <li>▪ Deploy staff from all HCSA departments</li> <li>▪ Procure extra staff as needed, including through partnerships with community based organizations and medical staff registries</li> <li>▪ Develop medium and long-term plans for sustaining COVID-19 response</li> <li>▪ Maintain continuity of operations for essential functions</li> </ul>
Ensure coordination between the DOC and the County Emergency Operations Center (EOC).	<ul style="list-style-type: none"> <li>▪ Appoint an EOC Liaison to serve as bridge between DOC and EOC</li> <li>▪ Isolation and quarantine housing procurement</li> <li>▪ Coordinate with the Care &amp; Shelter Branch to support isolation and quarantine (food, supplies, temporary housing, etc)</li> <li>▪ Leverage size and scope of EOC for large procurement requests for staff and vendors</li> <li>▪ Prepare for coordinated messaging and response for potentially overlapping emergency events (fire season, PSPS, flu season, etc)</li> </ul>
Support healthcare providers and pre-hospital first responders.	<ul style="list-style-type: none"> <li>▪ Manage EOC’s Medical Health Branch</li> <li>▪ Develop consistent processes for PPE prioritization, inventory management, and request fulfillment</li> <li>▪ Provide relevant and timely <a href="#">clinical guidance</a> and health alerts</li> </ul>

*OBJECTIVE 4.2: Use data to drive decisions*

Alameda County has developed [multiple dashboards](#) to publicly share information regarding cases, hospitalizations, deaths, geographic spread, race/ethnicity, and long-term care facilities. These dashboards include data from the City of Berkeley, which is within Alameda County borders, but is a separate local health jurisdiction. We use data and metrics to measure the pace and scope of economic reopening, as well as to guide decisions regarding resource deployment to address immediate areas of need for the response. We intend to share more information as it becomes available. Incoming data sources include CalREDIE, ReddiNet, HAVBED/census reports, and EMS surveys/polling.

Alameda County coordinates with the seven Bay Area county health officers in strategizing actions to both open and close activities. Alameda County and Berkeley have, to date, restricted and re-opened the same sectors at the same time, with the same guidance. Both health jurisdictions intend to continue this approach.

Strategy	Tactics
<p>Maintain local situational awareness of the prevalence and impact of COVID-19.</p>	<ul style="list-style-type: none"> <li>▪ Communicate regularly for situational awareness and planning with the seven Bay Area health jurisdictions that collectively shelter-in-place orders for the region.</li> <li>▪ Coordinate with regional health officials through the Association of Bay Area Health Officers (ABAHO), to share information, coordinate actions and communications regionally.</li> </ul>
<p>Continuously analyze data for patterns and trends to inform and adapt response efforts.</p>	<ul style="list-style-type: none"> <li>▪ Monitor <a href="#">Alameda County COVID-19 indicators</a> and State Monitoring Project indicators</li> <li>▪ Expand and develop a robust DOC Data Branch</li> <li>▪ Collect and report data on race/ethnicity wherever possible</li> <li>▪ Build and support data intelligence functions in the DOC response structure</li> <li>▪ Identify thresholds for sector closing or opening decisions               <ol style="list-style-type: none"> <li>1. Case rates                   <ol style="list-style-type: none"> <li>a. Metric: case rate per 100,000 population averaged over 14 days (3-day lag)</li> <li>b. Frequency of measurement: daily</li> <li>c. Criteria for opening: flat or decreasing case rate sustained over 14 days</li> <li>d. Threshold for closure: case rate of &gt;200 per 100,000 per day sustained over 7 days</li> </ol> </li> <li>2. COVID hospital census                   <ol style="list-style-type: none"> <li>a. Metric: daily COVID hospital census as reported to CDPH in California Hospital Association survey</li> <li>b. Frequency of measurement: daily</li> </ol> </li> </ol> </li> </ul>

Strategy	Tactics
	<ul style="list-style-type: none"> <li>c. Criteria for opening: flat or decreasing daily COVID hospital census for 14 days</li> </ul> <ul style="list-style-type: none"> <li>3. Change in COVID hospitalizations <ul style="list-style-type: none"> <li>a. Metric: percent change in the 3-day average daily number of confirmed COVID-19 patients currently hospitalized over the prior 3-day interval</li> <li>b. Frequency of measurement: daily</li> <li>c. Threshold for closure: 10% or greater increase sustained over 7 consecutive days</li> </ul> </li> <li>4. ICU bed availability <ul style="list-style-type: none"> <li>a. Metric: percent of ICU beds currently available</li> <li>b. Frequency of measurement: daily</li> <li>c. Threshold for closure: &lt;20%</li> </ul> </li> </ul>
<p>Monitor COVID-19 tests, cases, hospitalizations, and deaths by key social demographics, including race/ethnicity and zip code.</p>	<ul style="list-style-type: none"> <li>▪ Develop and maintain a <a href="#">data dashboard</a> sharing relevant Alameda County COVID-19 data.</li> <li>▪ Use data to drive real-time decisions regarding disease containment, resource deployment, procurements, and community engagement</li> </ul>
<p>Share data with the public and with partners.</p>	<ul style="list-style-type: none"> <li>▪ Develop and maintain a <a href="#">data dashboard</a> sharing relevant Alameda County COVID-19 data.</li> <li>▪ Provide regular public presentations, participate in community forums, and share information with media</li> </ul>

*OBJECTIVE 4.3: Engage communities and the organizations that serve them*

During the COVID-19 pandemic the Alameda County Board of Supervisors and cities have been regularly apprised of the local data and progress toward the State’s reopening criteria. Health Care Services Agency leaders have held regular calls with a wide variety of stakeholders representing diverse sectors of our community. We engage with multiple coalitions and organizations that serve Black/African American, Asian, Native Hawaiian/Pacific Islander, Latino, homeless and other highly impacted communities. We partner with faith-based leaders and also participate in place-based conversations particularly in areas of high health disparities and COVID-19 impact.

Strategy	Tactics
<p>Engage community leaders, including faith leaders as well as community networks, in a two-way dialogue to build trust and monitor concerns and barriers to implementing public health and social measures.</p>	<ul style="list-style-type: none"> <li>▪ Hold regular calls with cities, including mayors, councilmembers, and city managers to provide situation updates and hear feedback on plans for moving forward.</li> <li>▪ Hold regular Operational Area briefings that include emergency managers from cities, higher education, regional parks, and various special districts.</li> <li>▪ Provide subject matter experts to participate in virtual town halls hosted by cities, chambers of commerce, and other organizations.</li> <li>▪ Hold regular calls with multiple stakeholders to build partnerships for community engagement, including: health care providers to coordinate surge planning and clinical policies; shelter providers to coordinate resources and guidance; and faith-based communities to offer updates and technical assistance for safe reopening.</li> <li>▪ Create a <a href="#">County-City COVID-19 Testing Partnership Framework</a> to guide testing collaborations with cities.</li> </ul>
<p>Consult with community-based organizations on population-specific needs, messages and modalities for relaying culturally and linguistically appropriate public health information on COVID-19.</p>	<ul style="list-style-type: none"> <li>▪ Establish a Health Equity Team that ensures the infusion of equity considerations throughout the response, including in areas of data collection and reporting, case investigations and contact tracing, information and guidance, testing, and community engagement</li> <li>▪ Participate with Oakland in a joint County/City Racial Diversity Task Force.</li> <li>▪ Deploy community engagement plan that focuses on reducing disparities and improving messaging and resource coordination for African American, Latino, and low-income communities hardest hit by pandemic.</li> <li>▪ Provide <a href="#">educational and outreach materials</a> in multiple threshold languages, including Spanish, Chinese, Vietnamese, Tagalog, Farsi, Korean, and others.</li> <li>▪ Create outreach materials for the Mayan Mam community, which does not have a written language.</li> <li>▪ Develop culturally responsive messaging with trusted community messengers</li> </ul>

*OBJECTIVE 4.4: Clearly communicate through multiple means*

Timely and accurate communication with the public, elected officials, community partners, and cities is a key function of the Health Care Services Agency’s COVID-19 response. Strategic communication efforts include regular briefings, near- and long-term prevention and outreach campaigns, media engagement, and ongoing guidance and technical assistance for the community and clinical providers. Ensuring an equity and cultural sensitivity lens, materials and information are available in multiple languages and developed in partnership with community whenever possible.

Strategy	Tactics
<p>Provide timely and accurate information to the public that is tailored to the stage of the epidemic and local conditions.</p>	<ul style="list-style-type: none"> <li>▪ Staff the Joint Information Center at the County’s EOC to engage and respond to media, and coordinate with public information officers across the county</li> <li>▪ Staff a robust Information and Guidance Section within the DOC to provide <a href="#">clinical guidance</a>, <a href="#">community guidance</a>, <a href="#">resources for businesses, schools and community serving organizations</a></li> <li>▪ Provide updated and timely information on <a href="#">website</a> and <a href="#">@Dare2BeWell</a></li> <li>▪ Post timely and relevant data on the County’s COVID-19 <a href="#">dashboards</a></li> <li>▪ Proactively plan and use established engagement channels/networks and trusted messengers</li> <li>▪ Manage misinformation</li> <li>▪ Ensure communications are culturally responsive &amp; linguistically appropriate</li> </ul>
<p>Conduct regular briefings for leaders and partners on case counts, countermeasures, recommendations and outlook.</p>	<ul style="list-style-type: none"> <li>▪ Present to the Board of Supervisors as a standing item on regular agenda</li> <li>▪ Hold regular and ongoing updates for all elected representatives in the County, including state and federal elected officials, mayors, council members, city managers, special districts, etc.</li> <li>▪ Regular and ongoing updates to BOS, cities, the health care community and other community partners</li> <li>▪ Regularly engage with community serving coalitions and task forces, business organizations, and</li> </ul>
<p>Conduct education campaigns to support adherence to public health recommendations and social measures.</p>	<ul style="list-style-type: none"> <li>▪ Launch the <i>Mask On Alameda County!</i> campaign, which pairs free face coverings with messaging, to encourage broad adoption of face coverings throughout Alameda County</li> <li>▪ Develop workplace safety and social contract campaigns to message that we are all responsible for protecting each other</li> <li>▪ Conduct outreach and health promotion activities with community partners</li> <li>▪ Develop medium and long-term messaging and health promotion campaigns in partnership with community serving organizations</li> </ul>

# COVID-19 Risk

## Lowest

Open space

# BOARD OF SUPERVISORS

July 14, 2020

The Honorable Gavin Newsom  
Governor of the State of California  
1303-10th Street, Suite 1173  
Sacramento, CA 95814

Dr. Sonia Y. Angell  
State Public Health Officer and Director California Department of Public Health  
P.O. Box 997377, MS 0500  
Sacramento, CA 95899-7377

**Re: Letter of Support for Alameda County's COVID-19 Variance Attestation**

Dear Governor Newsom and Dr. Angell:

The Alameda County Board of Supervisors thanks you for your leadership and support during the COVID-19 pandemic. This 100-year event will have ripple effects on our residents and economy for years to come, and we appreciate your swift and steady management of this slow motion disaster.

Alameda County was among the first counties in the country to issue Health Officer Orders to shelter in place, and this early action is estimated to have saved more than 7,000 lives and prevented 70,000 hospitalizations in our county. We are proud of this achievement and have taken a cautious and measured approach to reopening our economy, balancing COVID-19 risks alongside the health, safety, and socioeconomic needs of our communities.

The Alameda County Health Care Services Agency's Variance Attestation demonstrates the breadth of our COVID-19 response, which has four goals: prevent and control the spread of COVID-19; find, test and isolate cases and their contacts to prevent further spread; support care for COVID-19 patients; and coordinate an effective response. Racial and cultural diversity is an integral characteristic of our county, and community engagement and equity principles are infused throughout our response in an effort to mitigate the disproportionate effects of this pandemic on communities of color.

Alameda County's Board of Supervisors, Health Officer, and Health Care Services Agency are aligned in the pursuit of the Variance Attestation with caution and reservation. While our county is proceeding with a Variance Attestation application, we are wary of reopening too quickly. To date our reopening decisions have been guided by progress on our five indicators: flat or decreasing rates of new cases and hospitalizations, and sufficiency of hospital and surge

capacity, testing capacity, disease containment, and PPE supply. With Variance Attestation, we will also monitor the indicators used by the State.

However, we are deeply concerned about the spike in cases that is being seen around the State, the disproportionate impact on communities of color, and the local impact of the outbreak at San Quentin State Prison. Our support of variance attestation is to ensure the ability to make local decisions that balance risk and protection of our residents with the ability to move forward to open additional sectors of our economy only when the data indicate it is safe to do so.

Per your public assurances that counties retain local control over the pace and cadence of their reopening plans, we anticipate that we will continue to move carefully and deliberately. We look forward to continued partnership and collaboration with the State to safely get our residents back to work and our children back to school.

Sincerely,

A handwritten signature in blue ink, appearing to read "Richard Valle". The signature is fluid and cursive, with the first name "Richard" and last name "Valle" clearly distinguishable.

Richard Valle, President  
Alameda County Board of Supervisors

**Aneeka Chaudhry, Director of Strategic Initiatives & Public Affairs – Alameda County Public Health Services Agency**

**[Aneeka.chaudry@acgov.org](mailto:Aneeka.chaudry@acgov.org)**

**Re: Variance to Stage 2 of California’s Roadmap to Modify the Stay-at-Home Order**

Dear Ms. Chaudhry,

In response to your request, Kaiser Foundation Hospital Oakland :

- Has capacity to accommodate a minimum surge of 35% due to COVID-19 cases, in addition to providing usual care for its non-COVID-19 patients.
- Has adequate Personal Protective Equipment (PPE) to protect its workforce due to the PPE stewardship program which includes conservation and reprocessing efforts. The Days on Hand (DOH) inventory levels can shift quickly with any changes in patient census, changes in reprocessing, or changes to PPE regulation and usage.

We understand that Alameda County has requested this information in order to assess its readiness to request a local variance to move to Stage 2 in California’s Roadmap to Modify the Stay-At-Home Order.

Sincerely,

A handwritten signature in black ink, appearing to read "Edmund Chan", written over a light blue circular stamp.

County of Alameda  
1000 Broadway, Suite 500  
Oakland, CA 94607

Dear Dr. Moss,

I am writing to support Alameda County in seeking a variance attestation to proceed through the stages of re-opening. St. Rose Hospital is prepared to accommodate a surge in COVID-19 patients of 35%, in addition to providing care for non-COVID-19 patients, and has sufficient PPE to protect our employees and clinicians at this time.

Sincerely,

Aman Dhuper  
President & Chief Executive Officer  
St. Rose Hospital

Dr. Nicholas Moss, MD, MPH  
Interim Health Officer  
County of Alameda  
1000 Broadway, Suite 500  
Oakland, CA 94607

July 13, 2020

Dear Dr. Moss,

I am writing to support Alameda County in seeking a variance attestation to proceed through the stages of re-opening. Stanford Health Care – ValleyCare is prepared to accommodate a surge in COVID-19 patients of 35%, in addition to providing care for non-COVID-19 patients, and has sufficient PPE to protect our employees and clinicians at this time.

Sincerely,

A handwritten signature in blue ink, appearing to read "Rick Shumway". The signature is stylized and includes a large loop.

Rick Shumway, MHA

President & CEO

Stanford Health Care – ValleyCare

Erica Pan, MD  
Interim Health Officer, Alameda County

1000 Broadway Suite 500  
Oakland, CA 94607

Dr. Pan,

In response to your request, Sutter Health's integrated health delivery system:

- Is prepared to accommodate a surge of 35% due to COVID-19 cases in addition to providing care to non COVID-19 patients, as outlined in the surge plan submitted to the State of California, and
- Has adequate PPE to protect our employees and clinicians.

We understand that Alameda County will use this letter to support their application for a variance to move through the stages to re-open.

Sincerely,

A handwritten signature in black ink that reads "Stephen H. Lockhart".

Stephen H. Lockhart, MD, PhD  
Chief Medical Officer, Sutter Health
