

# How Electronic Case Reporting Works

## 01 Provider Enters Information

Health care provider documents patient visit information into electronic health record as part of regular workflow.

## 02 Health Technology Sends Information

Criteria in electronic health record or health information exchange triggers an electronic case report (eCR) to automatically send.

## 03 Determine Reportability

Case report is validated and if reportable, is forwarded to the appropriate agency. Health care provider is notified if disease case is submitted.

## 04 Analysis and Evaluation

Public health professionals receive the disease case for analysis and evaluation.

## 05 Additional Feedback to Provider

In the future, the provider can choose to receive guidance on patient care and outbreak response from public health.
