

# HEY KIDS! ARE YOU PROTECTED AGAINST HPV?

HPV IS THE HUMAN PAPILLOMAVIRUS. IT CAUSES 6 TYPES OF CANCER.

**4 out of 5 people will get an HPV infection** at some point in their lives.

HPV can be sneaky and silent. Most people who have it don't know, so they pass it to others without knowing.

**90%**  
protection

HPV vaccination can prevent more than 90% of HPV cancers

Hundreds of millions of kids worldwide have safely received HPV vaccine.

THERE'S NO CURE FOR HPV BUT THERE IS A VACCINE TO PREVENT IT.

THE HPV VACCINE WORKS BEST WHEN GIVEN IN THE PRETEEN YEARS.

Two doses of HPV vaccine are recommended for everyone 9 to 12 years old. Those who wait until age 15 need three doses.

Talk with your parent/guardian about getting the HPV vaccine.  
Use the QR code to find HPV vaccine near you.
