Protect Yourself and Your Family from COVID-19

Get Vaccinated & Boosted – It’s Safe, Effective, and Free
All COVID-19 vaccines currently available in California are safe and effective at preventing serious illness from COVID-19. Vaccination will protect you and those you love. All Californians ages 5+ should get vaccinated. Those eligible should get boosted. To get vaccinated or boosted visit MyTurn.

Wear Masks in Indoor Public Places
Due to rising case rates and hospitalizations, California currently requires EVERYONE to wear a mask in indoor public places (such as grocery stores and movie theaters) REGARDLESS OF VACCINATION STATUS. Masks are still required for public transit (airports, planes, trains, buses, and stations) and health care settings. Read our face coverings Q & A.

Stay Home and Get Tested If You’re Sick
Stay home if you’re feeling sick and get tested if you have COVID-19 symptoms, even if you’re vaccinated. Read our testing guidance.

Ventilate Indoor Spaces
Good indoor ventilation can reduce the spread of COVID-19. Keep windows and doors open when possible, run heating and air systems, and use portable air cleaners. Read our ventilation fact sheet.

Follow Public Health Travel Guidelines
Follow state and local travel guidelines. All travelers arriving or returning to California from other states or countries should test for COVID-19 within 3–5 days upon arrival. This applies to everyone, regardless of vaccination status. Read our travel advisory.

Sign Up for CA Notify
If you have a smartphone, sign up for CA Notify, California’s exposure notification tool. If you’ve been exposed to COVID-19, you’ll get an alert and additional information on testing and next steps. Sign up for CA Notify.
