

Are you at risk for TB?

Tuberculosis (TB) is an infectious disease caused by bacteria. It spreads from person to person through the air.

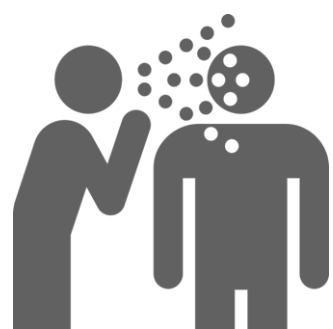

Were you born in, traveled to, or have you lived in a country (for over a month) where TB is common?

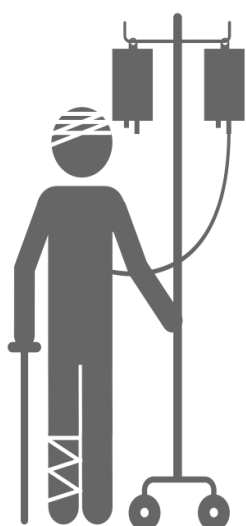

YES

NO

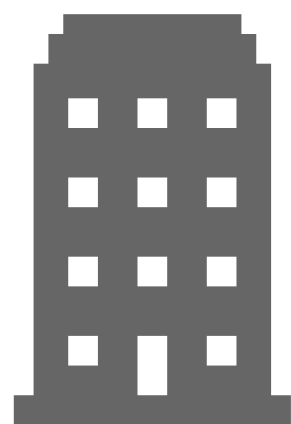

Born or lived in a country where TB is common - anywhere, EXCEPT: United States, Canada, western or northern Europe, Australia, New Zealand

Have you lived with or spent time with someone who has had TB?

Are you a person living with HIV/AIDS or have you received an organ transplant? Do you take medication that weakens your immune system?

Do you live, or have you lived, in a group setting, such as a homeless shelter or a jail or a prison?

If you answered **YES** to any of these questions, ask your doctor to be tested for TB.
