

The benefits of getting your family vaccinated

Vaccines are the most effective tool for protecting you and your family from serious illness and preventing the spread of COVID-19. They're safe, effective and recommended for everyone who is eligible to be vaccinated.

Vaccines protect you and your community

When you're vaccinated you:

- Feel even safer visiting family and friends
- Have more peace of mind when traveling
- Get back to doing things you did before the pandemic

How vaccination helps you and your family stay safe

- It prevents you from getting severely ill or dying from COVID-19
- It protects those around you who may not yet be able to get vaccinated
- It helps stop dangerous new variants from forming

What does "fully vaccinated" mean?

The vaccines give you maximum protection from COVID-19 two weeks after your second shot of either Pfizer or Moderna or two weeks after a single dose of Johnson & Johnson.

What if I'm not vaccinated?

Continue wearing a mask, especially as required in public spaces. Because many activities are still considered unsafe even if you are wearing a mask, get vaccinated as soon as possible for stronger protection against COVID-19.
