### ***Don't Let the Ticks Bite! Drawing Activity***

Think about the kinds of places where ticks live in nature. Draw your backyard, a favorite camping or picnic site, a hiking trail, or other place outside. Trade your drawing with a classmate and ask if they think ticks would live in the area that you drew. Then ask them to find specific places in your drawing where ticks might be found. (*Bonus*: Draw tiny ticks in your picture and ask your classmate to find the ticks in your drawing!)
