\* Total include counts for the entire year; year to date (YTD) counts include cases reported with an onset date between January 1 through June 17. Totals and YTD counts for the current year will be the same.

† Los Angeles County data are partially reported for 2018.

Note: This report should be viewed as a preliminary "snapshot" of pertussis activity. Because data are preliminary, the information may be updated in later reports as additional case reports are received. In addition, counties that have no case counts in a given year are not included in the table above.
