Traveling to or from California? Help prevent the spread of COVID-19 by following these travel guidelines.

Follow CDC Travel Guidance

All travelers arriving or returning to California from other states or countries should follow [CDC travel guidance](https://www.cdc.gov/travel/covid-19/index.html).

Positive Test Result? Isolate and Take Precautions

Make Sure You Are Up to Date on Your Vaccines Before You Travel Internationally

Stay up to date with your COVID-19 vaccinations.

If You Travel Domestically, Test Before and After

If you travel domestically (within the U.S.), test as close to your time of departure as possible (no more than 3 days) before travel and test after travel. Read our [testing guidance](https://www.cdc.gov/travel/covid-19/index.html).

Wear a Mask on Public Transportation

Masking is a great way to prevent the spread of COVID-19 when using public transportation (including airports, planes, trains, buses, stations, etc.). Before you travel check your current and destination locations’ [CDC COVID Community Levels](https://www.cdc.gov/coronavirus/2019-ncov/covid-topics/community-levels.html) for their masking recommendations. Be sure to follow all local health rules, which may be stricter than statewide rules.

Read our [guidance for use of face masks](https://www.cdc.gov/coronavirus/2019-ncov/hcp/respiratory-precautions.html)
